0. Prerequisites

0.1 Legal environment

0.1.1 Responsibility for collecting, processing, and disseminating statistics

The State Committee of the Republic of Uzbekistan on Statistics

The State Committee of the Republic of Uzbekistan on Statistics acts independently in accordance with the Law of the Republic of Uzbekistan “On Official Statistics” adopted on August 11, 2021.

The purpose of the Law is to regulate relations in the field of official statistics. This Law applies to producers and users of official statistics, respondents and suppliers of administrative data, as well as relations arising between them related to the production, dissemination and coordination of official statistics.

On September 2, 2017, the “Regulation on the State Committee of the Republic of Uzbekistan on Statistics” was approved, which defines the mandate, functions and structure of the State Committee of the Republic of Uzbekistan on Statistics, which is the main body responsible for coordination, monitoring and supervision of the National Statistical System, as well as for collecting, processing, analysis and dissemination of data. Its functions include providing a unified statistical methodology that meets international standards.

In accordance with article 14 of the Law, state statistics bodies have the right:

- receive from state and economic management bodies, citizens' self-government bodies, banks and other organizations forms of statistical observation and use statistical observation data for statistical purposes;
- to carry out statistical observations of the activities of statistical units and use the obtained primary data for statistical purposes;
- to reward respondents - individuals for participating in statistical observations;
- to request and receive from state and economic management bodies, as well as from other organizations, information necessary for the implementation of statistical programs;
- involve on a contractual basis individuals and legal entities to collect statistical data necessary for the production of official statistics, in accordance with the law;
- use and introduce into the national statistical system modern methods and tools for collecting, processing, summarizing, analyzing, disseminating and storing statistical data;
- in case of revealing violations related to the presentation of statistical data, give instructions on their elimination and make appropriate corrections to the statistical data;
- within the limits of their powers, apply to officials who have violated the procedure for

submitting statistical reports, measures of administrative penalties in accordance with the law.

According to Presidential Order No. P-5054 dated September 12, 2017, economic and financial data in the country must comply with the requirements of the expanded General Data Dissemination System (r-GDDS) of the International Monetary Fund and be coordinated within this system.

0.1.2 Data sharing and coordination among data producing agencies

The State Committee of the Republic of Uzbekistan on Statistics

According to article 11 of the Law on Official Statistics, producers of official statistics are guided by internationally recommended definitions, classifications and methodology when producing statistics.

The authorized state body, within the framework of statistical programs, coordinates the activities of other producers of official statistics.

Producers of official statistics coordinate the methodology for producing statistics within their mandate.

If a discrepancy with international recommendations is revealed in the statistical methodologies of other producers of official statistics, the authorized state body, based on the results of the audit of statistical methodologies, has the right to make them mandatory submissions.

Other producers of official statistics that are part of the national statistical system create subdivisions responsible for generating statistical data and ensuring information exchange with the authorized state body.

Producers of official statistics and suppliers of administrative data submit to the authorized state body the statistical and (or) administrative data they have at their disposal free of charge in the manner and terms established by statistical programs.

According to Article 10 of the Law “On Official Statistics”, the Statistical Council is a collegial advisory body on the development, functioning and coordination of official statistics under the authorized state body.

The composition of the Statistical Council is formed from representatives of government bodies, research organizations, non-governmental non-profit organizations, as well as national experts in statistics.

0.1.3 Confidentiality of individual reporters' data

The State Committee of the Republic of Uzbekistan on Statistics

According to Article 27 of the Law “On Official Statistics”, individual data held by the producers of official statistics are used exclusively for statistical purposes to compile aggregate statistical data. Individual data cannot be used by state bodies, citizens' self-government bodies and other organizations, including international ones, for the purposes of investigation, control, litigation, administrative decisions or for other purposes concerning individuals and legal entities or households.

According to the Regulation on the State Committee of the Republic of Uzbekistan on Statistics, the State Committee on Statistics has the right to conduct statistical observations of the activities of legal entities and individuals, including individual entrepreneurs, and use the data obtained for statistical purposes, also ensures the confidentiality of the statistical data obtained, the protection of statistical data, containing state secrets.

