

Construction in the Republic of Uzbekistan (for January-September 2026)

- I. Volume of completed construction work
- II. Construction works by type of economic activity
- III. Distribution of construction work volumes by type of enterprise
- IV. Methodological explanations and metadata for construction works

I. Volume of completed construction work

In accordance with Decree of the President of the Republic of Uzbekistan No. PF-173 of 19 September, 2025, "On Conducting the Population and Agricultural Census in the Republic of Uzbekistan," the volume of construction work was calculated based on the results of the population and agricultural census conducted as of 15 January 2026.

In January-September 2026, the volume of construction work performed in Uzbekistan amounted to 339 328.2 billion soums. Compared to January-September 2025, the growth rate was 112.3%.

Volume and growth rates of completed construction work

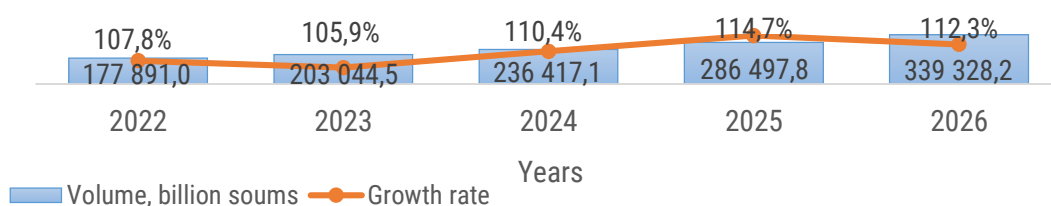

Table 1. Construction work performed by region (January-September 2026)

Regions	Volume, billion soums	Growth rate, as a percentage of the corresponding period of 2025
Republic of Uzbekistan¹	339 328.2	112.3
Republic of Karakalpakstan	10 881.1	128.9
Andijan region	17 170.9	118.8
Bukhara region	16 451.1	120.5
Jizzakh region	8 985.2	132.2
Kashkadarya region	19 651.7	113.3
Navoi region	13 689.6	119.8
Namangan region	16 387.6	121.1
Samarkand region	16 345.5	128.7
Surkhandarya region	13 750.4	120.3
Syrdarya region	6 379.1	113.9
Tashkent region	33 414.5	119.8
Fergana region	23 360.3	126.9
Khorezm region	13 597.5	128.6
Tashkent city	103 245.1	113.0

Thematic metrics:

[Volume of construction work \(monthly\)](#)
[Volume of construction work \(annual\)](#)

¹ Including volume not distributed by region

II. Construction works by type of economic activity

In January-September 2026, construction work in Uzbekistan by type of economic activity was distributed as follows:

- the share of construction of buildings and structures in the total volume of construction work amounted to 71.1% and the growth rate compared to January-September 2025 was 106.3%;
- the share of civil engineering construction compared to January-September 2025 was 18.8% and the growth rate was 129.3%;
- the share of specialized construction work was 10.1%, which is 133.0% compared to January-September 2025.

Construction works by type of economic activity (January-September 2026)

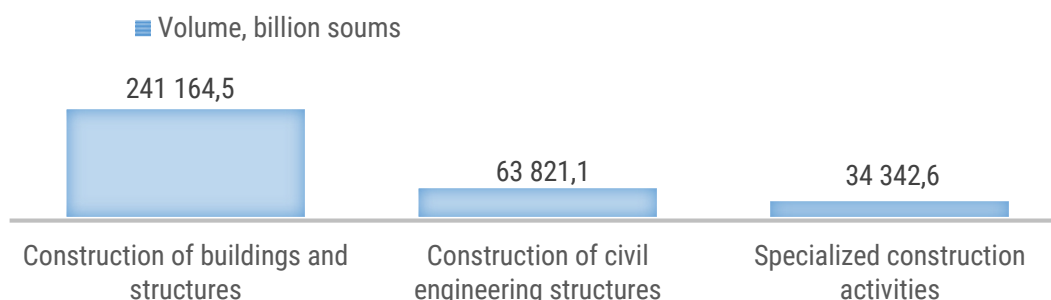

Table 2. Volume and growth rates of construction work by type of economic activity (January-September 2026)

