

Construction in the Republic of Uzbekistan

for January-August 2026

- I. Volume of completed construction work - total
- II. Construction works by type of economic activity
- III. Distribution of construction work volumes by type of enterprise
- IV. Methodological explanations and metadata for construction works

I. Volume of completed construction work - total

In January-August 2026, the volume of construction work performed in Uzbekistan amounted to 259 405.4 billion soums. Compared to January-August 2025, the growth rate was 111.8%.

Figure 1. Volume and growth rates of completed construction work

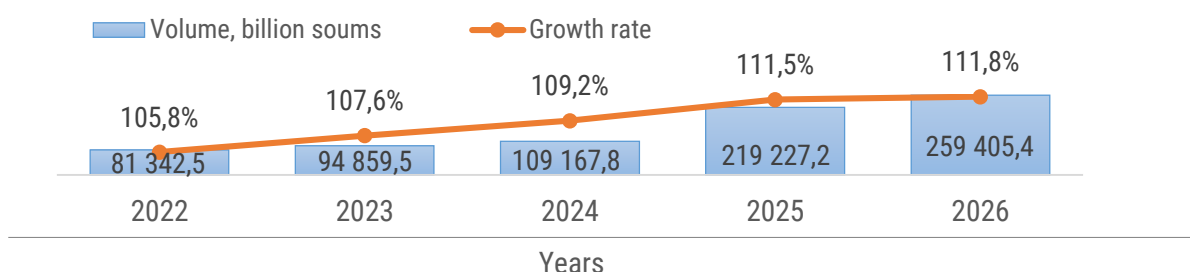

Table 1. Construction work performed by region, January-August 2026

	Volume, billion soums	Growth rate, as a percentage of the corresponding period of 2025
Republic of Uzbekistan	259 405.4	111.8
Republic of Karakalpakstan	8 852.1	140.8
<i>regions:</i>		
Andijan	12 276.5	120.7
Bukhara	14 677.9	116.7
Jizzakh	6 175.2	119.0
Kashkadarya	12 792.3	115.1
Navoi	10 976.1	122.9
Namangan	11 715.2	117.6
Samarkand	12 593.0	135.5
Surkhandarya	10 744.0	120.9
Syrdarya	5 344.1	123.7
Tashkent	24 123.0	113.8
Fergana	15 423.7	116.5
Khorezm	11 751.1	128.1
Tashkent city	88 663.8	107.4

Thematic metrics:

[Volume of construction work \(monthly\)](#)

[Volume of construction work \(annual\)](#)

II. Construction works by type of economic activity

In January-August 2026, construction work in Uzbekistan by type of economic activity was distributed as follows:

- the share of construction of buildings and structures in the total volume of construction work amounted to 66.7% and the growth rate compared to January-August 2025 was 103.5%.
- the share of civil engineering construction compared to January-August 2025 was 21.4% and the growth rate was 131.6%.
- the share of specialized construction work was 11.9%, which is 136.0% compared to January-August 2025.

Figure 2. Construction works by type of economic activity, January-August 2026

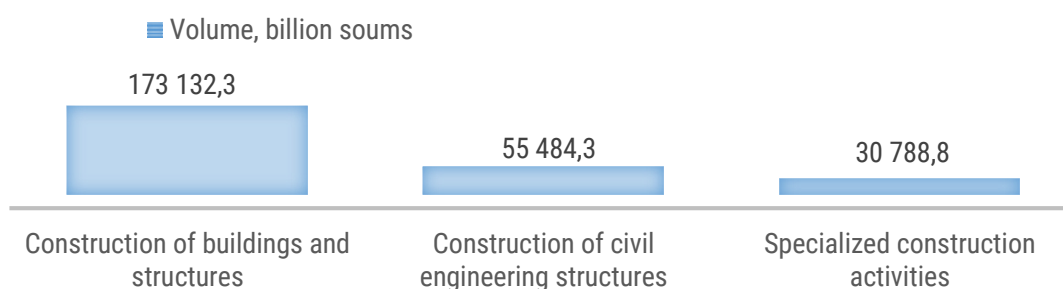

Table 2. Volume and growth rates of construction work by type of economic activity for January-August 2026

