IV. Metadata

When compiling statistical indicators of wholesale and retail trade turnover, the regulatory legal acts of the Republic of Uzbekistan governing the activities of wholesale and retail trade enterprises and organizations were used, as well as international guidelines and recommendations: "System of National Accounts 2008 (SNA-2008)," "International Recommendations for Distributive Trade Statistics" (UN, 2008), "Methodological Recommendations for Statistical Observation of Retail Trade Turnover and Calculation of its Volume Index" (CIS Statistical Committee, 2011).

Wholesale and retail trade turnover statistics are calculated taking into account the results of statistical assessment of the shadow economy.

In some cases, minor discrepancies between the total and the sum of components are due to rounding of data.
