### Mastering investments in fixed assets by state and non-state forms of ownership

Last Certified: 29.11.2021

Last Updated: 29.11.2021

## 0. Prerequisites

### 0.1 Legal environment

#### 0.1.1 Responsibility for collecting, processing, and disseminating statistics

##### **The State Committee of the Republic of Uzbekistan on Statistics**

The State Committee of the Republic of Uzbekistan on Statistics acts independently in accordance with the Law of the Republic of Uzbekistan “On Official Statistics” adopted on August 11, 2021.

The purpose of the Law is to regulate relations in the field of official statistics. This Law applies to producers and users of official statistics, respondents and suppliers of administrative data, as well as relations arising between them related to the production, dissemination and coordination of official statistics.

On September 2, 2017, the “Regulation on the State Committee of the Republic of Uzbekistan on Statistics” was approved, which defines the mandate, functions and structure of the State Committee of the Republic of Uzbekistan on Statistics, which is the main body responsible for coordination, monitoring and supervision of the National Statistical System, as well as for collecting, processing, analysis and dissemination of data. Its functions include providing a unified statistical methodology that meets international standards.

In accordance with article 14 of the Law, state statistics bodies have the right:

- receive from state and economic management bodies, citizens' self-government bodies, banks and other organizations forms of statistical observation and use statistical observation data for statistical purposes;
- to carry out statistical observations of the activities of statistical units and use the obtained primary data for statistical purposes;
- to reward respondents - individuals for participating in statistical observations;
- to request and receive from state and economic management bodies, as well as from other organizations, information necessary for the implementation of statistical programs;
- involve on a contractual basis individuals and legal entities to collect statistical data necessary for the production of official statistics, in accordance with the law;
- use and introduce into the national statistical system modern methods and tools for collecting, processing, summarizing, analyzing, disseminating and storing statistical data;
- in case of revealing violations related to the presentation of statistical data, give instructions on their elimination and make appropriate corrections to the statistical data;

- within the limits of their powers, apply to officials who have violated the procedure for submitting statistical reports, measures of administrative penalties in accordance with the law.

According to Presidential Order №O-5054 dated September 12, 2017, economic and financial data in the country must comply with the requirements of the Enhanced General Data Dissemination System (e-GDDS) of the International Monetary Fund and be coordinated within the framework of this system.

### **0.1.2 Data sharing and coordination among data producing agencies**

#### **The State Committee of the Republic of Uzbekistan on Statistics**

According to article 11 of the Law on Official Statistics, producers of official statistics are guided by internationally recommended definitions, classifications and methodology when producing statistics.

The authorized state body, within the framework of statistical programs, coordinates the activities of other producers of official statistics.

Producers of official statistics coordinate the methodology for producing statistics within their mandate.

If a discrepancy with international recommendations is revealed in the statistical methodologies of other producers of official statistics, the authorized state body, based on the results of the audit of statistical methodologies, has the right to make them mandatory submissions.

Other producers of official statistics that are part of the national statistical system create subdivisions responsible for generating statistical data and ensuring information exchange with the authorized state body.

Producers of official statistics and suppliers of administrative data submit to the authorized state body the statistical and (or) administrative data they have at their disposal free of charge in the manner and terms established by statistical programs.

According to Article 10 of the Law “On Official Statistics”, the Statistical Council is a collegial advisory body on the development, functioning and coordination of official statistics under the authorized state body.

The composition of the Statistical Council is formed from representatives of government bodies, research organizations, non-governmental non-profit organizations, as well as national experts in statistics.

### **0.1.3 Confidentiality of individual reporters' data**

#### **The State Committee of the Republic of Uzbekistan on Statistics**

According to Article 27 of the Law “On Official Statistics”, individual data held by the producers of official statistics are used exclusively for statistical purposes to compile aggregate statistical data. Individual data cannot be used by state bodies, citizens' self-government bodies and other organizations, including international ones, for the purposes of investigation, control, litigation, administrative decisions or for other purposes concerning individuals and legal entities or households.

