

Agriculture, Forestry, and Fisheries in Uzbekistan

For January–September 2026

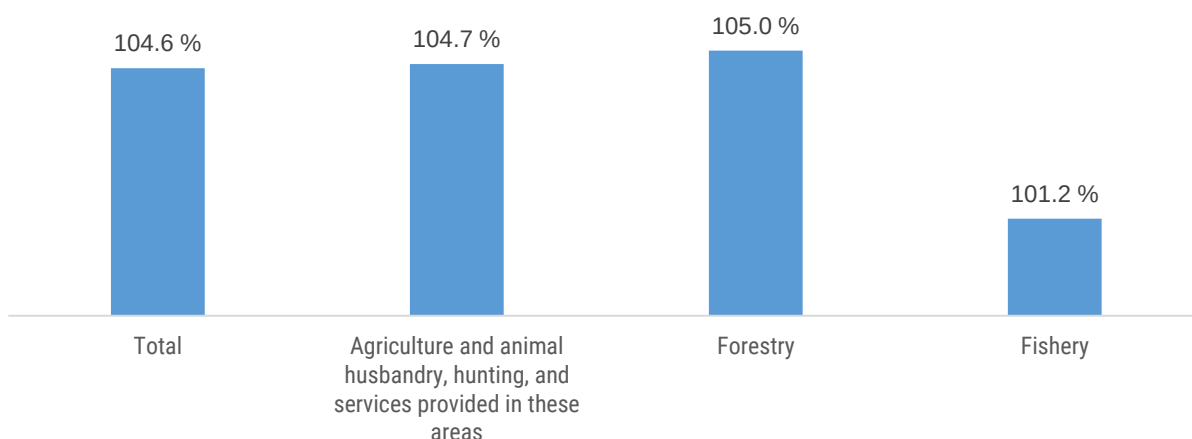

- I. Volume of agricultural, forestry, and fishery products (services)
- II. Volume of agricultural, forestry, and fishery products (services) by region of the republic
- III. Production of agricultural products
- IV. Methodological explanations

I. Volume of agricultural, forestry, and fishery products (services)

In accordance with Presidential Decree of the Republic of Uzbekistan No. PF-173 dated September 19, 2025, "On conducting the population and agricultural census in the Republic of Uzbekistan," the volume of agricultural, forestry, and fishery products (services) was calculated based on the results of the population and agricultural census conducted as of January 15, 2026.

According to preliminary data, the total volume of agricultural, forestry, and fishery products (services) in January–September 2026 amounted to **465 346.7** billion soums. Of this total, the volume of crop and livestock farming, hunting, and related services accounted for **416 344.7** billion soums, forestry for **41 253.3** billion soums, and fisheries for **7 748.7** billion soums.

Growth rate of the volume of agriculture, forestry, and fishery products (services)

II. Volume of agricultural, forestry, and fishery products (services) by region

A regional analysis of the growth rates of agricultural, forestry, and fishery products (services) compared to the corresponding period of 2025 shows high growth in the Syrdarya (**107.8** percent), Namangan (**106.2** percent), Surkhandarya (**105.7** percent), Jizzakh (**105.1** percent), and Kashkadarya (**104.9** percent) regions.

Conversely, lower growth rates compared to other regions were recorded in the Republic of Karakalpakstan (**103.6** percent), as well as in the Andijan (**103.8** percent), Fergana (**103.9** percent), Tashkent (**104.0** percent), and Khorezm (**104.0** percent) regions.

**Volume of agricultural, forestry, and fishery products
(services) by region**

January–September 2026

	Volume, billion UZS	Growth rate, in %
Republic of Uzbekistan	465 346.7	104.6
<i>Regions</i>		
Republic of Karakalpakstan	18 484.6	103.6
Andijan region	39 161.3	103.8
Bukhara region	39 194.9	104.3
Jizzakh region	35 187.9	105.1
Kashkadarya region	46 240.5	104.9
Navoi region	19 651.8	104.3
Namangan region	31 968.8	106.2
Samarkand region	53 287.5	104.3
Surkhandarya region	43 338.8	105.7
Syrdarya region	15 513.0	107.8
Tashkent region	53 789.1	104.0
Fergana region	41 711.5	103.9
Khorezm region	27 817.0	104.0

III. Production of Agricultural Products

The volume of agricultural products produced in January–September 2026 amounted to **410 579.6** billion soums, or **104.6** percent compared to the corresponding period of 2025. Of this total, crop production accounted for **202 958.3** billion soums (**106.9** percent), and livestock production reached **207 621.3** billion soums (**102.1** percent).