	Construction of buildings and structures	Civil engineering construction	Specialized construction works
Volume of large construction organizations, billion soums	59 323.7	21 805.9	8 413.1
growth rate, in %	92.3	146.7	130.1
Volume of small enterprises and micro-firms, billion soums	103 767.6	41 972.7	25 929.5
growth rate, in %	111.8	121.7	134.0
Volume of the informal sector, billion soums	78 073.2	42.5	-
growth rate, in %	111.7	2.8t	-

Thematic metrics:

[Volume of construction of buildings and structures \(monthly\)](#)

[Volume of construction of buildings and structures \(annual\)](#)

[Volume of construction of civil facilities \(monthly\)](#)

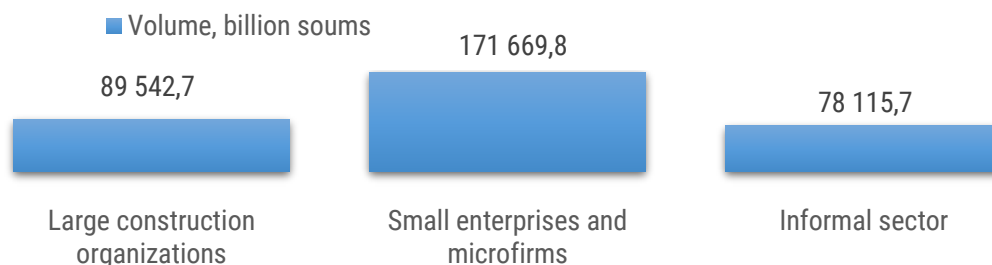

[Volume of construction of civil facilities \(annual\)](#)

[Volume of specialized construction work \(monthly\)](#)

[Volume of specialized construction work \(annual\)](#)

III. Distribution of construction work volumes by type of enterprise

Volume of construction work by type of enterprise (January-September 2026)

In January-September 2026, the volume of construction work performed by large construction organizations in current prices amounted to 89 542.7 billion soums. Their share in the total volume was 26.4% and the growth rate compared to January-September 2025 was 104.6%.

Small enterprises and micro-firms accounted for 50.6% of the total volume of construction work. The volume of work performed by them at current prices amounted to 171 669.8 billion soums, the growth rate compared to January-September 2025 reached 117.1%.

The informal sector accounted for 23.0% of the total volume of construction work. The volume of current prices amounted to 78 115.7 billion soums and the growth rate compared to January-September 2025 was 111.7%.

Volume and growth rates of construction work by type of enterprise (January-September 2026)

