

## **Demographic situation in the Republic of Uzbekistan**

*For January-December 2025*

- I. Main demographic indicators
- II. Permanent population
- III. Births and deaths
- IV. Marriages and divorces
- V. Population migration
- VI. Methodological explanations of demographic indicators and metadata

### **I. Main demographic indicators**

As of January 1, 2026, the permanent population of the Republic of Uzbekistan stood at **38 236,7** thousand people, an increase of **1,8** percent compared to the same period last year. In January-December 2025, there were **879,6** thousand births and **177,1** thousand deaths, resulting in a natural increase of **702,5** thousand people. The number of immigrants to our country from foreign countries amounted to **1 159** people, while the number of those who emigrated abroad totaled **10,117**. There were **267,1** thousand registered marriages and **46,9** thousand divorces.

[Number of emigrants \(total, quarterly\)](#)

## **VI. Methodological explanations and metadata of demographic indicators** **Explanations and metadata**

**In order to form demographic indicators**, electronic data exchange has been established between the National Statistics Committee, the Ministry of Justice, and the Ministry of Internal Affairs of the Republic of Uzbekistan, and the primary databases of these ministries have been integrated.

Since all data necessary for the formation of demographic indicators are obtained electronically through integration, a separate form of statistical observation has not been approved.

To form data characterizing demographic indicators, statistical bodies process primary data on natural population movement and migration, received from other state bodies (Ministry of Justice and Ministry of Internal Affairs of the Republic of Uzbekistan).

Statistical data on demographic indicators are formed based on:

- birth registration records;
- death registration records;
- marriage registration records;
- divorce registration records;
- statistical accounting forms for immigration;
- statistical accounting forms for emigration.