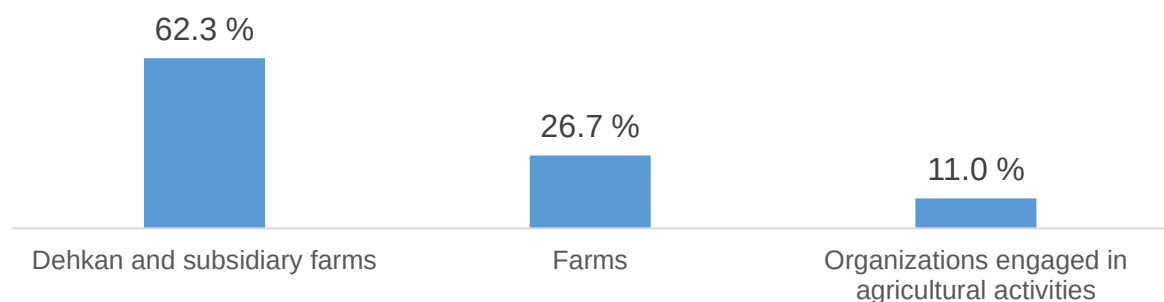

By region, the largest volumes of agricultural output were recorded in Samarkand (**46 632.1** billion soums), Tashkent (**44 598.0** billion soums), Kashkadarya (**42 605.4** billion soums), and Surkhandarya (**40 918.1** billion soums) regions.

Conversely, the lowest volumes were recorded in Syrdarya region (**13 294.7** billion soums), the Republic of Karakalpakstan (**14 225.2** billion soums), and Navoi region (**17 861.5** billion soums).

High growth rates were observed in Syrdarya (**109.0** percent), Namangan (**106.6** percent), and Surkhandarya (**105.6** percent) regions.

In contrast, Samarkand (**103.4** percent) and Tashkent (**103.7** percent) regions, along with the Republic of Karakalpakstan (**103.7** percent), recorded lower growth rates compared to other regions.

Distribution of Agricultural Output by Farm Categories

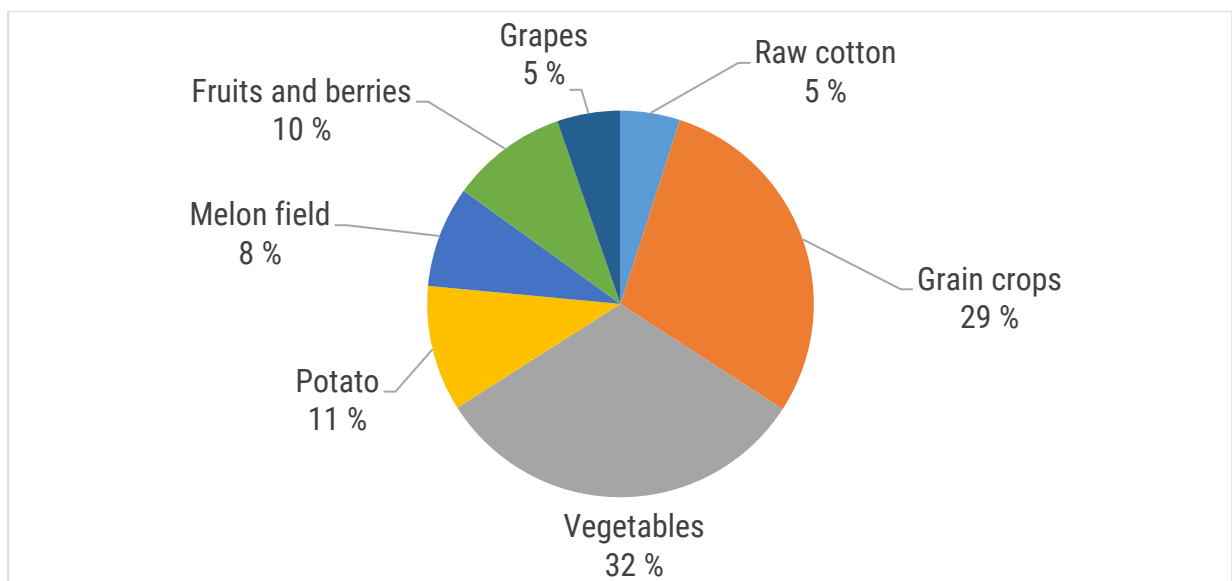

An analysis by farm category shows that **62.3** percent of the total volume of agricultural output is produced by dehkan and household plots, **26.7** percent by private farms, and **11.0** percent by organizations engaged in agricultural activities.

