

Industrial production in the Republic of Uzbekistan

for January-October 2025

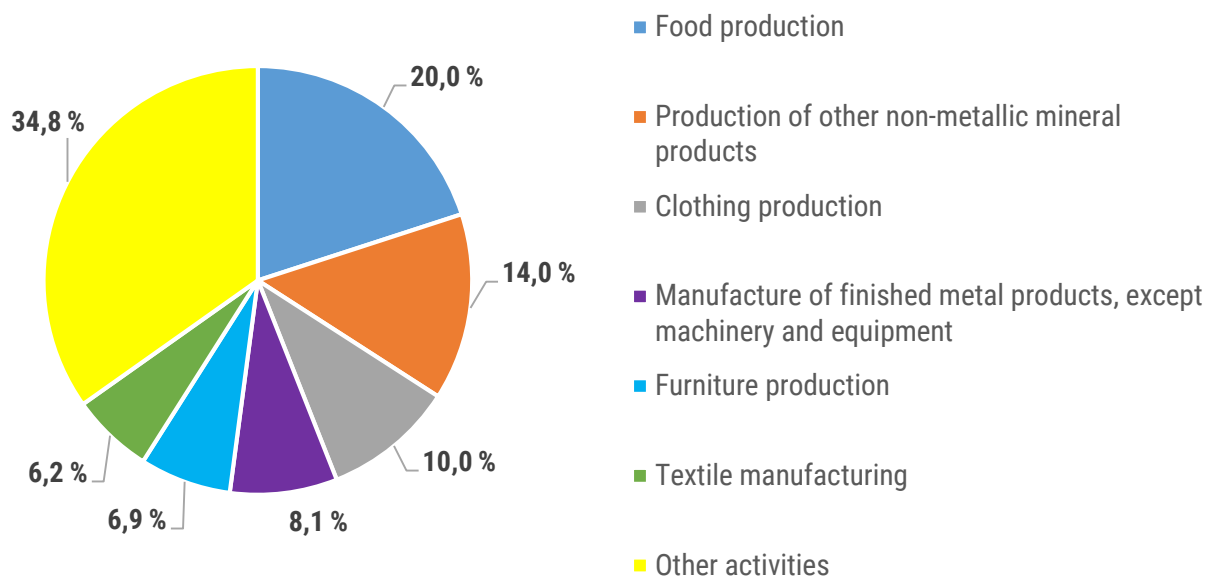

- I. Number of operating industrial enterprises in the Republic of Uzbekistan
- II. Main industrial indicators of the Republic of Uzbekistan
- III. Production of certain types of industrial products by large industrial enterprises
- IV. Methodological explanations and metadata on industrial production

I. The number of operating industrial enterprises in the Republic of Uzbekistan

As of November 1, 2025, there were 58.6 thousand industrial enterprises operating in the republic. By main types of economic activity, the largest number of enterprises falls into the following sectors:

- Food production – 11.7 thousand (20.0 %)
- Production of other non-metallic mineral products – 8.2 thousand (14.0 %)
- Clothing production – 5.8 thousand (10.0 %)
- Production of finished metal products – 4.7 thousand (8.1 %)
- Furniture production – 4.0 thousand (6.9 %)
- Textile production – 3.6 thousand (6.2 %)
- Production of rubber and plastic products – 2.8 thousand (4.7 %)

The share of industrial enterprises by main types of economic activity as of November 1, 2025

II. Main indicators of industry in the Republic of Uzbekistan

In January-October 2025, enterprises in the republic produced industrial products worth **865.8** trillion soums. This indicator increased by **6.7%** compared to the same period last year.

Volume of industrial production per capita

When analyzing the volume of industrial production per capita, indicators above the national average (**22.9** million soums) were recorded in Navoi region (**140.8** million soums), Tashkent city (**53.4** million soums), Tashkent region (**42.3** million soums), and Andijan region (**24.0** million soums).

Moreover, while the growth rate of industrial production per capita in the republic was **104.7 %**, in Jizzakh region it reached **112.1 %**, in Navoi region – **106.7 %**, and in Khorezm region – **106.7 %**, which is significantly higher than the national indicator.

¹⁾ Taking into account the increase in electricity generation by newly established enterprises in the region operating on the basis of public-private partnerships.

Main branches of industrial production

In the structure of industrial production for January-October 2025, the largest share was attributed to the manufacturing industry, which accounted for **741.5** trillion soums, with a share of the total industrial production of **85.6 %**. The mining industry and open-pit mining, which accounted for **63.3** trillion soums (**7.3 %**), electricity supply, gas supply, steam supply and air conditioning accounted for **56.1** trillion soums (**6.5 %**), and water supply, sewerage, waste collection and disposal accounted for **4.9** trillion soums (**0.6 %**).

