0. Prerequisites

0.1 Legal environment

0.1.1 Responsibility for the collection, processing and dissemination of statistical data

The National Statistics Committee of the Republic of Uzbekistan

On August 11, 2021, the Law of the Republic of Uzbekistan “On Official Statistics” was adopted, which was developed on the basis of the Generic Law on Official Statistics for Eastern Europe, Caucasus and Central Asia.

The purpose of the Law is to regulate relations in the field of official statistics. This Law applies to producers and users of official statistics, respondents and suppliers of administrative data, as well as relations arising between them related to the production, dissemination and coordination of official statistics.

Also, in accordance with the Regulations on the National Statistics Committee of the Republic of Uzbekistan, approved by the Resolution of the President of the Republic of Uzbekistan dated February 24, 2025 No. RP-75 “On measures to organize the activities of the National Statistics Committee of the Republic of Uzbekistan”, the National Statistics Committee is responsible for compliance with the basic principles of official statistics and identity of statistical methodology consistent with international recommendations; organizing the collection of statistical data, statistical observations of households, conducting censuses, one-time counts, sample surveys and other statistical observations; providing users of all levels with official statistical data in the prescribed manner; maintaining statistical registers and classification systems for their use for statistical purposes.

At the same time, in accordance with Article 14 of the Law “On Official Statistics”, statistical authorities have the right:

- receive from state and economic management bodies, citizens' self-government bodies, banks and other organizations forms of statistical observation and use statistical observation data for statistical purposes;
- to carry out statistical observations of the activities of statistical units and use the obtained primary data for statistical purposes;
- to reward respondents - individuals for participating in statistical observations;
- to request and receive from state and economic management bodies, as well as from other organizations, information necessary for the implementation of statistical programs;
- involve on a contractual basis individuals and legal entities to collect statistical data necessary

for the production of official statistics, in accordance with the law;

- use and introduce into the national statistical system modern methods and tools for collecting, processing, summarizing, analyzing, disseminating and storing statistical data;
- in case of revealing violations related to the presentation of statistical data, give instructions on their elimination and make appropriate corrections to the statistical data;
- within the limits of their powers, apply to officials who have violated the procedure for submitting statistical reports, measures of administrative penalties in accordance with the law.

According to Presidential Order №O-5054 dated September 12, 2017, economic and financial data in the country must comply with the requirements of the Enhanced General Data Dissemination System (e-GDDS) of the International Monetary Fund and be coordinated within the framework of this system.

Management of statistical processes, including the preparation and dissemination of statistical data, is carried out in accordance with national procedures developed on the basis of international quality management models (GSIM, GSBPM, GAMS0).

0.1.2 Data sharing and coordination among data producing agencies

The National Statistics Committee of the Republic of Uzbekistan

According to article 11 of the Law on Official Statistics, producers of official statistics are guided by internationally recommended definitions, classifications and methodology when producing statistics.

The authorized state body, within the framework of statistical programs, coordinates the activities of other producers of official statistics.

Producers of official statistics coordinate the methodology for producing statistics within their mandate.

If a discrepancy with international recommendations is revealed in the statistical methodologies of other producers of official statistics, the authorized state body, based on the results of the audit of statistical methodologies, has the right to make them mandatory submissions.

Other producers of official statistics that are part of the national statistical system create subdivisions responsible for generating statistical data and ensuring information exchange with the authorized state body.

Producers of official statistics and suppliers of administrative data submit to the authorized state body the statistical and (or) administrative data they have at their disposal free of charge in the manner and terms established by statistical programs.

According to Article 10 of the Law “On Official Statistics”, the Statistical Council is a collegial advisory body on the development, functioning and coordination of official statistics under the authorized state body.

The composition of the Statistical Council is formed from representatives of government bodies, research organizations, non-governmental non-profit organizations, as well as national experts in statistics.

0.1.3 Confidentiality of individual reporters' data

The National Statistics Committee of the Republic of Uzbekistan

According to Article 27 of the Law “On Official Statistics”, individual data held by the producers of official statistics are used exclusively for statistical purposes to compile aggregate statistical data. Individual data cannot be used by state bodies, citizens' self-government bodies and other organizations, including international ones, for the purposes of investigation, control, litigation, administrative decisions or for other purposes concerning individuals and legal entities or households.

The National Statistics Committee's employees must comply with the code of ethics, including the principle of confidentiality, not disclose any information provided to them in the performance of their duties.

