IV. Methodological notes

In compiling Uzbekistan's foreign trade statistics for goods, both the Commodity Nomenclature of Foreign Economic Activity (CN FEA) and the United Nations Standard International Trade Classification (SITC) are used. SITC codes are assigned to goods using conversion keys between the CN FEA and SITC.

Foreign trade statistics are compiled from data on trade in goods and services. Cargo customs declarations of the Customs Committee, together with the National Statistics Committee's statistical surveys covering goods that do not cross the state border or are not included in customs declarations, as well as goods transferred by residents to non-residents, constitute the source data for foreign trade in goods statistics; foreign trade in services statistics are compiled from statistical surveys.

In some cases, minor differences between totals and the sum of their components are due to rounding.