According to the Regulation on the State Committee of the Republic of Uzbekistan on Statistics, the State Committee on Statistics has the right to conduct statistical observations of the activities of legal entities and individuals, including individual entrepreneurs, and use the data obtained for statistical purposes, also ensures the confidentiality of the statistical data obtained, the protection

of statistical data, containing state secrets.

The State Committee on Statistics employees must comply with the code of ethics, including the principle of confidentiality, not disclose any information provided to them in the performance of their duties.

They are informed of the responsibilities at the time of appointment. Each employee of the State Committee on Statistics is obliged to sign an agreement that obliges him not to disclose such data.

#### **0.1.4 Provision of statistical reporting**

##### **The State Committee of the Republic of Uzbekistan on Statistics**

According to Article 14 of the Law “On Official Statistics”, state statistics bodies have the right to receive forms of statistical observation from bodies of state and economic management, self-government bodies of citizens, banks and other organizations. In accordance with Article 215 of the Code of the Republic of Uzbekistan “On Administrative Liability”, violation by officials of the procedure for submitting statistical reports, expressed in failure to submit reports and other data necessary for conducting statistical observations, distortion of reporting data or violation of the deadlines for submitting reports entails the imposition of a fine from seven to ten basic calculated values.

According to Article 16 of the Law “On Official Statistics”, when conducting statistical observations in accordance with statistical programs, respondents are obliged to provide producers of official statistics with reliable and complete data free of charge in the manner and terms established by the producer of official statistics.

## **0.2 Resources**

### **0.2.1 Staff, facilities, computing resources, and financing**

The formation of data on investments in fixed assets by state and non-state forms of ownership is dealt with by 8 employees in the Central Office and by 2-3 each – in the Divisions of Investment and Construction Statistics of Territorial departments.

The quantity of employees is sufficient for fulfilling the set tasks for the formation of statistical data on the investment in fixed assets by state and non-state forms of ownership statistics.

All employees have higher education in the economic and investment sphere and at least once every 2 years undergo training at the courses of the Institute for Professional Skills Upgrading and Statistical Research under the State Committee of the Republic of Uzbekistan on Statistics.

Each workplace is provided with a personal computer, the software is regularly updated.

The provided financial resources are sufficient for fulfilling the works provided for by the statistical program on investment and construction statistics.

# 1.Integrity

## 1.1 Professionalism

### 1.1.1 Impartiality of statistics

#### **The State Committee of the Republic of Uzbekistan on Statistics**

According to Article 6 of the Law “On Official Statistics”, the main principles of official statistics are impartiality and objectivity.

According to Article 13 of the Law “On Official Statistics”, state bodies, other organizations and their officials are not entitled to interfere with the activities of state statistics bodies carried out in accordance with this Law.

Territorial departments of statistics, departments of statistics of districts (cities) are independent from local government bodies and are directly subordinate to the authorized government body.

In the production of this statistical information, government intervention is not allowed, and professional independence is fully ensured.

When selecting the employees and appointing them to senior positions, their experience and professionalism in the field of statistics are taken into account. Improvement of the qualification of the department’s employees is ensured through participation in training courses organized by the Institute for Professional Skills Upgrading and Statistical Research under the State Committee of the Republic of Uzbekistan on Statistics, as well as in training courses, training seminars organized by international organizations. Employees of the department give lectures at training courses organized by the Institute for Professional Skills Upgrading and Statistical Research. The placement of scientific articles of the department’s employees in the mass media has been organized.

### 1.1.2 Selection of sources, methodology, and modes of dissemination

#### **The State Committee of the Republic of Uzbekistan on Statistics**

According to Article 33 of the Law “On Official Statistics”:

Producers of official statistics assess the quality of official statistics on an ongoing basis. To ensure quality assurance, official statistics are produced and disseminated on the basis of general principles and methods concerning coverage, definitions, statistical units and classifications of official statistics.

