This statistical compilation presents the preliminary results and analytical materials of the Population and Agriculture Census of the Republic of Uzbekistan, 2026 (hereinafter referred to as the census), reflecting the current state of demographic, socio-economic and agrarian processes in the Republic, and is intended exclusively for statistical and analytical purposes.

The principal aim of this publication is to provide users with a timely presentation of the preliminary results of the census, as well as to set out the country's key demographic, socio-economic and agrarian indicators in accordance with the Recommendations of the United Nations Conference of European Statisticians for the conduct of population and housing censuses, the recommendations of the United Nations Population Fund (UNFPA), and the World Programme for the Census of Agriculture of the Food and Agriculture Organization of the United Nations (FAO).

The publication is intended for bodies of state authority and administration, international organisations, scientific institutions and a broad range of users with an interest in up-to-date statistical information on the population and the agrarian sector of the country.

The preliminary results of the census have been published on the web portal of the National Statistics Committee of the Republic of Uzbekistan in three languages - Uzbek, Russian and English - at: <https://aholi.stat.uz>.

This publication contains preliminary data. Upon completion of all stages of statistical processing, the information will be refined in accordance with the established national and international statistical standards.

FOREWORD

Behzod Hamrayev

Chairman of the National Statistics Committee
of the Republic of Uzbekistan

We are pleased to present to you the preliminary results of the 2026 Population and Agriculture Census of the Republic of Uzbekistan. A census is an important strategic undertaking that occupies a special place in the statistical system of any country and creates a reliable information foundation for the country's current situation and future development.

This census reflects the current state of the population and the agricultural sector and forms a source of statistical data essential for analysing socio-economic processes, developing the regions and ensuring sustainable economic growth.

As the need for accurate and impartial data grows amid the large-scale reforms being carried out in our country, the 2026 Population and Agriculture Census of the Republic of Uzbekistan constitutes a state statistical undertaking of major importance for planning the country's socio-economic development and taking strategic decisions.

This census is an important statistical observation in the history of our country; the data obtained on the population and agriculture on the basis of a single methodology have created a reliable basis for assessing the demographic situation, employment, migration, households, agricultural potential, land resources, the activity of farms and production, the efficient use of resources, and the development of state programmes and sectoral strategies.

The census was organised in accordance with international standards and best practices, covering all regions of the country. In preparing for and carrying out the census, extensive use was made of the recommendations of the United Nations and other authoritative international organisations, modern statistical methodologies and best practices in data management. This served to ensure the quality, impartiality and international comparability of the data obtained.

In recent years, extensive work has been carried out in our country to improve the national statistical system, harmonise it with international standards and adapt it to modern governance requirements. Strengthening the principles of openness, transparency and user-orientation in the field of official statistics is one of the priority tasks. As a practical result of these reforms, the Population and Agriculture Census served to further strengthen the institutional and technological capacity of the national statistical system.

Digital technologies and innovative solutions were used effectively during the census. The application of modern information and communication technologies in the processes of data collection, processing, storage and analysis made it possible to ensure the accuracy and timeliness of the data, reduce human error and improve the efficiency of statistical work. This is of great importance as a practical expression of digital transformation processes in the field of statistics in our country.

The preliminary results presented in this statistical publication make it possible to form an initial picture of the main characteristics of the population and the agricultural sector. These data are an important source of information for state administration bodies, research institutions, international organisations, the private sector and the general public. At the same time, work to refine, verify, analyse and aggregate the data will continue, and the detailed and final results of the census will be made available to the general public at subsequent stages in the established manner.

Taking this opportunity, I express my sincere gratitude to all those who made a worthy contribution to the successful implementation of this large-scale undertaking. First and foremost, I extend my special thanks to the population of our country, and to the representatives of farms and dehkan holdings who actively participated in the census, for their contribution to ensuring the completeness and reliability of the data provided.

I also express my sincere gratitude to the representatives of the “mahalla seven”, the staff of statistical bodies, volunteers, representatives of the private sector, commercial banks, ministries and agencies, state administration and local government bodies, civil society institutions, the mass media, the expert community, international organisations and other partners who made a worthy contribution to organising the census to a high standard and conducting it successfully. Their active participation, practical support and effective cooperation ensured the successful implementation of this important nationwide undertaking.