The State Committee on Statistics employees must comply with the code of ethics, including the principle of confidentiality, not disclose any information provided to them in the performance of their duties.

They are informed of the responsibilities at the time of appointment. Each employee of the State Committee on Statistics is obliged to sign an agreement that obliges him not to disclose such data.

0.1.4 Provision of statistical reporting

The State Committee of the Republic of Uzbekistan on Statistics

According to Article 14 of the Law “On Official Statistics”, state statistics bodies have the right to receive forms of statistical observation from bodies of state and economic management, self-government bodies of citizens, banks and other organizations. In accordance with Article 215 of the Code of the Republic of Uzbekistan “On Administrative Liability”, violation by officials of the procedure for submitting statistical reports, expressed in failure to submit reports and other data necessary for conducting statistical observations, distortion of reporting data or violation of the deadlines for submitting reports entails the imposition of a fine from seven to ten basic calculated values.

According to Article 16 of the Law “On Official Statistics”, when conducting statistical observations in accordance with statistical programs, respondents are obliged to provide producers of official statistics with reliable and complete data free of charge in the manner and terms established by the producer of official statistics.

0.2 Resources

0.2.1 Staff, facilities, computing resources, and financing

1. Integrity

1.1 Professionalism

1.1.1 Impartiality of statistics

The State Committee of the Republic of Uzbekistan on Statistics

According to Article 6 of the Law “On Official Statistics”, the main principles of official statistics are impartiality and objectivity.

According to Article 13 of the Law “On Official Statistics”, state bodies, other organizations and their officials are not entitled to interfere with the activities of state statistics bodies carried out in accordance with this Law.

Territorial departments of statistics, departments of statistics of districts (cities) are independent from local government bodies and are directly subordinate to the authorized government body.

In the production of this statistical information, government intervention is not allowed, and professional independence is fully ensured.

When recruiting employees and appointing them to managerial positions, their experience and

professionalism in the field of statistics are taken into account. Advanced training of management staff is provided through participation in training courses organized by the Institute for Professional Skills Upgrading and Statistical Research under the State Committee of the Republic of Uzbekistan on Statistics, as well as in training courses, training seminars organized by international organizations. Management staff lecture at training courses organized by the Institute for Professional Skills Upgrading and Statistical Research. Organized the placement of scientific articles of employees of the department in the media.

1.1.2 Selection of sources, methodology, and modes of dissemination

The State Committee of the Republic of Uzbekistan on Statistics

According to Article 33 of the Law “On Official Statistics”:

Producers of official statistics assess the quality of official statistics on an ongoing basis. To ensure quality assurance, official statistics are produced and disseminated on the basis of general principles and methods concerning coverage, definitions, statistical units and classifications of official statistics.

In order to improve the quality of official statistics, producers of official statistics have the right to analyze and edit data, combine data from various sources, link and compare data for statistical purposes, and use statistical methods to evaluate them.

Producers of Official Statistics document the sources and methods used in the production process as well as the resulting datasets. Users of official statistics are informed about the sources and methods of producing statistics and about the quality of official statistics through metadata.

1.1.3 Commenting on erroneous interpretation and misuse of statistics

The State Committee of the Republic of Uzbekistan on Statistics

The Regulation on the State Committee of the Republic of Uzbekistan on Statistics (clause 15) determines that The State Committee on Statistics has the right to consider and provide clarifications on cases of misuse and interpretation of statistical information and statistical data.

That is, The State Committee on Statistics may comment on misinterpretation and misuse of statistical data.