In order to improve the quality of official statistics, producers of official statistics have the right to analyze and edit data, combine data from various sources, link and compare data for statistical purposes, and use statistical methods to evaluate them.

Producers of Official Statistics document the sources and methods used in the production process as well as the resulting datasets. Users of official statistics are informed about the sources and methods of producing statistics and about the quality of official statistics through metadata.

### 1.1.3 Commenting on erroneous interpretation and misuse of statistics

#### **The State Committee of the Republic of Uzbekistan on Statistics**

The Regulation on the State Committee of the Republic of Uzbekistan on Statistics (clause 15) determines that The State Committee on Statistics has the right to consider and provide

clarifications on cases of misuse and interpretation of statistical information and statistical data. That is, The State Committee on Statistics may comment on misinterpretation and misuse of statistical data.

## **1.2 Transparency**

### **1.2.1 Disclosure of terms and conditions for statistical collection, processing, and dissemination**

#### **The State Committee of the Republic of Uzbekistan on Statistics**

According to Article 6 of the Law “On Official Statistics”, the main principles of official statistics are clarity and transparency. The conditions for the collection, processing and dissemination of statistical data are included in the legislative acts of the Republic of Uzbekistan concerning statistics. These laws are posted on websites and are thus available to the public. The Law “On Official Statistics” and the statistical program, which clearly defines the terms for the development and dissemination of statistical data, are posted on the official website of the Committee ([www.stat.uz](http://www.stat.uz)). The law is available in the bulletin of the Oliy Majlis, the database of regulatory legal acts (norm), as well as in the database of the Ministry of Justice located at [www.lex.uz](http://www.lex.uz). Statistical reporting forms submitted by respondents to generate statistical data are published in advance for users on the Committee's official website.

### **1.2.2 Internal governmental access to statistics prior to release**

#### **The State Committee of the Republic of Uzbekistan on Statistics**

The government does not have access to the statistics produced by The State Committee on Statistics prior to their publication. State statistical bodies are independent in the dissemination of statistical data. Interference by state bodies is not allowed (Article 13 of the Law “On Official Statistics”). Only the Chairman of the Committee, his deputies and responsible employees have access to statistical data prior to their publication.

### **1.2.3 Attribution of statistical products**

#### **The State Committee of the Republic of Uzbekistan on Statistics**

The logo and footnotes clearly identify that the information published for the public in print statistical publications, information bulletins and in mass media is produced by the State Committee on Statistics.

### **1.2.4 Advance notice of major changes in methodology, source data, and statistical techniques**

#### **The State Committee of the Republic of Uzbekistan on Statistics**

The State Committee on Statistics notifies the public in advance about the transition to a new methodology and significant changes in existing methods and approaches. The State Committee on Statistics posts on its official website the relevant methodological guidelines explaining what changes users should expect. The expected changes are communicated to the public in articles, news and press conferences.

## 1.3. Ethical standards

### 1.3.1 Guideline for staff behavior

#### **The State Committee of the Republic of Uzbekistan on Statistics**

The Rules of Conduct for The State Committee on Statistics employees were approved. They are required to comply with a code of ethics, including the principle of confidentiality, and must not disclose any information provided to them in the performance of their assigned duties. They are informed of these obligations upon appointment. An employee of The State Committee on Statistics is obliged to conclude an agreement containing an obligation not to disclose individual data.

## 2. Methodology

### 2.1 Concepts and definitions

#### 2.1.1 Concepts and definitions

##### Investments in non-financial assets:

1. The methodological basis for the formation of data on mastered investments in fixed assets by state and non-state forms of ownership are the “Methodological provisions for the formation of the total volume of investments into non-financial assets”, approved by the Resolution of the State Committee of the Republic of Uzbekistan on Statistics No. 49 dated November 25, 2021, which are brought into line with the System of National Accounts 2008; “Methodological provisions for assessing the actual expenditures of the population for the construction of individual residential buildings and outdoor household outbuildings”, approved by the Resolution of the State Committee of the Republic of Uzbekistan on Statistics dated January 26, 2018. No. 2; Town-planning norms and rules (ShNK 4.01.16-09) “Rules for determining the cost of construction at contractual current prices”.
2. Calculations of mastered investments in fixed assets by state and non-state forms of ownership are carried out according to a methodology adapted to the requirements of international standards and are carried out by the State Committee on Statistics in accordance with the recommendations of the mission of the International Monetary Fund.

