

Construction work in the Republic of Uzbekistan

for January–September 2025

- I. Total Volume of Completed Construction Work
- II. Construction Work by Type of Economic Activity
- III. Structure of Construction Work Volume by Type of Enterprise
- IV. Metadata and Methodological Explanations for Construction Work

I. Volume of completed construction works - total

In January–September 2025, the volume of completed construction work in the Republic of Uzbekistan amounted to 224 532.4 billion soums, which is 14.2% more than in the same period of 2024.

Volume and growth rate of completed construction works

Completed construction work in the region

	Volume, in billion soums	Growth rate, in % compared to the corresponding period of 2024
Republic of Uzbekistan ¹	224 532,4	114,2
Republic of Karakalpakstan	7 306,8	110,4
<i>regions:</i>		
Andijan	11 421,9	112,7
Bukhara	13 798,1	111,2
Jizzakh	5 880,0	117,3
Kashkadarya	12 764,2	110,5
Navoi	10 489,7	109,1
Namangan	10 982,1	115,5
Samarkand	14 195,9	122,0

II. Construction work by type of economic activity

Construction work in the Republic of Uzbekistan during the specified period is distributed by type of economic activity as follows:

- the share of buildings and structures construction reached 68.9%, a 6.1% increase compared to the same period in 2024.
- the share of civil construction was recorded at 20.8%, a 29.4% increase compared to the same period in 2024.
- the share of specialized construction work was 10.3%, a 57.6% increase compared to the same period in 2024.

Construction work by type of economic activity

Volume and growth rate of construction of buildings and structures

	Construction of buildings and structures	Construction of civil facilities	Specialized construction work
Large construction organizations, volume, in billion soums	33 869,4	14 610,4	6 063,2
Growth rate, in %	111,9	140,5	190,5
Small businesses and microfirms, volume, in billion soums	65 284,1	32 049,3	17 142,2