1.2 Transparency

1.2.1 Disclosure of terms and conditions for statistical collection, processing, and dissemination

The State Committee of the Republic of Uzbekistan on Statistics

According to Article 6 of the Law “On Official Statistics”, the main principles of official statistics are clarity and transparency. The conditions for the collection, processing and dissemination of statistical data are included in the legislative acts of the Republic of Uzbekistan concerning statistics. These laws are posted on websites and are thus available to the public. The Law “On Official Statistics” and the statistical program, which clearly defines the terms for the development and dissemination of statistical data, are posted on the official website of the Committee (www.stat.uz). The law is available in the bulletin of the Oliy Majlis, the database of regulatory legal acts (norm), as well as in the database of the Ministry of Justice located at www.lex.uz. Statistical reporting forms submitted by respondents to generate statistical data are

published in advance for users on the Committee's official website.

1.2.2 Internal governmental access to statistics prior to release

The State Committee of the Republic of Uzbekistan on Statistics

The government does not have access to the statistics produced by The State Committee on Statistics prior to their publication. State statistical bodies are independent in the dissemination of statistical data. Interference by state bodies is not allowed (Article 13 of the Law “On Official Statistics”). Only the Chairman of the Committee, his deputies and responsible employees have access to statistical data prior to their publication.

1.2.3 Attribution of statistical products

The State Committee of the Republic of Uzbekistan on Statistics

The logo and footnotes clearly identify that information published to the public in print statistical publications, newsletters and media is produced by The State Committee on Statistics.

1.2.4 Advance notice of major changes in methodology, source data, and statistical techniques

The State Committee of the Republic of Uzbekistan on Statistics

The State Committee on Statistics notifies the public in advance about the transition to a new methodology and significant changes in existing methods and approaches. The State Committee on Statistics posts on its official website the relevant methodological guidelines explaining what changes users should expect. The expected changes are communicated to the public in articles, news and press conferences.

1.3. Ethical standards

1.3.1 Guideline for staff behavior

The State Committee of the Republic of Uzbekistan on Statistics

The Rules of Conduct for The State Committee on Statistics employees were approved. They are required to comply with a code of ethics, including the principle of confidentiality, and must not disclose any information provided to them in the performance of their assigned duties. They are informed of these obligations upon appointment. An employee of The State Committee on Statistics is obliged to conclude an agreement containing an obligation not to disclose individual data.

2. Methodology

2.1 Concepts and definitions

2.1.1 Concepts and definitions

Calculations of construction works according to the methodology adapted to the requirements of international standards have been carried out by the State Statistics Committee since 2004 in

accordance with the recommendations of the mission of the International Monetary Fund.

Construction:

The methodological basis for the formation of data on the number of construction works is the The methodological basis for the formation of construction works are “Methodological provisions for the formation of the total volume construction works”, approved by the Resolution of the State Statistics Committee of the Republic of Uzbekistan No. 11 of April 30, 2018; Methodological provisions have been brought in line with the System of National Accounts 2008 // European Commission, International Monetary Fund, Organization for Economic Cooperation and Development, United Nations, World Bank // New York, 2012; “Methodological provisions for assessing the actual costs of the population for the construction of individual residential houses and outbuildings”, approved by the Resolution of the State Statistics Committee of the Republic of Uzbekistan dated 01.26.2018. No. 2; Town planning norms and rules (IIIHK 4.01.16-09) “Rules for determining the cost of construction in contractual current prices.”

Calculations of construction works according to the methodology adapted to the requirements of international standards have been carried out by the State Statistics Committee since 2004 in accordance with the recommendations of the mission of the International Monetary Fund.

2.2 Scope

2.2.1 Scope

2.2.1.1 Scope of the data

The geographic coverage of the data includes the Republic of Karakalpakstan, 12 regions and the city of Tashkent.

The total scope of construction work includes construction activities:

a) large enterprises;

b) small businesses and microfirms;

v) non-profit organizations carrying out construction activities, assessing the volume of construction work of small businesses liquidated during the reporting year, The assessment is made on the basis of data on the total volume of construction work of liquidated organizations, as well as the volume of construction work performed in an economic way, by non-profit organizations (includes in the composition of investments in fixed assets).

g) assessments of the activities of households in terms of construction and capital repairs of individual housing.

2.2.1.2 Exceptions to coverage

There are no exceptions.

2.2.1.3 Unrecorded activity

The shadow economy is not taken into account.