I am confident that the results of the census will serve to support evidence-based decision-making in our country, improve the effectiveness of social policy, ensure the integrated development of the regions, make rational use of agricultural potential and further enhance the quality of public administration. Most importantly, these results will make a worthy contribution to developing human capital, improving the well-being of the population and ensuring the sustainable development of the Republic of Uzbekistan.

Dr Nigina Abaszade

Resident Representative of the United Nations
Population Fund (UNFPA) in Uzbekistan

On behalf of the United Nations Population Fund (UNFPA), I congratulate the Government of Uzbekistan and the National Statistics Committee on the successful completion of the country's first Population and Agricultural Census. This landmark achievement marks an important milestone in Uzbekistan's development journey and represents a national investment in evidence, knowledge, and the future.

For more than three decades, Uzbekistan's development planning has taken place without an updated population census. At a time of rapid demographic, economic, and social transformation, this census provides an essential new baseline for understanding the country's population, households, communities, and agricultural realities.

The 2026 Census introduced a modern approach to data collection, combining online self-enumeration with household-based enumeration conducted by trained enumerators using digital tools. This model made it possible to collect data more efficiently, improve accuracy, and make results available more quickly for planning and decision-making.

The census also built on one of Uzbekistan's greatest national strengths: its mahalla system. Through the nationwide network of mahallas, the census was able to strengthen outreach, build public trust, and reach households across the country, including in remote and underserved communities. The contribution of mahalla representatives helped ensure that the process was rooted in local realities and that every person had the opportunity to be counted.

By combining digital innovation with household-based enumeration and community engagement, Uzbekistan has implemented its first census since independence in line with international standards and best practices. This achievement contributes to the continued strengthening of the national statistical system and creates a solid foundation for regular, reliable, and internationally comparable population data in the years ahead.

The results of the census will support Uzbekistan's ongoing reforms by helping policymakers identify changing needs, anticipate demographic trends, and direct public investments where they are needed most. From healthcare and education to employment, housing, social protection, infrastructure, urban development, and economic growth, reliable data will enable more targeted policies and more equitable allocation of resources across regions and communities.

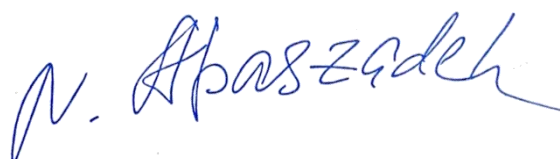

This publication is the first step in revealing census data. By making the findings accessible to policymakers, researchers, development partners, and the wider public, it supports transparency, informed dialogue, and the practical use of evidence in national and local planning.

UNFPA is proud to have partnered with the Government of Uzbekistan and the National Statistics Committee throughout the census process. UNFPA's contribution extended from high-level advocacy and policy support to technical guidance on census methodology, digital enumeration, quality assurance, capacity development, and alignment with international standards and best practices. UNFPA is proud to contribute to the strengthening of national and local census capacities, the introduction of modern data-collection tools, and extended coordination among development partners. Looking ahead, UNFPA will continue to support the analysis, dissemination, and practical use of census results, including for demographic projections, SDG monitoring, sectoral planning, and evidence-based policymaking.

The successful implementation of this historic census provides clear evidence of the Government of Uzbekistan's commitment to strengthening its national statistical system and ensuring that future investments, planning, and reforms are guided by reliable data and evidence. It also reflects the dedication and professionalism of thousands of statisticians, enumerators, experts, mahalla representatives, and partners whose collective efforts made this remarkable achievement possible.

We trust that the findings presented in this publication will serve not only as a snapshot of Uzbekistan today, but also as an essential resource for shaping the country's future – one where every person is counted, every community is visible, and every policy and investment is grounded in evidence.

Once again, I congratulate Uzbekistan on this landmark achievement and reaffirm UNFPA's continued commitment to supporting the country in harnessing the power of demographic data to advance ongoing reforms, sustainable development, and improved well-being for all.

ACKNOWLEDGEMENTS

The population and agriculture census became one of the important steps towards the further improvement of the country's national statistical system. The effective organisation of the census activities and the publication of the preliminary results were ensured thanks to the joint efforts, professional approach and dedicated work of all those involved in the census.

The knowledge and experience, professionalism, initiative and responsible attitude to work of all the specialists who took part at the various stages of the census contributed to the successful implementation of this large-scale statistical undertaking.