They are informed of the responsibilities at the time of appointment. Each employee of the National Statistics Committee is obliged to sign an agreement that obliges him not to disclose such data.

0.1.4 Provision of statistical reporting

The National Statistics Committee of the Republic of Uzbekistan

According to Article 14 of the Law “On Official Statistics”, state statistics bodies have the right to receive forms of statistical observation from bodies of state and economic management, self-government bodies of citizens, banks and other organizations. In accordance with Article 215 of the Code of the Republic of Uzbekistan “On Administrative Liability”, violation by officials of the procedure for submitting statistical reports, expressed in failure to submit reports and other data necessary for conducting statistical observations, distortion of reporting data or violation of the deadlines for submitting reports entails the imposition of a fine from seven to ten basic calculated values.

According to Article 16 of the Law “On Official Statistics”, when conducting statistical observations in accordance with statistical programs, respondents are obliged to provide producers of official statistics with reliable and complete data free of charge in the manner and terms established by the producer of official statistics.

0.2 Resources

0.2.1 Staff, facilities, computing resources, and financing

Demographic data at the national level are compiled by the Demography Statistics Division of the Department of Demography, Labour and Gender Statistics of the National Statistics Committee. At the regional level, these indicators are compiled by the staff of the demography, labour and gender statistics divisions of the territorial statistical departments.

The Committee's Demography Statistics Division has 5 staff members, and the demography, labour and gender statistics divisions of the territorial statistical departments have on average 2 staff members. The number of staff is considered sufficient for carrying out the tasks assigned in compiling statistical data on population statistics.

All staff possess the knowledge and skills relevant to the field. Continuous professional development of staff is closely supported by the Institute for Professional Development and

Statistical Research of the National Statistics Committee of the Republic of Uzbekistan.

The computing resources available for carrying out the tasks assigned to the division are sufficient; the software is updated from time to time and meets both existing and emerging requirements. Every workplace is equipped with a personal computer connected to the local network. The computing resources are provided with adequate protection, as well as with a system for recovering statistical information in emergency situations.

The material, technical and other resources meet the established requirements.

The financial resources provided for carrying out the work envisaged in the statistical program for demographic statistics are considered sufficient.

1.Integrity

1.1 Professionalism

1.1.1 Impartiality of statistics

The National Statistics Committee of the Republic of Uzbekistan

According to Article 6 of the Law “On Official Statistics”, the main principles of official statistics are impartiality and objectivity.

According to Article 13 of the Law “On Official Statistics”, state bodies, other organizations and their officials are not entitled to interfere with the activities of state statistics bodies carried out in accordance with this Law.

Territorial departments of statistics, departments of statistics of districts (cities) are independent from local government bodies and are directly subordinate to the authorized government body.

When selecting the employees and appointing them to senior positions, their experience and professionalism in the field of statistics are taken into account. Improvement of the qualification of the department's employees is ensured through participation in training courses organized by the Institute for Professional Development and Statistical Research of the National Statistics Committee of the Republic of Uzbekistan, as well as in training courses, training seminars organized by international organizations. Employees of the department give lectures at training courses organized by the Institute for Professional Development and Statistical Research. The placement of scientific articles of the department's employees in the mass media has been organized.

1.1.2 Selection of sources, methodology, and modes of dissemination

The National Statistics Committee of the Republic of Uzbekistan

According to Article 33 of the Law “On Official Statistics”:

Producers of official statistics assess the quality of official statistics on an ongoing basis. To ensure quality assurance, official statistics are produced and disseminated on the basis of general principles and methods concerning coverage, definitions, statistical units and classifications of official statistics.

In order to improve the quality of official statistics, producers of official statistics have the right to analyze and edit data, combine data from various sources, link and compare data for statistical purposes, and use statistical methods to evaluate them.

Producers of Official Statistics document the sources and methods used in the production process as well as the resulting datasets. Users of official statistics are informed about the sources and methods of producing statistics and about the quality of official statistics through metadata.

1.1.3 Commenting on erroneous interpretation and misuse of statistics

The National Statistics Committee of the Republic of Uzbekistan

The National Statistics Committee may comment on misinterpretation and misuse of statistical data.