2.3 Classification/sectorization

2.3.1 Classification/sectorization

The breakdown by type of activity is carried out in accordance with the Classifier of Economic Activities of the Republic of Uzbekistan (OKED rev. 2), the equivalent of the Classification of Economic Activities within the European Union (NACE rev. 2).

The main unit of account is an institutional unit.

2.4 Basis for recording

2.4.1 Valuation

Construction: Statistical accounting of construction work is carried out in the amount actually completed for the reporting period, regardless of the moment of payment in actual prices of the reporting period, excluding value added tax.

To analyze the activities of construction organizations and changes in the volume of construction work in comparable dynamics, taking into account inflationary processes, a relative indicator is used - the index of the physical volume of construction work.

The calculation of the index of the physical volume of construction work is carried out by comparing the volume of construction work in current prices, respectively, for the reporting period and the corresponding period of the previous year.

The volume index for the corresponding period of the previous year is calculated using the aggregate deflator index - the weighted average index of the volume of construction work by legal entities and individuals.

The index-deflator of the volume of construction work characterizes the change in the prices of construction work and is calculated as the weighted average value of price indices for the elements of construction costs and their share in the cost of construction work.

2.4.2 Recording basis

Transactions and flows are recorded on an accrual basis in accordance with the 2008 SNA recommendations.

2.4.3 Grossing/netting procedures

The cost volume of construction work is defined as a gross indicator. The calculation of the index of the physical volume of construction work is carried out by comparing the volume of construction work for the compared periods, given in comparable prices.

3. Accuracy and reliability

3.1 Source data

3.1.1 Source data collection programs

A comprehensive and constantly updated business register serves as the basis for statistical

business surveys.

The complex and constantly updated register of enterprises (the Unified State Register of Enterprises and Organizations), acting in accordance with the Resolution of the Cabinet of Ministers No. 274 of September 25, 2012 “On Approval of the Regulations on the Unified State Register of Enterprises and Organizations” and Resolution of the Cabinet of Ministers No. 66 dated February 9, 2017 "On measures to implement the resolution of the President of the Republic of Uzbekistan dated October 28, 2016 No. PP-2646 “On improving the system of state registration and registration of business entities”.

The procedures for maintaining a business register are compliant (including adding new units, deleting no longer existing units and keeping records of mergers and changes in ownership). The raw data are constantly analyzed to ensure the comprehensive nature of the data collection program. The reporting forms are periodically revised to take into account the changed circumstances.

Construction works:

The information base for the formation of construction work is the primary statistical data of the state statistical reporting:

- Once a year, updated information is generated on the total volume of construction work based on data from state statistical reporting for large enterprises, unified reporting for small enterprises and microfirms, non-profit organizations carrying out construction activities, carried out in an economic way (included in investments in fixed assets) , estimates of the activities of households, in terms of construction and capital repairs of individual housing, as well as estimates of the volume of construction work of small businesses, liquidated during the reporting year. The assessment is made on the basis of data on the total volume of construction work of the liquidated organizations. The calculated volumes of construction work are added to the recorded volumes of small businesses;

- The monthly volume of construction work is calculated, in the first two months of each quarter, the volume of construction work is calculated on-line based on the reporting data of large organizations and estimates of the volume of construction work of other legal entities (carrying out construction activities of small enterprises and microfirms, non-profit organizations), as well as activities households (separately for each category). The monthly volume of construction work performed in an economic way (included in the investment in fixed assets) is estimated based on their share in the total volume of construction and installation work on the basis of updated (annual) actual data for the previous year.

The cost of commissioned individual residential buildings is calculated monthly in accordance with the "Methodological provisions for assessing the actual costs of the population for the construction of individual residential buildings and outbuildings", approved by the Resolution of the State Statistics Committee of the Republic of Uzbekistan dated 01.26.2018.

Every month, the volume of construction work of individual developers for the construction of non-residential objects (without the involvement of contractors) is formed according to the data of the corresponding quarterly state statistical reports submitted by city and regional authorities of the State Committee for Land Geodezcadastre.