In this connection, on behalf of the National Statistics Committee of the Republic of Uzbekistan, we express our sincere appreciation to all the organisations, members of the public and specialists who made a significant contribution to organising and conducting the population and agriculture census.

It is particularly worth noting that the high-level organization of this historic and nationally significant Population and Agricultural Census, the coordination of all its stages, and its effective implementation in accordance with international standards were greatly supported by the strong sense of responsibility, strategic leadership, practical assistance, and dedicated efforts of the Deputy Chairmen of the National Statistics Committee of the Republic of Uzbekistan – **Rustem Maxammadiev, Zohidjan Ziyaev, and Lazizjon Mirsoatov**. Their initiative, professional expertise, and valuable contribution to the process played an important role in ensuring the successful implementation of the census activities and the reliable compilation of the preliminary results.

In particular, the staff of the Department for the Organisation and Conduct of Census Processes, under the leadership of **Jakhongir Kambarov, Olimjon Sidikov, Farrukh Normatov, Dilmurod Khodjaev, Sardar Guseynov, Nigorakhon Dekhkanova, Madina Yuldasheva, Elena Egorova, Olga Aleshunina, Zulaykho Khudayarova, Feruz Farmonov, Asadbek Kholdarov, Bekzod Amirov, Dilmurod Dilshodov, Fariddun Mukhitdinov, Jur'atjon Torakulov, Boboyorbek Boliev, Ayzhan Eralieva and Mukhabbat Kamalova** – carried out significant work on coordinating the census activities, organising the preparatory work, providing organisational and methodological support, controlling the quality of the work performed, and analysing, processing and publishing the preliminary results. We greatly value their contribution in this area.

It should also be specially noted that the heads and staff of the territorial subdivisions of the Department for the Organisation and Conduct of Census Processes contributed to the effective organisation of this undertaking. Their worthy contribution to the timely and high-quality performance of the tasks assigned, to the coordination of processes on the ground and their proactive approach to work deserves separate recognition.

Of particular importance was the work on creating the digital infrastructure of the census, developing and introducing information systems, improving software and hardware solutions, and ensuring their uninterrupted and stable operation, carried out by the staff of the Department for the Development of Digital Technologies under the leadership of **Shokhrukh Odilov: Shakhboz Samadov, Murodjon Umarov, Shokhruzbek Ochilov, Ganisher Eshmurodov, Nodirbek Nosirov, Sukhrobbek Olimov, Nodirbek Iskandarov, Jaloliddin Mamatmusaev, Omadbek Kasimov, Ibrokhim Abduganiev, Nurmukhammad Mashrapov, Bakhromiddin Ibragimov, Khumoyiddin Urazaliev, Sokhibjon Abdialimov, Shukhrat Tursunov, Ogabek Otakhonov, Jamila Negmatova, Marufjon Nurullaev, Mansur Askarov, Abdullajon Davlatov, Shokhrukh Ortikov, Tumaris Ramanova, Oybek Yuldashev, Ogabek Mirzaev, Bakhodir Rakhmonov, Bakhrom Ermatov, Dilshod Nurullaev, Shakhriyor Tursunaliev, Shamsiddin Abdusattorov and Shokhrukh Chorshanbiev.**

Thanks to their high professionalism and responsible approach, it became possible to organise the census processes efficiently on the basis of modern digital technologies.

In addition, the staff of the Department made a substantial contribution to the development and introduction of digital solutions that make it possible to display data related to census processes on electronic maps by territorial breakdown on the basis of a geographic information system (GIS), to visualise the location of census objects, to carry out real-time monitoring of processes, and to analyse the territorial coverage and results of the census.

At the same time, we express our particular appreciation to the team of **PROXIMA LLC** for their effective cooperation in creating the census information systems and digital infrastructure, providing technical support for them, and ensuring the uninterrupted and stable operation of the servers and software platforms.

The responsible, proactive and dedicated work of all the specialists active in this area was an important factor in the efficient organisation of the census processes using modern information technologies and in ensuring the reliability and timeliness of data processing.

We express our deep appreciation to the representatives of the Ministry of Digital Technologies **Olimjon Umarov, Dilshod Mirzaev, Anvar Jumaniyazov, Alisher Bobakhanov and Abrorbek Rajabov**, as well as to the representatives of **the State Institution 'Digital Government Project Management Centre'**, **Anvar Mansurov** and **Jasur Shorakhmedov** for their high professionalism, responsibility, dedicated work and promptness, as well as their significant contribution to ensuring the stable operation of the server infrastructure and the uninterrupted functioning of the core digital components under conditions of heavy load. Their efforts were of great importance in ensuring the reliable operation of the information system during the conduct of the census.