### 2.2 Scope

#### 2.2.1 Scope

##### 2.2.1.1 Scope of the data

The geographical coverage of the data includes the Republic of Karakalpakstan, 12 regions and Tashkent city.

The total volume of investments in fixed assets by state and non-state forms of ownership includes the investment activities for:

- large enterprises;
- small enterprises and micro-firms;
- farming enterprises;

- non-commercial organizations carrying out the investment activities;
- as well as an assessment of the activities of households, in terms of construction.

#### 2.2.1.2 Exceptions to coverage

There are no exceptions.

#### 2.2.1.3 Unrecorded activity

The shadow economy is not taken into account.

### 2.3 Classification/sectorization

#### 2.3.1 Classification/sectorization

The breakdown of statistical information on investments in fixed assets by state and non-state forms of ownership is carried out in accordance with the National Classification on Kinds of Economic Activities of the Republic of Uzbekistan (OKED rev.2), the equivalent of the Classification of Economic Activities within the framework of the European Union (NACE - rev.2).

The main accounting unit is an institutional unit.

### 2.4 Basis for recording

#### 2.4.1 Valuation

##### Investments in non-financial assets:

Statistical accounting of investments in fixed assets by state and non-state forms of ownership is carried out in the amount of the actually mastered volume, regardless of the moment of its payment, at the actual prices of the reporting period, including the value added tax.

#### 2.4.2 Recording basis

Transactions and flows are registered using the accrual method on an accrual basis in accordance with the recommendations of the 2008 SNA.

#### 2.4.3 Grossing/netting procedures

The volume of investments in fixed assets by state and non-state forms of ownership includes the investments mastered by legal entities of all kinds of economic activity, by physical entities in the construction of residential buildings and non-residential facilities, as well as the household expenses for the purchase of large cattle, sheep, goats, camels, horses, pigs, perennial plantings.

In order to conduct the statistical analysis on state and non-state forms of ownership of investments in fixed assets for the purpose of functioning of an investment facility according to the National classification on kinds of economic activity (OKED rev.2) it is formed in the following sections: over the republic in the context of ministries, public agencies; over the republic in the context of territories and by forms of ownership of economic entities.

## 3. Accuracy and reliability

### 3.1 Source data

#### 3.1.1 Source data collection programs

A comprehensive and constantly updated business register serves as the basis for statistical business surveys.

The basis for conducting the statistical activities is a comprehensive and constantly updated register of enterprises (Unified State Register of Enterprises and Organizations), which operates in accordance with the Resolution of the Cabinet of Ministers No. 274 dated September 25, 2012 “On the Approval of the Regulation on the Unified State Register of Enterprises and Organizations” and with the Resolution of the Cabinet of Ministers No. 66 dated February 9, 2017 “On measures for implementing the Resolution of the President of the Republic of Uzbekistan dated October 28, 2016 No. RP-2646 “On improving the system of state registration and posting to the accounts the business entities”.

The procedures for maintaining the register of enterprises correspond to the requirements (including the addition of new units, deletion of units which have ceased to exist, and keeping a record of mergers and changes in ownership). Initial data are continuously analyzed to ensure that the data collection program is comprehensive. The reporting forms are revised periodically to take into account the changed circumstances.