Crop Production

January–September 2026

	Volume, billion soums	Growth rate, in %
Republic of Uzbekistan	202 958.3	106.9
<i>Regions</i>		
Republic of Karakalpakstan	6 835.7	105.7
Andijan region	19 456.4	105.3
Bukhara region	17 528.6	106.5
Jizzakh region	12 561.1	109.8
Kashkadarya region	18 927.1	107.8
Navoi region	6 013.4	109.0
Namangan region	14 944.8	109.2
Samarkand region	22 283.6	105.8
Surkhandarya region	21 096.8	108.7
Syrdarya region	8 570.0	113.5
Tashkent region	22 219.2	104.7
Fergana region	22 342.4	104.4
Khorezm region	10 179.2	106.8

Share of Major Crop Products in Total Agricultural Crop Production

Major Crops Produced,
January–September 2026

	Quantity, thousand metric tons	Growth (decline) rate, in %
Cereal crops	9 896.2	116.3
including:		
private farms	6 989.7	119.5
smallholder and household plot farms	1 396.6	107.8
organizations engaged in agricultural activities	1 509.9	111.1
Potatoes	3 562.9	106.6
including:		
private farms	986.5	120.0
smallholder and household plot farms	2 444.0	102.0
organizations engaged in agricultural activities	132.4	107.4
Vegetables	10 788.6	103.6
including:		
private farms	3 607.0	107.7
smallholder and household plot farms	6 534.6	104.1
organizations engaged in agricultural activities	647.0	81.6
Cucurbit crops (melons and gourds)	2 869.0	104.5
including:		
private farms	1 042.2	99.3
smallholder and household plot farms	1 616.8	107.5
organizations engaged in agricultural activities	210.0	109.3
Fruits and berries	3 308.4	104.1
including:		
private farms	1 328.9	102.8
smallholder and household plot farms	1 770.5	106.1
organizations engaged in agricultural activities	209.0	96.5
Grapes	1 796.3	104.6
including:		
private farms	785.4	111.5
smallholder and household plot farms	928.4	100.5
organizations engaged in agricultural activities	82.5	93.6

For the main agricultural products cultivated in January–September 2026, high growth rates were recorded in grain crops at **116.3%**, raw cotton at **111.8%**, and potatoes at **106.6%**.

Compared to the corresponding period last year, the remaining main product categories reached the following levels: grapes – **104.6%**, melons and gourds – **104.5%**, fruits and berries – **104.1%**, and vegetables – 103.6%.

**Production of Major
Agricultural Crops (thousand tons)**
January–September 2026

	<i>Grain crops</i>	<i>Potatoes</i>	<i>Vegetables</i>
Republic of Uzbekistan	9 896.2	3 562.9	10 788.6
<i>Regions</i>			
Republic of Karakalpakstan	410.3	72.0	312.6
Andijan region	707.5	328.4	1 329.9
Bukhara region	806.4	241.8	866.3
Jizzakh region	977.3	110.9	527.3
Kashkadarya region	1 032.1	258.2	778.2
Navoi region	331.3	146.0	273.2
Namangan region	681.6	344.0	818.5
Samarkand region	973.5	935.0	1 793.7

Production of Livestock Products

In January–September 2026, the total output of livestock products reached **207 621.3** billion soums, or **102.1** percent compared to the corresponding period in 2025.

By region, the highest volumes of livestock production were recorded in the Samarkand (**24 348.4** billion soums), Kashkadarya (**23 678.2** billion soums), Tashkent (**22 378.8** billion soums), Surkhandarya (**19 821.3** billion soums), and Bukhara (**19 355.1** billion soums) regions.

Conversely, the lowest volumes were observed in the Syrdarya region (**4 724.7** billion soums), the Republic of Karakalpakstan (**7 389.4** billion soums), and the Navoi region (**11 848.1** billion soums).

High growth rates were recorded in the Fergana (**103.9** percent), Namangan (**103.7** percent), Tashkent (**102.5** percent), and Surkhandarya (**102.1** percent) regions.