We express our deep gratitude to the staff of the Department for Cybersecurity, under the leadership of **Begzod Imamov – Uktamjon Nazirov, Umidjon Esanov, Doston Nurmatov** and **Bekzod Ibragimov** for their responsible work in ensuring information security during the census, protecting data and creating a secure digital environment.

We particularly note the work of the organisations and specialists in the field of digital technologies who made a significant contribution to ensuring information security and the stable functioning of the digital infrastructure and information systems within the framework of the population and agriculture census.

In particular, we greatly value the effective work of the staff of the Digital Government Project Management Centre, under the leadership of **Jasur Shorakhmedov – Khodjiakbarkhon Makhmudov, Zafar Kholmanov, Olimjon Rakhmonov, Muzaffar Rasulov, Asrorbek Khamidov, Kamoljon Ne'matov** and **Asilkhoja Abdusodikov**;

the specialists of the State Institution **“Cybersecurity Centre”** under the leadership of **Olimjon Mirzaev – Sanjar Karimov, Maksim Morozov, Jakhongir Makhmudov, Rukhilla Khidoev, Avazkhon Saydorifkhodjaev, Oybek Zakirdjonov, Shukhratbek Todjimuratov** and **Shakhbozbek Todjaliev**;

the specialists of the joint-stock company **“Uzbektelecom”** – **Khodjiakbar Tulkunov, Ildar Masharipov, Farkhod Mirzaev** and **Khamidjon Davlatov**;

the representatives **UNICON.UZ** – **Nodirkhoja Yadgarov, Akbar Ortikboev, Ilkhomjon Islamov, Bobur Ortikov** and **Diyorbek Toshpulatov** for their contribution to ensuring the confidentiality and security of personal data in the census information system, introducing modern protection mechanisms, safeguarding the server infrastructure and information resources, organising secure communication channels, and ensuring the uninterrupted functioning of the systems.

We particularly note the effective work of the **UNICON-SOFT** team in promptly resolving technical and software issues that arose on the tablet devices during the conduct of the census, ensuring the stable functioning of the information systems, and providing timely practical technical support to the regions.

Thanks to the high professionalism, responsible approach and dedicated work of these specialists, the confidentiality and security of the personal data generated in the course of the census were ensured in accordance with information-security requirements. We express our sincere appreciation for their worthy contribution to the work in this area.

We express our sincere appreciation for the effective work on compiling agricultural statistics indicators and on processing and analysing the data obtained from legal entities during the census, carried out under the leadership of Sobir Khasanov, to the staff of the Department of Agricultural and Environmental Statistics and the members of the data-processing group – **Shovkat Gulomov, Javlan Saipov, Sherali Akhmedov, Dilmurodjon Yangiev, Mavlonberdi Jabborov, Sultonmurod Bektemirov, Abbosbek Boltaev, Shakhzodbek Karimov, Keldiyor Kurbanov, Ravshanbek Mukhammadjonov, Khasan Pirnazarov, Azim A'zamov, Doniyor Kholmatov, Saidakramkhon Khasankhonov, Kamoliddin Abdugafarov and Umid Tashmukhamedov.**

We particularly note the worthy merits of the Head of the Office for the Transformation of the National Statistical System **Ulugbek Noipov** and the Deputy Head of the Office **Jasurbek Abdullaev** in coordinating international cooperation at the stages of preparing and conducting the census and in establishing and ensuring effective engagement with international organisations.

We express our sincere appreciation to the Head of the Methodology Department **Dilshod Zakirov** and the specialist of this Department **Mavlyuda Nishanova** for their significant contribution to ensuring the conformity of the methodological aspects of the census with international statistical recommendations.

We greatly value the merits of the specialists of the Centre for Information, Communications and Media, members of the Working Group on the organisation of information and awareness-raising work, under the leadership of **Usmon Abdurasulov – Kamola Ismoilova, Khalimjon Kholboev, Vakhob Tukhtaev, Umidjon Sayfullaev, Khanifa Sadullaeva and Shakhzod Alijonov**, as well as the specialists of the information services of the territorial statistical departments, for their work in ensuring effective engagement with the mass media and the public during the census activities and in organising and

conducting large-scale awareness-raising and public-information work among the population.