3.1.2 Source data definitions, scope, sectorization, classifications, valuation, and time of recording

Construction works:

The initial data correspond to the time of reflection in accounting and base periods. The scope of activities within the most important building groups is adequate.

Terms of data release: monthly - no later than 10 working days after the reporting period, annually - no more than 6 months after the reporting period.

3.1.3 Source data timeliness

3.2 Assessment of source data

3.2.1 Source data assessment

The data received from organizations is analyzed, undergoes mandatory control and verification not only at the level of district, regional statistics departments, but also at the State Statistics Committee. If errors of registration, classification, control errors are detected, the information must be clarified again with the respondents.

Source data are analyzed for comparability with other related data sources.

3.3 Statistical techniques

3.3.1 Source data statistical techniques

Construction:

Estimates for individual categories (individuals and others.) Are conceptually consistent with the data of the questionnaires and have common approaches.

The obligatory submission of data by respondents is established by the Law of the Republic of Uzbekistan "On State Statistics".

The calculation of the index of the physical volume of construction work is carried out by comparing the volume of construction work for the compared periods, given in comparable prices according to the formula:

$I_{\phi.o.} = (V_1 : V_0) : I_{\text{дефл}} * 10000$, where $I_{\phi.o.}$ - volume index, in percent;

V_1 , V_0 - the volume of construction work in current prices, respectively, for the reporting period and the corresponding period of the previous year;

$I_{\text{дефл}}$ ~ deflator index, Construction work volume deflator characterizes the change in prices for construction work and is calculated as the weighted average value of price indices for the elements of construction costs and their share in the cost of construction work.

The volume index for the corresponding period of the previous year is calculated using the aggregate deflator index - the weighted average index of the volume of construction work by legal entities and individuals.

3.3.2 Other statistical procedures

Construction:

The calculation of the volume of construction work is carried out in accordance with the "Methodological regulations for the formation of the total volume of construction work",

approved by the Resolution of the State Statistics Committee of the Republic of Uzbekistan No. 11 dated April 30, 2018; “Methodological provisions for assessing the actual costs of the population for the construction of individual residential houses and outbuildings”, approved by the Resolution of the State Statistics Committee of the Republic of Uzbekistan dated 01.26.2018. No. 2; “Methodological provisions for the formation of the total volume of investments in non-financial assets” approved by the Resolution of the State Statistics Committee of the Republic of Uzbekistan dated 04.30.2018 No. 10.

3.4 Data validation

3.4.1 Validation of intermediate results

Estimates and reported data are regularly reconciled. The difference between operational and updated data for 2018 is insignificant.

3.4.2 Assessment of intermediate data

Possible discrepancies in the main intermediate data are analyzed and the data are adjusted to eliminate discrepancies.

3.4.3 Assessment of discrepancies and other problems in statistical outputs

In case of discrepancies in previously published data, changes are made to these data during subsequent publications. Reconciliation can be carried out with other agencies, enterprises and organizations.

3.5 Analysis of data revisions

3.5.1 Revision studies and analyses

Construction: Preliminary annual figures for January-December are compared to annual figures 6 months after the accounting period. In connection with the transition to the classification of NACE Rev. 2 from 2016, the annual volume and growth rate of construction works were recalculated from 2010 to 2015.

4. Serviceability

4.1 Periodicity and timeliness

4.1.1 Periodicity

Construction: calculations of construction works are carried out monthly, updated indicators - according to annual reports.

4.1.2 Timeliness

Construction: Construction works are published on the 10th business day, annual data no later than 6 months after the reporting period (complies with the data dissemination standards -

GDDS). Published according to the schedule established in the GDDS data publication calendar.

4.2 Consistency

4.2.1 Internal consistency

Once confirmed and disseminated, the statistical series are not revised.

4.2.2 Temporal consistency

Construction: There is a time series in general for construction works since 1991. Calculations of construction works according to the methodology adapted to the requirements of international standards have been carried out by the State Statistics Committee since 2004, in accordance with the recommendations of the mission of the International Monetary Fund.