The information base for the formations of investments in fixed assets by state and non-state forms of ownership is the primary statistical data of statistical reporting:

Once a year, specified information is formed on the total volume of investments in fixed assets by state and non-state forms of ownership based on the data of the following statistical reporting and surveys:

- “Report on investment activity, on operational commissioning of buildings and constructions” (annual) – submitted by legal entities, including the construction management economic bodies, engaged in all types of economic activity (except for small enterprises, micro-firms, farming enterprises and non-commercial organizations);
- “Report of the micro-firm and small enterprise” (annual) – submit micro-firms and small enterprises of all forms of ownership;
- “Report on the activities of the farming enterprise” (annual) – submitted by farming enterprises;
- “Report on the activities of a non-commercial organization” (annual) - submitted by non-commercial organizations (except for public associations, public funds, non-state institutions, self-government bodies of citizens and associations of private homeowners);
- “Report on the activities of a non-state non-commercial organization” (annual) - submitted by public associations, public funds, non-state institutions, self-government bodies of citizens;
- “Report on the commissioning of individual residential houses and non-residential buildings by physical entities” (annual) - submitted by the divisions of the territorial departments of the Chamber of State Cadastres.
- “Report on the activities of dekhkan (private subsidiary) farms” (twice a year) – submitted by the gatherings of citizens of mahallas;
- “Questionnaire for a sample survey of commissioned individual residential houses” (one-time) - a survey conducted by statistical offices;
- “Form of registration of prices in dekhkan markets” (three times a month) - a survey conducted

by the statistical offices.

Quarterly, the volume of investment in fixed assets by state and non-state forms of ownership is calculated on an on-going basis based on the reporting data of large organizations and estimates of the volume of investments of other legal entities (small enterprises and micro-firms, farming enterprises, non-commercial organizations which carried out the investment activities), as well as of household activities (separately for each category).

Operational assessment of the quarterly volume of investments in fixed assets by forms of ownership is made for each group of investments and category of enterprises.

The cost of the volume of investments in fixed assets by forms of ownership for the construction of individual residential houses is calculated quarterly in accordance with the “Methodological provisions for assessing the actual expenses of the population for the construction of individual residential houses and outdoor household outbuildings”, approved by the Regulation of the State Committee of the Republic of Uzbekistan on Statistics dated January 26, 2018 No. 2.

Quarterly, the volume of investments in fixed assets by forms of ownership of individual real-estate developers for the construction of non-residential facilities (without the involvement of contractor organizations) is formed according to the data of the relevant quarterly statistical reporting submitted by the territorial departments of the Chamber of State Cadastres.

The cost of the volume of investments in fixed assets by state and non-state forms of ownership of the purchased fruit and berry plantations, vineyards and mulberries in the current year is determined by the cost of one seedling for each type of plantation and by the quantity of seedlings planted in each hectare.

Based on the data of the “Report on the activity of dekhkan farms”, indicators of investments in fixed assets of a non-state form of ownership are determined by the number of large cattle, sheep and goats, horses, camels, pigs. Using a special coefficient, based on life expectancy, the quantity of animals calculated as a fixed assets accumulation is established. The obtained data are multiplied by the price of one animal, which is determined on the basis of the dekhkan markets’ survey data (1-bozor) and, on this basis, the total volume of household expenses for the purchase of animals is formed.

The assessment of the expenses of investments in fixed assets by state and non-state forms of ownership for the purchase of machinery, equipment, agricultural machinery, transport facilities by individual entrepreneurs without forming a legal entity for entrepreneurial activity is carried out on the basis of data on unloaded industrial products, on the volume of imports by main commodity groups (statistics of foreign trade) and by estimated data on the purchase of light motor vehicles for final consumption.

### **3.1.2 Source data definitions, scope, sectorization, classifications, valuation, and time of recording**

Investments in fixed assets by state and non-state forms of ownership: Initial data correspond to the time of reflection in accounting and to base periods.

Time periods of data release: quarterly - not later than 13 working days after the reporting period, annually - not more than 6 months after the reporting period.

### **3.1.3 Source data timeliness**

The data collection program is regulated by the statistical program.

Information on investments in fixed assets by state and non-state forms of ownership is formed by the State Committee of the Republic of Uzbekistan on Statistics on the 13<sup>th</sup> day, that corresponds to the current data standard. Annual information - not more than 6 months after the reporting period.