At the same time, we express our sincere appreciation to the representatives of the mass media, who took an active part in conveying to the general public, promptly and to a high standard, the information and awareness-raising materials related to the census processes.

In particular, we express our sincere appreciation to the Deputy Chairman of the National Television and Radio Company of Uzbekistan **Madamin Safarov**, the First Deputy Director-General of the National News Agency of Uzbekistan **Khushnud Khudoyberdiev**, the staff of the press service of the Ministry of Culture **Orifjon Fayziev** and **Sarvinoz Kurbanova**, as well as the Head of the press service of the Ministry of Sport **Nurbek Salomov** for the practical assistance provided and their active participation in the information support of the census.

We express our particular appreciation to **Kiyomkhon Akhmedov** for his significant contribution to editing all the materials and regulatory and legal documents prepared within the framework of the census, as well as for searching archival sources for interesting facts related to the history of census-taking, preparing concise information materials on that basis and disseminating them widely among the public.

We particularly note the work of the working group on the training of people engaged in the conduct of the census, under the leadership of **Zoir Yuldashev** for the effective organisation of the training of the lead trainers of the territorial statistical departments and the temporarily engaged representatives of the 'mahalla seven' on the basis of a programme approved by the National Statistics Committee, as well as for conducting, to a high standard, the sessions aimed at building theoretical knowledge and practical skills.

We express our sincere gratitude to the Director of the Institute for Advanced Training of Personnel and Statistical Research **Shukhrat Shukurov**, the Deputy Director of the Institute for Research, Innovation and International Relations **Abdulaziz Abduvaliev** and the qualified lecturer of the Institute **Makhsuda Akhmedova** for their significant contribution to the effective organisation of the training of the members of the commissions and working groups, as well as of the representatives of the ministries and agencies.

Also deserving of high appreciation is the work carried out by **Akrom Sultanov, Umarjon Obidov, Abdugafir Mirzakhidov, Javokhirbek Jamaldinov, Shakhnoza Ismailova, Elena Khan, Rano Razakova, Gulnora Narbaeva, Khurshid Khushnazarov, Sherali Juraev, Oybek Ochilov, Gulbakhor**

Salikhova, Kobiljon Usanov, Bakhodir Jabborov, Zukhra Mamadjanova, Dilbar Bakhromova, Davron Todjiboev, Zayniddin Egamshukurov, Sanjar Rakhimov, Shermukhammad Abdusalomov, Khamidakhon Akbarova, Akhadjon Sattorov, Alisher Rakhimov, Azamat Juraev, Muslima Mukhamedova, Sardor Meliboev, Bakhodir Gofurov, Makhmuda Yunusova, Javokhir Usmonov, Ikromjon Odiljonov, Zarinakhon Sattorova, Bunyodbek Bakirov, Oybek Izmailov, Rustam Ruzaev, Bakhtiyor Mamadaliev, Ayubkhon Nurillaev, Dilshodjon Ibrokhimov in the effective organisation and conduct of training sessions aimed at building, among the staff of the ministries and agencies, theoretical knowledge and practical skills regarding the procedure for completing the census questionnaires in preparation for the online-census stage.

By the Head of the Financial and Economic Department **Jamshid Shirinov**, the Head of the Accounting Division **Yulchi Khasanov** and the Head of the Internal Audit Service **Oybek Bobojonov** extensive work was carried out on the effective organisation of the financial and economic processes within the framework of the population and agriculture census, the planning of the allocated funds and ensuring their targeted and rational use. In particular, work was organised to a high standard on drawing up the estimate of expenditure related to organising and conducting the census, coordinating the sources of financing, procuring the necessary material and technical resources and ensuring their timely delivery.

We express our gratitude to the specialists of the Call Centre, under the leadership of **Ma'murjon Satimov – Khurshid Usmanov, Nursulu Kaypova, Manzurakhon Tursunova, Sitora Rikhsiboeva, Makhmudjon Mirzajonov, Ne'mat Sulaymanov, Temur Khusinboev, Doniyorbek Jumakuziev** and **Azizkhoja Alikhojaev** for their work in continuously providing prompt consultations and clarifications to the public and to census participants and supplying them with the necessary information during the conduct of the census.

