

## Construction Works in the Republic of Uzbekistan

January-April 2026

- I. Total Volume of Completed Construction Works
- II. Construction Works by Types of Economic Activity
- III. Structure of the Volume of Construction Works by Types of Enterprises
- IV. Metadata and Methodological Notes on Construction Works

### I. Volume of Construction Work Performed: Total

In January–April 2026, the volume of completed construction works in the Republic of Uzbekistan amounted to 84,439.5 billion soums, which is 14.1% higher compared to the corresponding period of 2025.

#### Volume and Growth Rates of Completed Construction Works

#### Construction Works Performed by Region

	Volume, bln soums	% of corresponding period 2025
<b>Republic of Uzbekistan<sup>1</sup></b>	<b>84 439,5</b>	<b>114,1</b>
Republic of Karakalpakstan	4 448,8	159,9
regions:		
Andijan	4 494,6	117,3
Bukhara	5 865,5	125,6
Jizzakh	2 430,8	113,8
Kashkadarya	5 031,5	115,1
Navoiy	4 083,3	119,9
Namangan	4 353,2	116,6
Samarkand	5 153,9	112,7
Surkhandarya	4 258,8	115,8
Syrdarya	1 662,4	114,7
Tashkent	8 605,3	108,3
Fergana	5 727,5	118,2
Khorezm	4 575,9	131,8
Tashkent city	22 112,2	111,8

#### IV. Metadata and Methodological Notes

Construction works are the result of construction activities comprising a set of works performed during the construction, reconstruction, expansion, capital and current repair of buildings and structures. The value of construction works includes the preparation and planning of construction sites, water supply, heat supply, sewerage systems, foundation works, wall erection, sanitary and technical installation works of building structures, as well as other contract works (commissioning works, excavation of soil layers, technical and landscaping works, etc.). Statistical accounting of construction works is carried out based on the actual volume completed during the reporting period, regardless of the time of payment, at the actual prices of the reporting period, excluding value added tax (VAT).

The compilation of statistical information on the volume of construction works is based on:

- a) statistical reports (monthly and annual) submitted by legal entities engaged in construction activities;
- b) the results of quarterly sample surveys of the activities of small enterprises and microfirms;
- c) statistical reports of the territorial departments of the Chamber of State Cadastres, which monitor the construction of individual residential housing and non-residential facilities by individuals;
- d) data from sample statistical surveys of commissioned individual residential houses;
- e) statistical estimates of the volume of repairs of individual residential houses carried out by the household method.