1.2 Transparency

1.2.1 Disclosure of terms and conditions for statistical collection, processing, and dissemination

The National Statistics Committee of the Republic of Uzbekistan

According to Article 6 of the Law “On Official Statistics”, the main principles of official statistics are clarity and transparency. The conditions for the collection, processing and dissemination of statistical data are included in the legislative acts of the Republic of Uzbekistan concerning statistics. These laws are posted on websites and are thus available to the public. The Law “On Official Statistics” and the statistical program, which clearly defines the terms for the development and dissemination of statistical data, are posted on the official website of the National Statistics Committee (<https://stat.uz>). The law is available in the bulletin of the Oliy Majlis, the database of regulatory legal acts (norm), as well as in the database of the Ministry of Justice located at www.lex.uz. Statistical reporting forms submitted by respondents to generate statistical data are published in advance for users on the National Statistics Committee's official website.

1.2.2 Internal governmental access to statistics prior to release

The National Statistics Committee of the Republic of Uzbekistan

The government does not have access to the statistics produced by the National Statistics Committee prior to their publication. State statistical bodies are independent in the dissemination of statistical data. Interference by state bodies is not allowed (Article 13 of the Law “On Official Statistics”). Only the Chairman of the Committee, his deputies and responsible employees have access to statistical data prior to their publication.

1.2.3 Attribution of statistical products

The National Statistics Committee of the Republic of Uzbekistan

The logo and footnotes clearly identify that the information published for the public in print statistical publications, information bulletins and in mass media is produced by the National Statistics Committee.

1.2.4 Advance notice of major changes in methodology, source data, and statistical techniques

The National Statistics Committee of the Republic of Uzbekistan

The National Statistics Committee notifies the public in advance about the transition to a new methodology and significant changes in existing methods and approaches. The National Statistics Committee posts on its official website the relevant methodological guidelines explaining what changes users should expect. The expected changes are communicated to the public in articles, news and press conferences.

1.3. Ethical standards

1.3.1 Guideline for staff behavior

The National Statistics Committee of the Republic of Uzbekistan

The Rules of Conduct for the National Statistics Committee's employees were approved. They are required to comply with a code of ethics, including the principle of confidentiality, and must not disclose any information provided to them in the performance of their assigned duties. They are informed of these obligations upon appointment. An employee of the National Statistics Committee is obliged to conclude an agreement containing an obligation not to disclose individual data.

2. Methodology

2.1 Concepts and definitions

2.1.1 Concepts and definitions

The concepts and definitions used are based on the generally recognized international statistical standards for calculating the population size, statistical observation of demographic processes and accounting for international migration, as well as on the legal acts of the Republic of Uzbekistan in force.

International recommendations applied in calculating the population size.

The following international recommendations and statistical standards are used in calculating the population size and compiling demographic indicators:

1. The document of the United Nations “Principles and Recommendations for Population and Housing Censuses, Revision 4” — international principles and recommendations on determining the size, composition, territorial distribution and demographic characteristics of the population for the 2030 round of population and housing censuses.
2. The document of the United Nations “Principles and Recommendations for a Vital Statistics System, Revision 3” — international recommendations on the registration of births, deaths, marriages, divorces and other vital events, as well as on compiling statistical indicators on their basis.
3. The document of the United Nations “Recommendations on Statistics of International Migration and Temporary Mobility” — updated international recommendations on compiling statistics of international migration, flows and stocks of international migrants, changes in the place of usual residence, and temporary international mobility.

4. The World Health Organization's "International Statistical Classification of Diseases and Related Health Problems, 10th Revision (ICD-10)" — an international standard applied for the international statistical classification of diseases, health-related problems and causes of death.
5. The methodological guide of the United Nations "Handbook on Measuring International Migration through Population Censuses" — methodological recommendations on measuring and estimating international migration on the basis of population census data.
6. The recommendations of the United Nations Economic Commission for Europe for the 2030 round of population and housing censuses — recommendations on population, migration and mobility, the use of administrative data, and the organization of modern population census methods.

National legal and methodological documents of the Republic of Uzbekistan.