We particularly note the effective work of the specialists of the Division for Technical Support of the Dissemination of Statistical Materials, under the leadership of **Sukhrob Shadimatov – Ruzaliya Butakhina, Olesya Sysoeva, as well as Muzaffar Akhmedov, Mokhira Kasimova, Natalya Shchemleva, Anna Karmanaeva** and **Anna Trofimova**, who ensured the timely preparation, reproduction and delivery to the regions of the methodological and information and awareness-raising materials needed for the conduct of the census.

Deserving of high appreciation is the work of the Head of the Executive Secretariat **Fayzulla Berdibaev**, the head of a division of this Secretariat

Dilmurod Khamdamov, as well as of the staff of the central office assigned to the regions to provide practical assistance, – **Khurshid Iskandarov, Marufjon Toshpulatov, Mukhriddin Abdullaev, Bunyodbek Nishonboev, Farkhod Turaev, Komiljon Gulboev, Abror Nurov, Sardor Begmatov, Jakhongir Mekhmonov, Muzaffar Jomolov, Khondamir Akhmedov, Rakhmatjon Urazbaev, Ulugbek Karimov, Odambov Kalandarov, Ikromjon Rakhimov** and **Oybek Rustamov** for coordinating engagement with the territorial state bodies, ensuring the effective organisation and conduct of census activities on the ground, promptly resolving organisational matters and ensuring the high-quality performance of the tasks assigned.

We particularly note the contribution of the teams of the territorial statistical departments, under the leadership of **Temirbay Ganiev, Nodirbek Tukhtaboev, Ulugbek Jumanazarov, Dilshod Mulladjanov, Kilichbek Nurmatov, Shukhrat Taylakov, Nodirbek Khamraev, Askar Tashnazarov, Sanjarbek Melikhojaev, Sharof Abdiev, Sherzod Kudratov, Bobur Choriev, Ulugbek Elmuratov, Shukhrat Jamoldinov, Shokhrukh Mamadaliev, Asfandiyor Otamuratov** and **Khasan Narziev** to the effective organisation of the census on the ground, the timely and high-quality performance of the tasks set and the successful conduct of the census.

We express our sincere appreciation to the experts of the World Bank **Ambar Narayan, Obert Pimhidzai, Ikuko Uochi, Olivier Dupriez, Malarvizhi Veerappan, Juderica Dias, Sergey Radyakin, Darya Miroshnikova, Shakhnoza Rakhmankulova**, as well as the independent experts **Hakan Demirbüken, Dominik Rozkrut** and **Odil Kurbanov** for the advisory support and recommendations provided during the preparation and conduct of the census. The expert assessments and proposals submitted were of great importance for improving the organisational and methodological aspects of the census activities.

We also express our gratitude to the specialists of the project 'Strengthening the Statistical System of Uzbekistan', implemented with the participation of the World Bank, – **Erkin Ziyaev, Ruslan Begishev and Arslanbek Baybulatov**.

We express our deep gratitude to the team of the United Nations Population Fund (UNFPA) in Uzbekistan, led by the UNFPA Country Representative **Dr. Nigina Abaszade**, including **A'zam Toshpo'latov, Shahnoza Akramova, Matluba Umurzokova**, and **Nazokatxon Fayzullayeva**, for their significant contribution to the preparation and implementation of the Population and Agricultural Census of the Republic of Uzbekistan.

We also extend our sincere appreciation for the expert and advisory support provided in the areas of organizing the census processes, improving the

methodology, and introducing modern approaches to data processing and analysis. We express our appreciation to the experts of the United Nations Population Fund (UNFPA) for the support provided on matters relating to the organisation of census processes, the improvement of methodology and data processing.

Of particular importance were the professional approach and the expert and methodological support of the members of the team of experts of the UNFPA and National Statistical Committee of the Republic of Belarus at the stages of preparing and conducting the population census – **Zhanna Vasilevskaya, Ian White, Irina Bichan, Natalya Tomasheva, Vyacheslav Provolotsky, Anton Muchkovsky, Alexander Ambrokadze** and **Mariana Jalagonia**. The practical assistance they provided in improving the census questionnaires, developing methodological and instructional materials, forming approaches based on international experience, and in matters of data processing and the creation of the census information system contributed to the high-quality organisation of the census activities.