III. Structure of the volume of construction works by types of enterprises

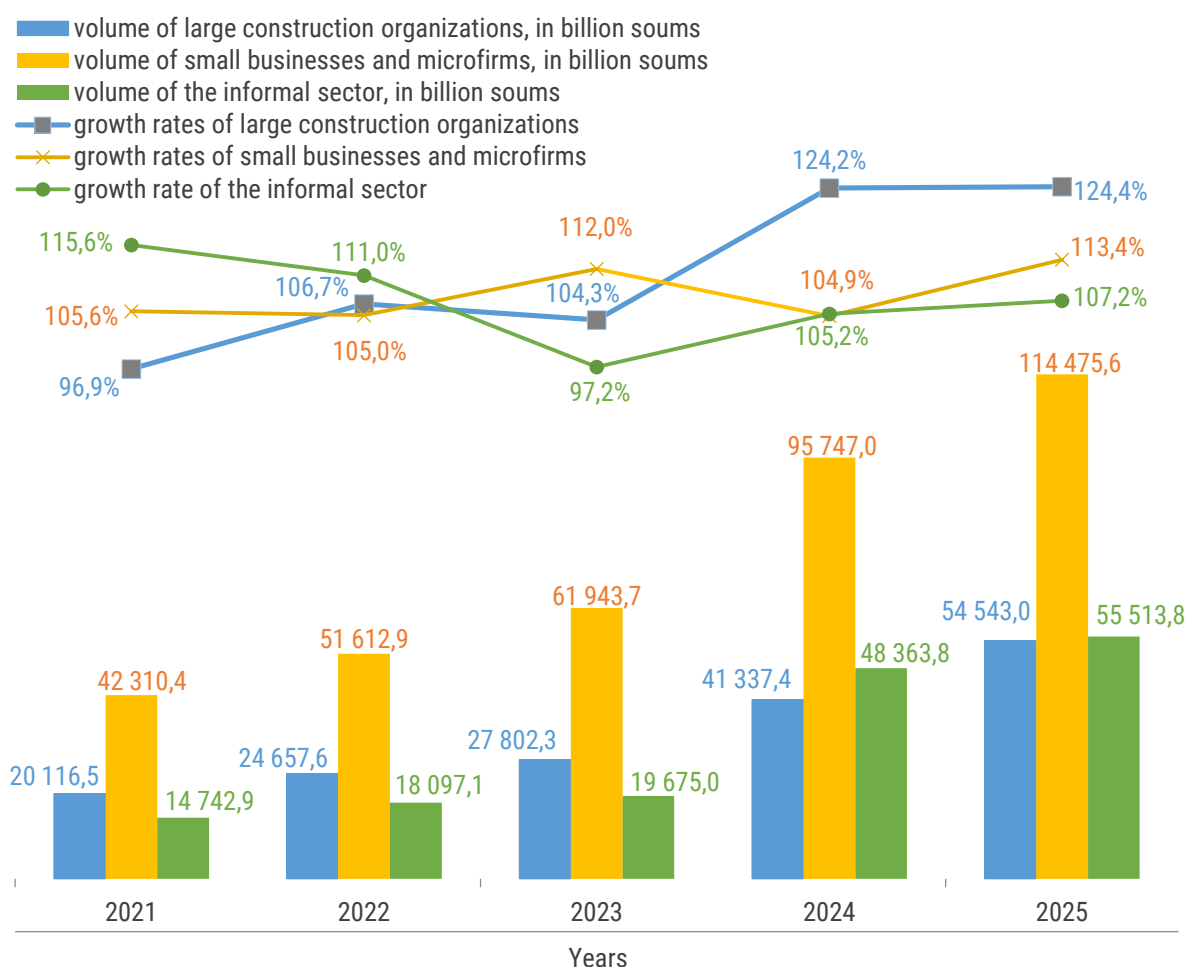

The volume of construction work performed by large construction organizations in January–September 2025 amounted to 54 543.0 billion soums, a 24.4% increase compared to the same period in 2024. Their share of the total volume increased by 2% to 24.3%.

The share of construction work performed by small businesses and microfirms during the period under review amounted to 51.0% of the total construction volume. Thus, the total volume of construction work performed by them amounted to 114 475.6 billion soums, a 13.4% increase compared to the same period in 2024.

The share of construction work in the informal sector amounted to 24.7%, or 55 513.8 billion soums, a 7.2% increase compared to the same period in 2024.

Volume and growth rate of construction work by type of enterprise

Volume of construction work by type of enterprise by region

Volume, in billion soums				Growth rate, in % compared to the corresponding period of 2024		
	Large construction organizations	Small businesses and micro-firms	Informal sector	Large construction organizations	Small businesses and micro-firms	Informal sector
Republic of Uzbekistan ²	54 543,0	114 475,6	55 513,8	124,4	113,4	107,2

Surkhandarya	1 129,7	6 021,6	3 777,5	149,7	108,6	108,6
Sirdarya	776,2	3 043,4	614,7	164,8	130,6	103,5
Tashkent	4 212,7	13 264,1	7 751,9	141,0	117,1	95,3
Fergana	2 298,9	7 496,2	3 899,5	118,3	124,0	100,9
Khorazm	978,4	3 676,6	4 539,2	124,8	110,4	107,1
Tashkent city	21 437,1	36 284,5	6 360,3	148,6	110,9	107,3

High growth rates of work performed by large construction organizations were noted in Jizzakh (169.1% compared to the corresponding period of 2024), Andijan (167.4%) and Syrdarya (164.8%) regions.

Construction works by types of ownership

² Including unallocated data by region

IV. Metadata and methodological explanations

Construction work is the result of construction production as a set of activities performed during the construction, reconstruction, expansion, major and routine repairs of buildings and structures.

The cost of construction includes site development, plumbing and sewerage work, installation of building structures, and other contract work (commissioning, landscaping, etc.).

Statistical accounting of construction work is performed based on the actual volume completed during the reporting period, regardless of when it is paid, at the actual prices of the reporting period, excluding value-added tax.

Statistical information on the volume of construction work is compiled based on:

- a) statistical reporting (monthly and annual) of legal entities engaged in construction activities;
- b) the results of quarterly sample surveys of small businesses and microfirms;
- c) statistical reporting of territorial offices of the Chamber of State Cadastres, which monitor the construction of individual housing and non-residential properties by individuals;
- d) data from sample statistical surveys of commissioned individual residential buildings;
- e) statistical assessment of the volume of repairs to individual residential buildings carried out using private means.