Production volume by main industry sections and physical volume index for January-October 2025

The structure of industrial production consists of 4 main sections B, C, D, E:

B - mining and quarrying

C - manufacturing industry

D - electricity supply, gas supply, steam supply and air conditioning

E - water supply; sewerage, waste collection and disposal

III. Production of certain types of industrial products by large industrial enterprises

In January-October 2025, the republic produced:

- Natural gas – 35.5 billion m³, oil – 547.3 thousand tons, coal – 6.5 million tons, motor gasoline – 974.7 thousand tons, diesel fuel – 978.1 thousand tons, portland cement – 17.3 million tons, yarn – 482.8 thousand tons, soft wheat and spelt flour – 1 009.6 thousand tons.

| Portland cement, million tons | 10.2 | 13.3 | 17.3 |

¹⁾ Production volumes for January-October 2023-2024 were calculated based on data provided by enterprises, adjusted according to the annual balance sheet.

Indicators on the topic:

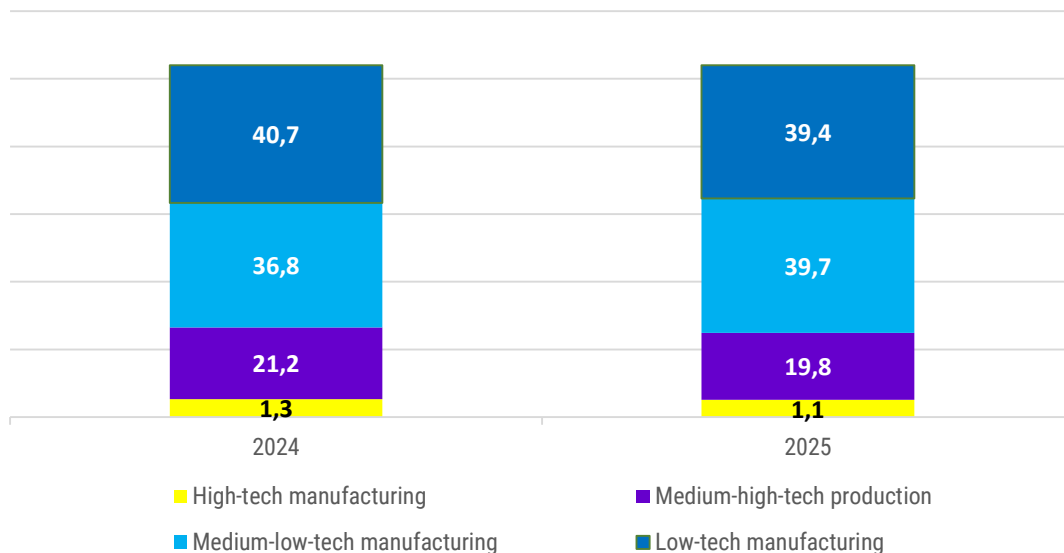

[Volume of production of certain types of industrial products \(annual\)](#)

[Industrial production volumes of individual types of economic activities included in the manufacturing industry](#)

In the manufacturing industry, the share of food products, beverages and tobacco products is **19.3%**, the share of textile products, clothing, leather and leather goods is **15.5%**, the share of finished metal products (excluding machinery and equipment), computers, electronic and optical products, electrical equipment, machinery and equipment not included in other categories, motor vehicles, trailers and semi-trailers, other transport equipment, as well as repair and installation of machinery and equipment is **18.6%**, and the share of chemical products, rubber and plastic products is **7.1%**.

Technological composition and share of the manufacturing industry

Compared to the corresponding period last year, the share of the high-tech sector in the manufacturing industry was **1.1** %, medium-high-tech - **19.8** %, medium-low-tech - **39.7** %, low-tech - **39.4** %.

| Textile waste, t | 16 786.7 | 16 043.1 | 21 435.5 |

¹⁾ Production volumes for January-October 2023-2024 are based on data adjusted by enterprises in accordance with the annual balance sheet.

IV. Methodological explanations and metadata

Data on industrial production volume by product type is compiled using the codes of the Statistical Classification of Products (Goods, Works, Services) of the Republic of Uzbekistan by Type of Economic Activity (UzDSt 2914:2014). This includes mining, manufacturing, electricity supply, gas supply, steam and air conditioning supply, water supply, wastewater treatment, waste collection and processing services (sections B, C, D, E).