The following legal and methodological documents of the Republic of Uzbekistan in force are used in calculating the population size and compiling the main demographic indicators:

1. The Law of the Republic of Uzbekistan "On Population Census" — establishes the legal basis for organizing and conducting the population census, its main principles and the use of its results.
2. The Law of the Republic of Uzbekistan "On Official Statistics" — establishes the legal basis for the production of official statistics, the organization of statistical observations, the quality of statistical data and the use of international statistical standards.
3. The Family Code of the Republic of Uzbekistan — regulates the legal relations concerning birth, marriage, divorce and family relations.
4. The Civil Code of the Republic of Uzbekistan — the main codified document regulating the legal status of natural persons and civil law relations.
5. The Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 550 of October 20, 2023 "On systematization of legal acts in the field of registration of marriage, family and civil status acts", as well as the Rules for the registration of civil status acts approved by the relevant annex to this resolution — establish the procedure for registering acts of birth, marriage, divorce, death and other civil status acts.
6. The "Methodological provisions on Compiling the Main Demographic Indicators", approved by Order No. 123 of May 31, 2024 — establishes the methodology for compiling the indicators of births, deaths, marriages, divorces, natural increase and other main demographic indicators.
7. Decree of the President of the Republic of Uzbekistan No. DP-6065 of September 22, 2020 "On measures for the introduction of identification ID cards in the Republic of Uzbekistan" — establishes the legal basis for a modern system of personal identification and for the introduction of ID cards.
8. Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 129 of March 6, 2020 "On measures for the introduction of the system of issuing and processing identification ID cards in the Republic of Uzbekistan" — establishes the procedure for processing and issuing identification ID cards.
9. The legislation of the Republic of Uzbekistan on the administrative-territorial structure in force — is applied in compiling the population size by region, administrative-territorial unit and settlement.
10. In the statistical recording of births and deaths, the rules for the registration of civil status acts in force, as well as the procedures in force in the health care system for processing medical documents on births, perinatal deaths and deaths, are applied.

In calculating the population size, along with these international recommendations and national legal acts, their current editions, the amendments and additions made to them, and the methodological documents on compiling official statistics in force in the Republic of Uzbekistan are taken into account.

In compiling the population size and demographic indicators, the completeness, consistency and comparability of statistical accounting, as well as its compliance with international statistical standards, are ensured.

2.2 Scope

2.2.1 Scope

2.2.1.1 Scope of the data

Data on population numbers are presented for the resident population, which consists of the population permanently residing in the area at the time of the latest population census, including persons temporarily absent;

The geographical coverage of the data comprises the Republic of Karakalpakstan, 12 regions and the city of Tashkent.

The data cover the following population groups: population by sex, age, ethnicity and urban and rural area (place of residence).

Data on population numbers cover the resident population of the Republic of Uzbekistan (without exceptions).

The population count is based on the results of the latest population census, to which are added each year the numbers of births and of persons who moved into the area concerned, and from which are subtracted the numbers of deaths and of persons who moved out of that area. Statistical data on the numbers of births and deaths are provided by the local Civil Registry Offices (CRO) of the Ministry of Justice, while statistical data on the numbers of in-migrants and out-migrants are provided by the Migration and Citizenship Registration Divisions of the territorial Internal Affairs Departments (Divisions) of the Ministry of Internal Affairs. These statistical data are produced by age and sex.

Statistical data on population numbers, vital statistics (births, deaths, marriages and divorces) and migration cover, as a whole, all natural persons permanently residing in the Republic of Uzbekistan, including persons temporarily absent, that is, those temporarily residing in or temporarily visiting the territory of a foreign state.

2.2.1.2 Exceptions to coverage

There are no exceptions to the statistical coverage.

2.2.1.3 Unrecorded activity

There are no unreported activities.

2.3 Classification/sectorization

2.3.1 Classification/sectorization

To compile data on mortality of population statistics, the international classification system for diseases and causes of death ICD-10 is used.

To compile data on the territory, the statistical classifier “System of Designations for Administrative-Territorial Entities (Objects) of the Republic of Uzbekistan” is used.

2.4 Basis for recording

2.4.1 Valuation

The main unit of account is a person.

2.4.2 Recording basis

Registration of births, deaths, marriages and divorces is carried out according to the registration of act records in the civil registry offices (under the Ministry of Justice).

Migration records are kept by filling in the arrival and leaving coupons by the Migration and registration Citizenship Departments of the territorial Departments (departments) of the Interior (under the Ministry of Internal Affairs).

2.4.3 Grossing/netting procedures

The year-end population estimate is calculated by adding the number of births and arrivals to the population at the beginning of the reporting year and subtracting the number of deaths and departures.

3. Accuracy and reliability

3.1 Source data

3.1.1 Source data collection programs

The main sources of population statistics are current records (act records and coupons of arrival and departure) and sample surveys.

Current records of demographic events - keeping current records of births, deaths, arrivals, departures, registered marriages and divorces.