## **3.2 Assessment of source data**

### **3.2.1 Source data assessment**

The data received from organizations are analyzed, undergo the mandatory control and verification not only at the level of district and regional departments of statistics, but necessarily also at the State Committee on Statistics. When detecting the errors in registration, classification, the control errors, the information is necessarily specified one more time with the respondents.

Initial data are analyzed for the purpose of comparability with other related data sources.

## **3.3 Statistical techniques**

### **3.3.1 Source data statistical techniques**

Estimated calculations for certain categories (physical entities and others) are conceptually consistent with the data of questionnaires and have common approaches. The mandatory submission of data by respondents is established by the Law of the Republic of Uzbekistan “On official statistics”.

The calculation of the index of the physical total volume of mastered investments in fixed assets by forms of ownership is carried out on the basis of statistical reporting for large enterprises, small enterprises and micro-firms, farming enterprises, non-commercial organizations, as well as household activities (separately for each category).

### **3.3.2 Other statistical procedures**

#### Investments in non-financial assets:

The calculation of investments in fixed assets by forms of ownership is carried out in accordance with the “Methodological provisions for the formation of the total volume of investments in non-financial assets”, approved by the Resolution of the State Committee of the Republic of Uzbekistan on Statistics dated November 25, 2021 No. 49, with the “Methodological provisions for assessing the actual expenses of the population for the construction of individual residential houses and outdoor household outbuildings”, approved by the Resolution of the State Committee of the Republic of Uzbekistan on Statistics dated January 26, 2018. No. 2.

## **3.4 Data validation**

### **3.4.1 Validation of intermediate results**

The regular collation of estimated and reporting data is carried out. The difference between operational and specified data is insignificant.

### **3.4.2 Assessment of intermediate data**

An analysis of possible discrepancies in main intermediate data is made, and the data are corrected to eliminate the discrepancies.

### **3.4.3 Assessment of discrepancies and other problems in statistical outputs**

In case of detecting the discrepancies in the previously published data, changes are made to these data in subsequent publications. Coordination can be carried out with other agencies, enterprises and organizations.

## **3.5 Revision studies**

### **3.5.1 Revision studies and analyses**

Mastered investments in fixed assets by state and non-state forms of ownership: preliminary annual indicators for January-December are compared with annual reporting data in 6 months after the reporting period. In connection with the transition to the OKED classifier, revision 2, since 2016 the annual volumes have been recalculated from 2010 to 2015.

## **4. Serviceability**

### **4.1 Periodicity and timeliness**

#### **4.1.1 Periodicity**

Investments in non-financial assets: Calculations of mastered volumes of investment in fixed assets by state and non-state forms of ownership are carried out quarterly, updated indicators - according to annual reporting.

#### **4.1.2 Timeliness**

Investments in non-financial assets: Mastered investments in fixed assets of state and non-state forms of ownership are published on the 13<sup>th</sup> working day, annual data - not later than in 6 months after the reporting period (complies with data dissemination standards - GDDS). Published in accordance with the schedule set in the GDDS Data Publication Calendar.

## 4.2 Consistency

### 4.2.1 Internal consistency

After confirmation and dissemination, the statistical series are not revised.

### 4.2.2 Temporal consistency

Investments in non-financial assets: There are time series in general for mastered investments in fixed assets by state and non-state forms of ownership since 2010. Calculations of the mastered volumes of investments in fixed assets by forms of ownership are carried out according to a methodology adapted to the requirements of international standards, carried out by the State Committee on Statistics in accordance with the recommendations of the mission of the International Monetary Fund.

### 4.2.3 Intersectoral and cross-domain consistency

The statistical data are comparable to the data of the SNA.

## 4.3 Revision

### 4.3.1 Revision and/or update schedule

Investments in non-financial assets: Data on the annual volume of investments in fixed assets by state and non-state forms of ownership are specified within the time frames provided for by the statistical program.