There are time series in terms of volume and an index of physical volume since 1995, in the structure of OKED the indicators have been recalculated since 2010.

4.2.3 Intersectoral and cross-domain consistency

The statistics are comparable to the SNA data.

4.3 Revision

4.3.1 Revision and/or update schedule

Construction: data on the annual volume are updated within the timeframes stipulated by the Program of State Statistical Works. Monthly data are not revised, and annual data are updated in May-June.

4.3.2 Identification of preliminary and/or revised/updated data

The data on construction works are revised on the basis of updated annual reports within the timeframes established by the Program of State Statistical Works.

4.3.3 Dissemination of revision studies and analyses

Statistical compilations indicate that for the previous year, certain indicators are being revised. Revised (final) data are disseminated through the publications of The State Committee on Statistics.

5. Accessibility

5.1 Data

5.1.1 Statistical presentation

Data on construction works are provided online and in electronic form to users through the publications "Socio-economic situation of the Republic of Uzbekistan", "Statistical review of the

Republic of Uzbekistan", "National accounts of the Republic of Uzbekistan", etc.

5.1.2 Dissemination media and format

5.1.2.1 Hard copy - New release

The data are disseminated to users in printed form through the publications of the State Statistics Committee of the Republic of Uzbekistan: "Socio-economic situation of the Republic of Uzbekistan" (quarterly), "Statistical review of the Republic of Uzbekistan" (quarterly), "National accounts of the Republic of Uzbekistan" (once every 2 years), etc.

5.1.2.2 Hard copy - Monthly bulletin

Not available.

5.1.2.3 Hard copy - Quarterly bulletin

Not available.

5.1.2.4 Hard copy - Annually bulletin

“Socio-economic situation of the Republic of Uzbekistan”, “Statistical Review of the Republic of Uzbekistan”.

5.1.2.5 Hard copy - Other

Tables for special user requests.

5.1.2.6 Electronic - On-line bulletin or data

The monthly bulletin “Construction work” “Statistical Review of the Republic of Uzbekistan” is published on the website on a quarterly basis. Electronic press release monthly.

5.1.3. Advance release calendar

5.1.4 Simultaneous release

5.1.5 Dissemination on request

Specific details are available upon request. According to the Law of the Republic of Uzbekistan “On Official Statistics”, the Regulation “On the State Committee of the Republic of Uzbekistan on Statistics”, the Regulation on the organization of work on the preparation and dissemination of statistical information and other regulatory documents, statistical data are provided to users upon their request in the prescribed manner. Dissemination of statistical information is carried out by providing, upon written request of legal entities or individuals, in the form of printed or

electronic tables, statistical compilations, bulletins, express information, as well as in accordance with the agreements of the parties on information interaction.

5.2 Metadata

5.2.1 Dissemination of documentation on concepts, coverage, classifications, basis of accounting, data sources and statistical methods

The State Committee on Statistics website (<https://lib.stat.uz/uz/uslub-mater-uz/investitsii-i-stroitelstvo>) contains methodological provisions for the formation and calculation of statistical indicators for investment activities.

5.3. Assistance to users

5.3.1 Dissemination of information on contact points

9. Plans

9.1 Recent

9.1.1 Plans for improvement - Recent improvements

Construction: development of “Methodological provisions for statistical accounting of the seasonality factor in determining the dynamics of construction work on a discrete basis” taking into account modern international standards;
Improvement of tools (forms and questionnaires) of state statistical observations.

9.2 General

9.2.1 Plans for improvement - Short-term

Performing calculations of construction indicators for discrete quarters.

9.2.2 Plans for improvement - Medium-term

Preparation of analytical information on construction works and placement on the website (www.stat.uz) of the State Committee on Statistics.

9.3 Financial

9.3.1 Plans for improvement - TA/financing needs - Short-term

Funding is provided under the annual Program of State Statistical Works.

9.3.2 Plans for improvement - TA/financing needs - Medium-term

Funding is provided under the annual Program of State Statistical Works.