Vital and migration statistics are collected monthly.

The source data are assessed systematically at quarterly intervals

The results of the assessments are tracked and taken into account in the statistical process.

The accuracy and confidence parameter is applied to annual and quarterly population estimates.

3.1.2 Source data definitions, scope, sectorization, classifications, valuation, and time of recording

The source data are reasonably close to the required parameters in terms of definition, statistic coverage, classification, estimate and time of recording.

Birth, death, marriage and divorce are subject to compulsory registration with the Civil Registry Office of the Ministry of Justice.

The current registration of migrants is entrusted to the Departments of Migration and Citizenship Registration of the Territorial Departments (Departments) of Internal Affairs of the Ministry of Internal Affairs, which register the population at the place of residence and place of stay. Cases of change of place of permanent residence are subject to statistical observation.

The International Statistical Classification of Diseases and Related Health Problems is used to calculate mortality due to causes of death. Tenth revision.

3.1.3 Source data timeliness

The data collection program ensures that they are received in a timely manner.

Source data are developed at the end of each quarter by the within the timeframes established by the Statistical Program, for the republic as a whole and for the regions.

The development of annual data on natural movement is carried out by the date of the event, the development of monthly data - by the date of registration of the event. Population calculations are made annually as of January 1, based on the final data of the last population census, to which the number of births and arrivals to a given territory is added and from which the number of deaths and those who left this territory are subtracted.

3.2 Assessment of source data

3.2.1 Source data assessment

The data obtained are analyzed, undergo mandatory control and verification by the territorial departments of statistics and the National Statistics Committee. If registration errors are detected, the information must be specified.

3.3 Statistical techniques

3.3.1 Source data statistical techniques

Population data cover the resident population of the Republic of Uzbekistan (no exceptions).

Current population estimates are calculated on the basis of the final population census data, to which are added annually the number of births and arrivals to a given territory and from which the number of deaths and those who left the given territory are subtracted.

The statistical methods used are consistent with sound statistical procedures, which minimizes processing errors.

Data compilation procedures minimize data processing errors, such as errors in coding and editing data and in tabulation.

3.3.2 Other statistical procedures

Correction and transformation of data is carried out using approved methodological provisions on the formation of basic demographic indicators, guidelines for coding information from acts of civil status and statistical registration coupons in the formation of basic demographic indicators.

3.4 Data validation

3.4.1 Validation of intermediate results

Estimates and reported data are regularly reconciled. The difference between operational and updated data is insignificant.

3.4.2 Assessment of intermediate data

Interim and output statistics are regularly evaluated and reconciled.
Based on the results of the annual development, the data on the number of registered births and deaths, including those under the age of 1 year, are clarified by the date of the event.

3.4.3 Assessment of discrepancies and other problems in statistical outputs

Statistical discrepancies in intermediate data are estimated and investigated.
Examines statistical discrepancies and other potential indicators of problems in statistical outputs.
In case of discrepancies in previously published data, changes are made to these data during subsequent publications.

3.5 Revision studies

3.5.1 Revision studies and analyses

The review and analysis of revisions is carried out systematically on a quarterly basis, and their results are taken into account in internal statistical work.
According to the results of the annual development, the coefficients of the vital movement of the population, infant mortality, the population at the beginning of the year and the average annual population for the year are specified.

4. Serviceability

4.1 Periodicity and timeliness

4.1.1 Periodicity

Periodicity and timeliness meet internationally recognized data dissemination standards.
Vital and migration statistics are collected monthly.
Vital and migration statistics are published annually, in line with the IMF's GDDS requirement.

4.1.2 Timeliness

Quarterly Advance Population Information is prepared within 10 days of the end of the reporting period.

Annual data on population for the republic as a whole and broken down by regions, districts and cities for the reporting year are available in April next year.

Data on the sex and age structure of the population of the Republic of Uzbekistan as a whole, as well as by regions, districts and cities for the reporting year are available in July next year.

Indicators of demographic statistics as a whole for the republic and regions for the reporting year are available in August next year.

4.2 Consistency

4.2.1 Internal consistency

Statistical data are characterized by internal consistency, comparable over time.

4.2.2 Temporal consistency

Comparable time series of data are available over a sufficient period of time. Time series have been available since 2010 on the National Statistics Committee website.

4.2.3 Intersectoral and cross-domain consistency

Statistical data are consistent with data obtained from other sources (health authorities, the Ministry of Internal Affairs, and others).

