IV. Metadata

The statistical indicators of wholesale and retail trade turnover were compiled using the regulatory and legal acts of the Republic of Uzbekistan governing the activities of wholesale and retail trade enterprises and organisations, as well as international guidelines and recommendations: “System of National Accounts 2008 (SNA-2008)”, “International Recommendations for Distributive Trade Statistics” (UN, 2008), “Methodological Recommendations for Statistical Observation of Retail Trade Turnover and Calculation of Its Physical Volume Index” (CIS Statistical Committee, 2011).

Wholesale and retail trade turnover statistics are calculated taking into account the results of the statistical assessment of the shadow economy.

In certain cases, minor discrepancies between the total and the sum of the components are due to rounding of data.