During the period under review, compared to the corresponding period of 2025, the production of meat (in live weight) reached **102.1** percent, raw milk **101.7** percent, eggs **107.5** percent, sheared wool **106.2** percent, karakul pelts **107.2** percent, and fish catch **105.8** percent.

Production of Main Types of Livestock Products and Fish Catch

	Quantity	Growth (decline) rate, in %
Meat (<i>live weight</i>) , thousand tons	1 924.5	102.1
including:		
farms	165.0	103.3
dehkan and household plots	1 508.1	101.9
organizations engaged in agricultural activities	251.4	102.2
Milk, thousand tons	7 377.5	101.7
including:		
farms	685.5	102.7
dehkan and household plots	6 487.8	101.3
organizations engaged in agricultural activities	204.2	109.6
Eggs, million units	7 483.6	107.5
including:		
farms	1 301.0	104.6
dehkan and household plots	3 493.8	104.4
organizations engaged in agricultural activities	2 688.8	113.3
Wool, tons	32 214.2	106.2
including:		
farms	5 153.0	126.5
dehkan and household plots	23 948.5	101.3
organizations engaged in agricultural activities	3 112.7	118.6
Karakul pelts, thousand pieces	938.0	107.2
including:		
farms	160.8	116.2
dehkan and household plots	626.5	101.4
organizations engaged in agricultural activities	150.7	127.1
Fish, thousand tons	270.8	105.8
including:		
farms	66.7	109.2
dehkan and household plots	123.8	104.9
organizations engaged in agricultural activities	80.3	104.4

An analysis of livestock production by farm category for January–September 2026 shows that commercial farms accounted for **8.6%** of total meat production, **78.3%** came from smallholder and household plots, and **13.1%** from agricultural organizations.

Similarly, commercial farms accounted for **9.3%** of total milk **production**, **87.9%** came from smallholder and household plots, and **2.8%** from agricultural organizations.

Meanwhile, **17.4%** of eggs were produced by commercial farms, **46.7%** by smallholder and household plots, and **35.9%** by agricultural organizations.

Additionally, **16.0%** of sheared wool came from commercial farms, **74.3%** from smallholder and household plots, and **9.7%** from agricultural organizations.

Furthermore, **17.1%** of harvested karakul pelts came from commercial farms, **66.8%** from smallholder and household plots, and **16.1%** from agricultural organizations.

Finally, it was recorded that **24.6%** of the fish catch was accounted for by commercial farms, **45.8%** by smallholder and household plots, and **29.6%** by agricultural organizations.

**Main types of livestock
products produced and fish caught in January–September 2026**

IV. Methodological Explanations for Agriculture, Forestry, and Fisheries

Gross output (services) of agriculture, forestry, and fisheries – the total value of products grown in this sector for self-consumption and sale, as well as the total value of services formed on the basis of the value of gross output (services) of crop and livestock production, hunting, forestry and logging, fisheries, and aquaculture.

Volume of agricultural output – a generalizing indicator of the volume of products produced in agriculture, representing the sum of the values of crop and livestock products produced during the reporting period in commercial farms, dehkan farms, and household plots, as well as in organizations engaged in agricultural activities.

Commercial farm – a business entity engaged in the production of agricultural products using leased land plots, as well as other types of activities not prohibited by law.

Dehkan farm – a small-scale farm that grows and sells agricultural products based on the personal labor of its members on a land plot granted to the head of the dehkan farm on the basis of a lifelong inheritable possession right or lease (sublease) (*Law of the Republic of Uzbekistan No. LRU-680 dated April 1, 2021*).

Household plot farming is labor activity related to the cultivation (processing) of agricultural products on personal household land plots, both for the open market and for family needs (*Law of the Republic of Uzbekistan No. ZRU-681, dated April 1, 2021*).

Organizations engaged in agricultural activities – these include large agricultural organizations, micro-firms, and small enterprises incorporated as legal entities that engage in agricultural activities, as well as non-agricultural organizations that maintain subsidiary farms.

Livestock population – includes all age groups across the main types of livestock (cattle, including cows, sheep and goats, pigs, etc.) categorized by farm type.

Meat production – includes the live weight of all types of farm animals and poultry sold for slaughter or slaughtered on the farm.

Milk production – is determined by the actual amount of milk obtained from cows, goats, sheep, mares, and camels, including colostrum used to feed young animals. Milk suckled by calves is excluded from the gross output.

Egg production – includes the number of eggs obtained from all types of poultry, as well as eggs used for hatching chicks via brooding hens or incubators.