4.3 Revision

4.3.1 Revision and/or update schedule

The data revision cycle is predetermined. The terms for the preparation of preliminary and final data are determined by the annually developed Statistical Program.

4.3.2 Identification of preliminary and/or revised/updated data

During the dissemination of data, users are informed whether the data is preliminary.

When the preliminary data is published, a corresponding note is made.

4.3.3 Dissemination of revision studies and analyses

The revised data are analyzed against preliminary data to assess the reliability of the preliminary data.

5. Accessibility

5.1 Data

5.1.1 Statistical presentation

Data are published by territory, area, gender, age and ethnicity.

Quarterly and annual data are provided by the user through the publications “Social and Economic Situation of the Republic of Uzbekistan”, “Statistical Review of the Republic of Uzbekistan”, “Demographic Yearbook of Uzbekistan”, “Statistical Yearbook of Uzbekistan”, “Uzbekistan in Figures”, “Women and Men of the Republic of Uzbekistan” and others, as well as on the official website of the of the Republic of Uzbekistan. at www.stat.uz, www.gender.stat.uz.

5.1.2 Dissemination media and format

5.1.2.1 Hard copy - New release

The data are disseminated to users in printed form through publications of the of the Republic of Uzbekistan:

- “Statistical Yearbook of Uzbekistan”
- “Demographic Yearbook of Uzbekistan”
- “Labor and Employment in Uzbekistan”
- “Women and Men of the Republic of Uzbekistan”
- “Uzbekistan in Figures”
- “Statistical Yearbook of the Regions of Uzbekistan”
- “Social development and living standards in Uzbekistan”, etc.

In addition, the data are presented on agreed layouts of tables to government bodies and other users upon their request.

5.1.2.2 Hard copy - Monthly bulletin

-

5.1.2.3 Hard copy - Quarterly bulletin

Publications “Socio-economic situation of the Republic of Uzbekistan”, “Statistical review of the Republic of Uzbekistan” are distributed quarterly.

5.1.2.4 Hard copy - Annually bulletin

-

5.1.2.5 Hard copy - Other

Tables are provided upon user request.

5.1.2.6 Electronic - On-line bulletin or data

On the official website of the National Statistics Committee of the Republic of Uzbekistan, statistical data, time series in the form of spreadsheets are quarterly posted and constantly updated, as well as the “Statistical Review of the Republic of Uzbekistan” is published at www.stat.uz.

5.1.3. Advance release calendar

Published on the official website - Official Statistics Calendar.

5.1.4 Simultaneous release

-

5.1.5 Dissemination on request

According to the Law of the Republic of Uzbekistan “On Official Statistics”, the Regulation on the National Statistics Committee of the Republic of Uzbekistan and other regulatory documents, statistical data are submitted by the user upon their request in the prescribed manner. Dissemination of statistical information is carried out by providing, upon written request of legal entities, individuals and international organizations in the form of printed or electronic tables, statistical compilations, express information, as well as providing in accordance with the agreements of the parties on information interaction.

5.2 Metadata

5.2.1 Dissemination of documentation on concepts, scope, classifications, basis of recording, data sources, and statistical techniques

Data on concepts, accounting basis, data sources and statistical methods are reflected in the disseminated statistical compilations in the form of methodological explanations for the main indicator.

Methodological provisions for the formation and calculation of statistical indicators are posted on the Committee website.

5.3. Assistance to users

5.3.1 Dissemination of information on contact points

Official publications of the National Statistics Committee provide addresses (mail, telephone, fax, e-mail, etc.) for contacting personnel responsible for the preparation of statistical data.

9. Plans

9.1 Recent

9.1.1 Plans for improvement - Recent improvements

The software for recording the natural and mechanical movement of the population has been improved.

Improved registration of demographic events.

9.2 General

9.2.1 Plans for improvement - Short-term

-

9.2.2 Plans for improvement - Medium-term

Improvement of work on data exchange between the National Statistics Committee, the Ministry of Justice, the Ministry of Health and the Ministry of Internal Affairs.

The introduction of interdepartmental electronic databases of the National Statistics Committee and the Ministry of Justice, and the Ministry of Internal Affairs.

9.3 Financial

9.3.1 Plans for improvement - TA/financing needs - Short-term

-

9.3.2 Plans for improvement - TA/financing needs - Medium-term

To implement the medium-term plans, technical assistance is needed to study international recommendations and best practices.