	Construction of buildings and structures	Civil engineering construction	Specialized construction works
Volume of large construction organizations, billion soums	40 803.8	18 061.8	7 806.7
<i>growth rate, in %</i>	107.0	143.2	145.6
Volume of small enterprises and micro-firms, billion soums	81 814.2	37 410.5	22 982.1
<i>growth rate, in %</i>	100.3	126.6	133.1
Volume of the informal sector, billion soums	50 514.3	12.0	-
<i>growth rate, in %</i>	106.2	4.8t	-

Thematic metrics:

[Volume of construction of buildings and structures \(monthly\)](#)

[Volume of construction of buildings and structures \(annual\)](#)

[Volume of construction of civil facilities \(monthly\)](#)

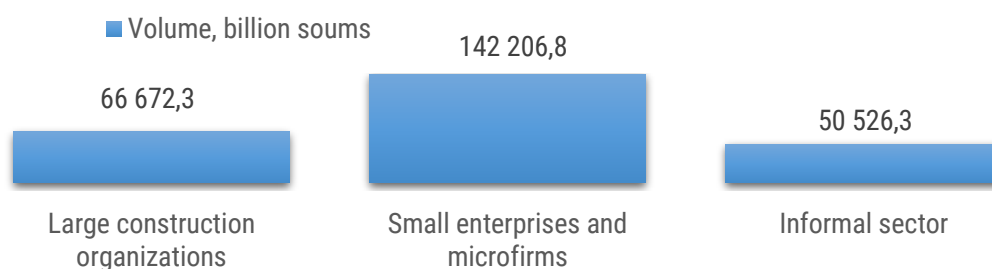

[Volume of construction of civil facilities \(annual\)](#)

[Volume of specialized construction work \(monthly\)](#)

[Volume of specialized construction work \(annual\)](#)

III. Distribution of construction work volumes by type of enterprise

Figure 3. Volume of construction work by type of enterprise, January-August 2026

In January-July 2026, the volume of construction work performed by large construction organizations in current prices amounted to 66 672.3 billion soums. Their share in the total volume was 25.7% and the growth rate compared to January-August 2025 was 118.8%.

Small enterprises and micro-firms accounted for 54.8% of the total volume of construction work. The volume of work performed by them at current prices amounted to 142 206.8 billion soums, the growth rate compared to January-August 2025 reached 110.9%.

The informal sector accounted for 19.5% of the total volume of construction work. The volume of current prices amounted to 50 526.3 billion soums and the growth rate compared to January-August 2025 was 106.2%.

Figure 4. Volume and growth rates of construction work by type of enterprise, January-August 2026

