From January to September 2025, the share of financial services, excluding ancillary financial activities, insurance, and pension provision, amounted to **88.0 %**. The share of insurance services was **7.1 %**, and that of ancillary financial services was **4.9 %**.

Volume of communication and information services by type
(for January–September 2025, billion soums)

Communication and information technology services totaled **54 796.9** billion soums. Computer programming services accounted for the largest share, accounting for **40.4** %. Their growth compared to January–September 2024 was **24.1** %.

The volume of services in the education sector was equal to **26 322.4** billion soums, with higher education services predominating at **45.8** %.

In the total volume of services related to real estate (**18 814.3** billion soums), the share of services for leasing and managing own or leased real estate amounted to **95.9** %.

The volume of services in the healthcare sector amounted to **14 567.7** billion soums, of which other healthcare services accounted for **53.2** %, hospital services - **30.8** %, medical practice and dentistry – **16.0** %.

In the total volume of rental services, the largest share was accounted for by the rental of passenger cars and light commercial vehicles – **49.3** %.

IV. Explanations of statistical indicators for the service sector

The press release presents data based on the results of statistical surveys conducted to assess the informal and shadow economy.

The monthly volume of services is formed on the basis of:

a) statistical reporting on commercial organizations (except for small enterprises, micro-firms and agricultural producers), separate divisions of legal entities - commercial organizations, as well as non-profit organizations (according to the list);

b) assessment of the volume of services provided by small business entities based on quarterly surveys, as well as the results of standardized annual reporting for small enterprises and microfirms;

c) assessment of the volume of services provided by farms and non-profit organizations according to the relevant statistical reporting forms;

d) assessment of the volume of services provided by individual entrepreneurs and self-employed persons based on the results of a sample survey conducted quarterly.

The volume of market services provided is the cost of services provided in a certain period to consumers (including non-residents) by all service providers - both those specializing in the provision of services and those for whom the provision of services is not the main type of activity.

The volume of market services rendered includes **accrued payments** for services at actual market prices of sales **without VAT and excise taxes**.

An output is considered **marketable** when services are subject to purchase and sale and are sold at economically significant prices (fully or substantially covering the producer's costs). Payment can be made in cash, by bank cards, and by transfers, including electronic payments and electronic money.

Services rendered to non-residents (if not paid in sums) are recalculated at contract prices at the exchange rate of the soum established by the Central Bank of the Republic of Uzbekistan on the date of payment.

The volume of provided market services is formed for all types of economic activity classified according to the Statistical Classification of Products of the Republic of Uzbekistan (SCP) in sections G–S.
