I. Foreign trade turnover

In January-May 2026, the country's foreign trade turnover (FTT) amounted to 32,8 billion US dollars, an increase of 1 157,5 million US dollars, or 3,7%, compared to the same period in 2025.

Of the total FTT volume, exports amounted to 12 638,1 million US dollars (a decrease of 15,5% compared to January-May 2025), while imports reached 20 127,4 million US dollars (an increase of 20,8% compared to January-May 2025). This resulted in a trade deficit of 7 489,3 million US dollars.

At the same time, exports of goods excluding gold amounted to 6 545,7 million US dollars, an increase of 29,4% compared to the same period last year.

* All indicators for previous years presented in the press release were recalculated based on annual customs and statistical data.

Trends in main partner countries in the foreign trade turnover of the Republic of Uzbekistan
January-May, in millions of US dollars

	2024	2025	2026
China	5 059,4	5 376,0	7 650,9

Other	187,4	286,8	188,8	272,0

In January-May 2026, exports of fruits and vegetables amounted to USD 635,8 million. This figure increased by 2,7% compared to the same period in 2025, and its share in total exports was 5,0%.

Share of textile product exports

In January-May 2026, textile exports amounted to USD 1 268,1 million, which accounted for 10,0% of total exports and was an increase of 20,1% compared to the same period in 2025.

In the structure of textile exports, the main share consists of finished textile products (50,8%) and yarn (32,3%).

Export of services
For January-May 2026, million USD

Related indicators:

[Export of services \(by type of service, monthly\)](#)

The volume of service exports for January-May 2026 amounted to 4 588,6 million USD, or 36,3% of total exports, an increase of 34,9% compared to the same period in 2025. The main components of service exports are travel (tourism) (48,9%), transport services (36,2%), telecommunications, computer, and information services (9,6%), and other business services (2,0%).

III. Import indicators

During this period, imports totaled 20 127,4 million USD (an increase of 20,8% compared to January-May 2025). The main share of imports was comprised of machinery and transport equipment (33,1%), manufactured goods (15,3%), and chemicals and related products (12,3%).

An analysis of the dynamics of goods imports showed that in January-May 2026, the volume of goods imports increased by 3 208,7 million USD compared to the same period in 2025, reaching 18 074,0 million USD, while the import of services reached 2 053,4 million US dollars.

The volume of service imports for January-May 2026 amounted to 2 053,4 million US dollars, or 10,2% of total imports, an increase of 14,7% compared to the same period in 2025.

Structure of service imports
for January-May 2026, million US dollars

Related indicators:

[Import of services \(by type of service, monthly\)](#)

Within the structure of service imports, the largest shares are held by travel (tourism) (44,8%), transport services (23,9%), telecommunication, computer, and information services (10,9%), and other business services (10,2%).

IV. Metadata

When compiling statistical indicators on the foreign trade of goods of the Republic of Uzbekistan, the United Nations Standard International Trade Classification (SITC) is used in addition to the Commodity Nomenclature of Foreign Economic Activity (TN VED). The SITC allows for exported and imported goods to be grouped into 10 major sections for analytical purposes. SITC codes are assigned to goods using conversion keys between the TN VED and the SITC.

Foreign trade statistics are compiled based on data on the foreign trade of goods and services. The source data for compiling statistics on the foreign trade of goods are cargo customs declarations from the Customs Committee and statistical observations from the National Statistics Committee on goods transferred from residents to non-residents that do not cross the state border and are not included in a customs declaration. Statistics on foreign trade in services are compiled based on statistical observations.

In some cases, minor discrepancies between the total and the sum of its components are due to data rounding.