We express our particular appreciation to the leader of the team of experts of the Food and Agriculture Organization of the United Nations (FAO) **Rasmiyya Alieva**, as well as the members of the team **Giorgi Kvinikadze** and **Anthony Burgard** for the methodological, expert and advisory support provided at the stages of preparing and conducting the agriculture census. Their participation contributed to organising the census in accordance with international standards, improving the methodological approaches and preparing practical recommendations.

We express our particular appreciation to the Chairman of the Interstate Statistical Committee of the Commonwealth of Independent States **Konstantin Laykam** and the entire staff of the Committee, including **Irina Zbarskaya** and **Galina Selishcheva**, for the valuable recommendations provided during the preparation and conduct of the population and agriculture census.

We express our deep gratitude to the team of the Mission of the International Organization for Migration (IOM) in Uzbekistan, headed by **Andrew Grey** for the practical assistance provided and the fruitful cooperation in supplying the necessary electronic devices, including laptops, tablets and other technical equipment, to reward citizens who completed the online population and agriculture census, as well as to award the winners of the 'Best Information and Awareness-Raising Material' competition held among representatives of the mass media, journalists and bloggers within the framework of the census.

The support provided by the International Organization for Migration in Uzbekistan made a significant contribution to the effective organisation of the

census with broad public participation, to increasing the activity of the population and to supporting the information campaigns.

Deserving of high appreciation is the work of the head of the Group for Engagement with Ministries and Agencies of the Republican Headquarters for the Organisation and Coordination of the Population and Agriculture Census **Mukhtor Umarov** and a member of the said Group **Farkhod Ganiev**, aimed at ensuring effective engagement with the ministries and agencies, interagency coordination and the prompt resolution of organisational matters at the stages of preparing and conducting the census.

At the same time, it should be noted that the staff of the 'mahalla seven' system made a significant contribution to the effective conduct of the census on the ground. In particular, we note the active participation of the representative of the Association of Mahallas of Uzbekistan **Akbar Juraev**, the representative of the Ministry of Poverty Reduction and Employment **Abduaziz Khafizov**, the representative of the Agency for Youth Affairs **Umid Mirjalolov**, the representative of the Committee for Family and Women's Affairs **Sherzod Anakulov**, the representative of the Tax Committee **Saidkarimkhon Basitkhonov**, as well as the representative of the National Agency for Social Protection **Jakhongir Omonov**, who provided practical assistance in coordinating processes on the ground, promptly resolving issues that arose and working with the public.

Deserving of high appreciation are the practical assistance and responsible approach of the representatives of the ministries and agencies – **Parviz Samadov** from the Ministry of Internal Affairs, **Valijon Dadajonov** from the Ministry of Defence, **Dmitry Medvedskiy** from the National Guard, **Avaz Mukhammedjanov** from the Ministry of Emergency Situations, **Azim Akramov** from the State Security Service, **Maruf Karimov** from the Ministry of Foreign Affairs, **Bakhrom Gulmetov** from the Customs Committee and **Ma'mura Mirakhmedova** from the Ministry of Health, who took part in the work of collecting personal data for certain categories of the population within the framework of the census.

Also deserving of high appreciation are the practical assistance and responsible approach of Javlon Kholov – the representative of the Ministry of Agriculture, **Bakhritdin Ismetdinov** – the representative of the Cadastre Agency, **Shokir Shukurov** – the representative of the Committee for the Development of Veterinary Medicine and Livestock Breeding, as well as **Sanjarbek Umirzakov** – the representative of the Council of Farmers of Uzbekistan, for collecting agricultural data and providing the relevant administrative data during the organisation and conduct of the census.

We particularly note the work of the representative of the Ministry of Higher Education, Science and Innovation **Olim Botirov**, who provided practical assistance in the effective organisation of the completion of the online census by students enrolled in secondary specialised and vocational education institutions, in state, non-state and foreign higher-education organisations and in their branches located within the territory of the Republic.

We also express our particular appreciation to the members of the Republican Commission for the Organisation of the Population and Agriculture Census for their significant contribution to ensuring the active participation of the staff of the subordinate systems in completing the online census via the internet, creating the necessary organisational conditions and supporting the census activities.