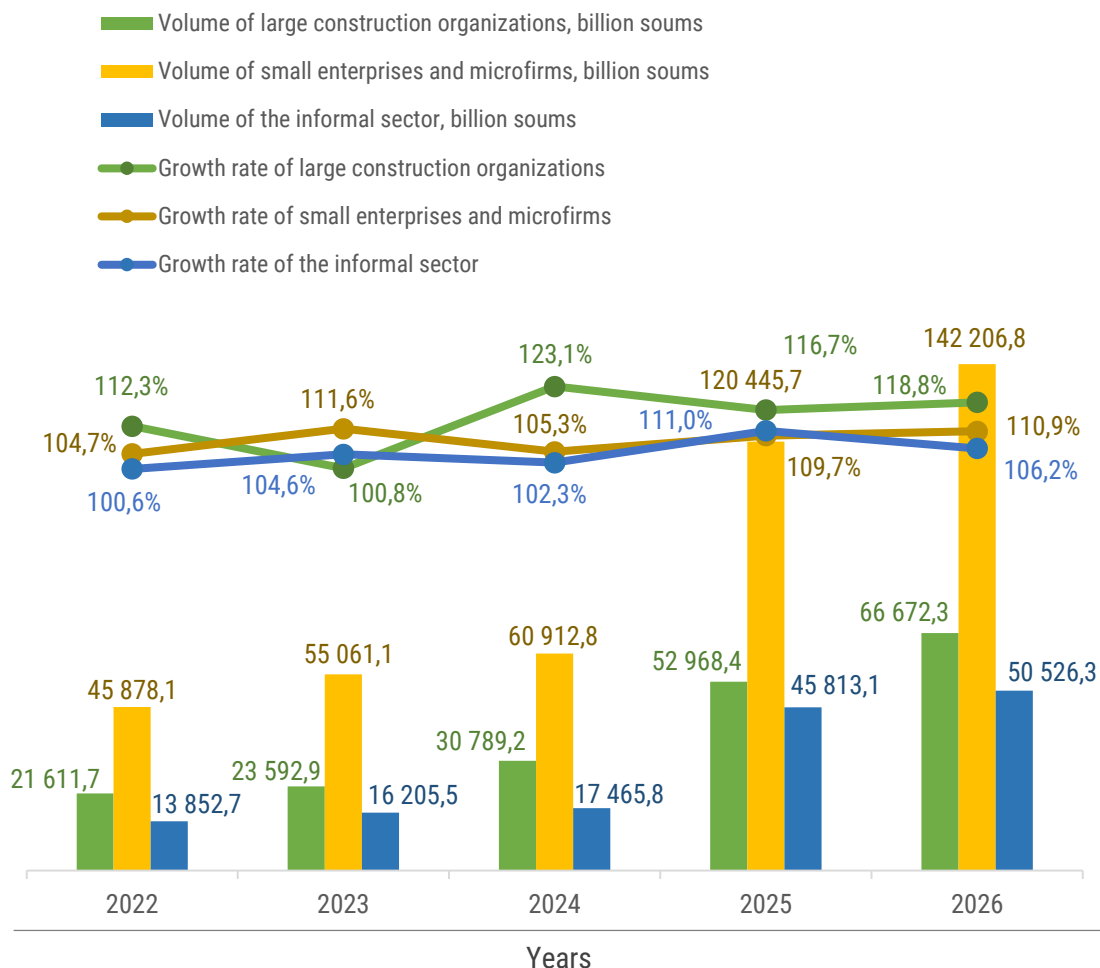

Table 3. Volume of construction work by type of enterprise and region, January-August 2026

	Volume. billion soums			Growth rate. as a percentage of the corresponding period of 2025		
	Large construction organizations	Small enterprises and microfirms	Informal sector	Large construction organizations	Small enterprises and microfirms	Informal sector
Republic of Uzbekistan²	66 672.3	142 206.8	50 526.3	118.8	110.9	106.2
Republic of Karakalpakstan	2 896.6	3 722.0	2 233.5	5.1t	105.5	101.9

Tashkent city	21 612.2	60 385.0	6 666.6	109.1	107.6	100.9

² Including volume not distributed by region

The largest volume of construction work performed by large construction organizations was noted in the city of Tashkent (21.6 trillion soums), Tashkent region (5.2 trillion soums) and Kashkadarya region (3.6 trillion soums).

Figure 5. Share of construction work by form of ownership, January-August 2026

IV. Methodological explanations and metadata for construction works

Construction works are the result of construction production, which is a set of works performed during the construction, reconstruction, expansion, major and current repair of buildings and structures.

The cost of construction works includes the preparation and drafting of work plans for the development of construction sites, water supply, heat supply, sewerage, foundation laying, wall lifting, sanitary and technical works for the installation of building structures and other contract work (launching and adjustment, excavation, cultural and technical works, etc.).

Statistical accounting of construction work is maintained in the volume actually performed during the reporting period, regardless of the time of payment, at current prices of the reporting period, excluding VAT.

Formation of statistical information on the volume of construction work:

- a) statistical reports of legal entities engaged in construction activities (monthly, annual);
- b) results of quarterly sample surveys of the activities of small enterprises and micro-firms;
- d) statistical reports of the territorial departments of the Chamber of State Cadastres of the Republic of Uzbekistan engaged in monitoring the construction of individual housing and non-residential facilities by individuals;
- e) data from a sample statistical survey of individual housing commissioned;
- f) on the basis of a statistical assessment of the volume of repair of individual housing using the self-financing method.