### 4.3.2 Identification of preliminary and/or revised/updated data

Data on investments in fixed assets by forms of ownership are revised on the basis of specified annual reports within the time frames set by the statistical program.

### 4.3.3 Dissemination of revision studies and analyses

Statistical collections indicate that for the previous year, individual indicators are revised. Revised (final) data are disseminated through publications of the State Committee on Statistics.

## 5. Accessibility

### 5.1 Data

#### 5.1.1 Statistical presentation

Data on investments in fixed assets by forms of ownership are provided online and in an electronic form to users through the publications “Socio-economic situation of the Republic of Uzbekistan”, “Statistical Review of the Republic of Uzbekistan”.

## **5.1.2 Dissemination media and format**

### **5.1.2.1 Hard copy - New release**

Data on investments in fixed assets by forms of ownership are provided online and in an electronic form to users through the publications “Socio-economic situation of the Republic of Uzbekistan”, “Statistical Review of the Republic of Uzbekistan”.

### **5.1.2.2 Hard copy - Monthly bulletin**

There are no.

### **5.1.2.3 Hard copy - Quarterly bulletin**

There are no.

### **5.1.2.4 Hard copy - Annually bulletin**

“Socio-economic situation of the Republic of Uzbekistan”, “Statistical review of the Republic of Uzbekistan”.

### **5.1.2.5 Hard copy - Other**

Tables upon special users’ requests.

### **5.1.2.6 Electronic - On-line bulletin or data**

Quarterly bulletin “Investments in non-financial assets”.  
“Socio-economic situation of the Republic of Uzbekistan”, “Statistical Review of the Republic of Uzbekistan” are published on the website quarterly.  
Electronic press release is published quarterly.

## **5.1.3 Advance release calendar**

The data are published on the official website of the State Committee on Statistics ([www.stat.uz](http://www.stat.uz)) in accordance with the calendar “Official Statistics” previously published for the public, as well as with the time frames set in the annual statistical program.

## **5.1.4 Simultaneous release**

Information on investments in fixed assets by forms of ownership is published for all users on the official website of the State Committee on Statistics in the official edition of the statistical collection “Construction in Uzbekistan”. (<https://stat.uz/en/publications/3646-construction-in-uzbekistan>).

## **5.1.5 Dissemination on request**

Specific details can be made available upon request. According to the Law of the Republic of Uzbekistan “On official statistics”, “The Regulation on the State Committee of the Republic of Uzbekistan on statistics”, the Regulations for the organization of works on the preparation and

dissemination of statistical information and on other regulatory documents, the statistical data are provided to users upon their request in accordance with the established procedure. Dissemination of statistical information is carried out by providing upon the written request of legal or physical entities in the form of printed or electronic tables, statistical collections, bulletins, express information, and also in accordance with the agreements of the parties on information interaction.

## **5.2 Metadata**

### **5.2.1 Dissemination of documentation on concepts, scope, classifications, basis of recording, data sources, and statistical techniques**

Methodological provisions for the formation and calculation of statistical indicators for investment activities are placed on the website of the State Committee on Statistics.

## **5.3 Assistance to users**

### **5.3.1 Dissemination of information on contact points**

Official publications of the State Committee on Statistics contain addresses (post, telephone, fax, e-mail, etc.) for communication with the personnel responsible for the preparation of statistical data.

## **9. Plans**

### **9.1 Recent**

#### **9.1.1 Plans for improvement - Recent improvements**

Improvement of tools (forms and questionnaires) of statistical observations.

### **9.2 General**

#### **9.2.1 Plans for improvement - Short-term**

#### **9.2.2 Plans for improvement - Medium-term**

### **9.3 Financial**

#### **9.3.1 Plans for improvement - TA/financing needs - Short-term**

Financing is ensured within the framework of the annual statistical program.

### **9.3.2 Plans for improvement - TA/financing needs - Medium-term**

Financing is ensured within the framework of the annual statistical program.