In particular, we express our sincere appreciation for the practical assistance and support provided by the representative of the Prosecutor General's Office **Ravshan Nurbekov**, the representative of the Ministry of Justice **Jaloliddin Rakhimaliev**, the representative of the Ministry of Economy and Finance **Makhsud Zokirov**, the representative of the Ministry of Construction and Housing and Communal Services **Diyora Abdullaeva**, the representative of the Ministry of Preschool and School Education **Doniyorbek Boymurzaev**, the representative of the Ministry of Culture **Jaloliddin Ne'matjonov**, the representative of the Ministry of Transport **Rasul Musaev**, the representative of 'Uzbekiston Temir Yo'llari' (Uzbekistan Railways) **Mirzokhid Mirzoakhmedov**, the representative of 'Uzbekistan Airways' **Bobomurod Khayrullaev**, the representative of 'Uzbekistan Airports' **Murod Nosirov**, the representative of the 'Cybersecurity Centre' **Nodira Karabaeva**, the representative of the Association of Mahallas of Uzbekistan **Orifjon Alikulov**, the representative of the Ministry of Digital Technologies **Tursinbek Dustjanov**, the representative of the 'Uzarkhiv' Agency **Khodjiakbar Abdunazarov**, the representatives of the National News Agency of Uzbekistan **Abdulkhakim Mirzaev** and **Temur Kholdorov**, the representative of the National Television and Radio Company of Uzbekistan **Khodjiakhmad Nuriddinov**, as well as to all the ministries and agencies that took part in the census.

Deserving of high appreciation are the work, responsible approach and professionalism of all the partners and specialists who contributed to the comprehensive and effective preparation and conduct of the census. In particular, we consider especially worthy of recognition the representatives of the ministries and agencies, the bodies of state authority and the 'mahalla seven' system, as well as the specialists who took an active part in the processes of data collection and processing and in ensuring their quality.

We also express our particular gratitude to the citizens of the Republic of Uzbekistan and the foreign citizens who actively took part in the census, as well as to the heads and staff of the enterprises and organisations engaged in agricultural activities. Thanks to their openness, responsible attitude and active participation, it became possible to generate comprehensive, reliable and high-quality statistical data. We greatly value the contribution of all the specialists who worked with dedication during the conduct of the census.

We offer our sincere apologies to those colleagues whose names, for editorial reasons, were not included in this publication, and we express our deep appreciation for their contribution to the preparation and conduct of the census.

This participation and support contributed to the generation of reliable statistical information that meets international requirements and reflects the actual situation in the sphere of population and agriculture. These data will serve as an important source of information for the comprehensive analysis of socio-economic processes in the country, for taking effective management decisions on the development of various sectors and for the further improvement of the national statistical system.

**TABLES ON THE PRELIMINARY RESULTS
OF THE POPULATION AND AGRICULTURE
CENSUS OF THE REPUBLIC OF UZBEKISTAN**

NOTES TO THE TABLES

The tables on the preliminary results of the census have been compiled on the basis of the data of the 2026 Population and Agriculture Census of the Republic of Uzbekistan, as at the precise moment of the census – 15 January 2026.

The indicators are presented by administrative-territorial unit, age, sex, urbans and rural areas, and other characteristics provided for.

In interpreting the tables, it should be borne in mind that the data are of a preliminary nature and may be refined once the processing has been completed.

All indicators are presented in aggregated form. The data are published in compliance with the requirements for statistical confidentiality and the protection of respondents' personal data.

TABLES ON POPULATION

POPULATION SIZE AND COMPOSITION

Data are presented on the size and composition of the population based on the preliminary results of the 2026 Population and Agriculture Census of the Republic of Uzbekistan. The tables reflect the distribution of the population by region, sex, and urban and rural areas.

Distribution of the population by sex, by region

AGE COMPOSITION OF THE POPULATION

This section presents preliminary data on the distribution of the population by age group based on the results of the 2026 census. The tables make it possible to assess the age composition of the population, the ratio of the main age groups, and differences in age composition by region, sex, and urban and rural areas.

The indicators presented are used to analyse the demographic burden and to plan needs in education, health, employment, social protection and other areas of state policy.

Distribution of the population by age group and sex, by region

	Total population, people	of which:		Share of total, per cent	
		males	females	males	females

PLACE OF BIRTH

This section presents preliminary data on the distribution of the population by place of birth based on the results of the 2026 census. The tables reflect data on people born in the Republic of Uzbekistan and in other countries, as well as on the distribution of the population by region of birth and current place of residence.

The indicators presented make it possible to assess the territorial characteristics of population formation, internal migration links between regions, and the share of the population born outside the country.