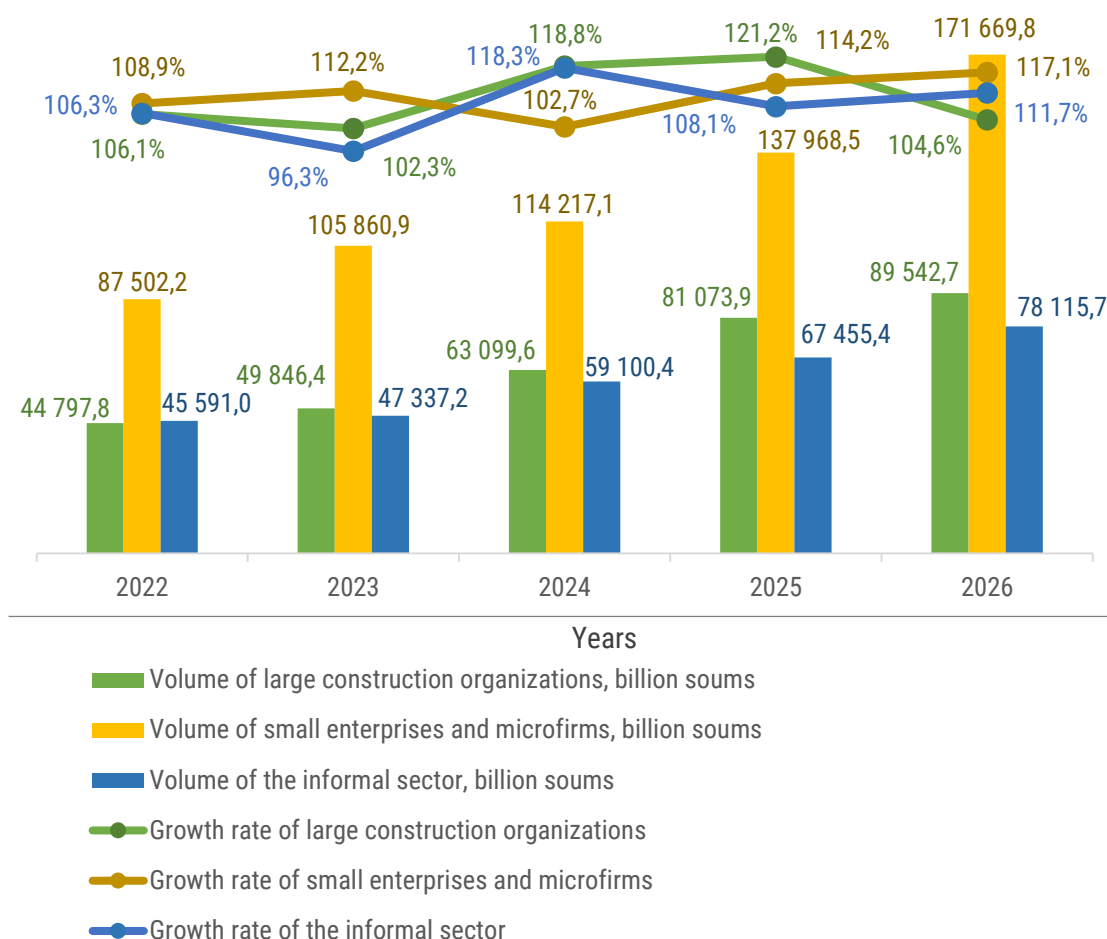

Table 3. Volume of construction work by type of enterprise and region
(January-September 2026)

Regions	Volume, billion soums			Growth rate, as a percentage of the corresponding period of 2025		
	Large construction organizations	Small enterprises and microfirms	Informal sector	Large construction organizations	Small enterprises and microfirms	Informal sector
Republic of Uzbekistan²	89 542.7	171 669.8	78 115.7	104.6	117.1	111.7
Republic Karakalpakstan	3 030.6	4 543.6	3 306.9	3t	114.7	95.7
Andijan region	1 609.6	8 742.6	6 818.7	192.2	113.4	115.5
Bukhara region	3 400.8	8 551.7	4 498.6	189.5	114.7	102.3
Jizzakh region	1 289.9	4 544.0	3 151.3	165.8	119.4	142.6
Kashkadarya region	4 272.8	7 223.4	8 155.5	117.0	122.5	104.5
Navoi region	4 626.8	5 342.4	3 720.4	138.2	116.4	106.7
Namangan region	1 776.0	6 681.9	7 929.7	2t	115.5	115.3
Samarkand region	3 729.6	9 521.7	3 094.2	2.4t	124.1	89.3
Surkhandarya region	1 765.8	6 769.5	5 215.1	157.6	120.4	111.2
Syrdarya region	1 035.5	4 287.3	1 056.3	134.4	112.0	105.2
Tashkent region	6 607.7	16 403.4	10 403.4	157.9	116.2	108.6
Fergana region	3 002.2	11 918.2	8 439.9	131.7	124.4	128.8
Khorezm region	2 509.8	5 430.2	5 657.5	2.5t	115.7	116.3
Tashkent city	24 867.0	71 709.9	6 668.2	104.3	115.7	119.5

The largest volume of construction work performed by large construction organizations was noted in the city of Tashkent (24.9 trillion soums), Tashkent region (6.6 trillion soums) and Navoi region (4.6 trillion soums).

Share of construction work by form of ownership (January-September 2026)

² Including volume not distributed by region

IV. Methodological explanations and metadata for construction works

Construction works are the result of construction production, which is a set of works performed during the construction, reconstruction, expansion, major and current repair of buildings and structures.

The cost of construction works includes the preparation and drafting of work plans for the development of construction sites, water supply, heat supply, sewerage, foundation laying, wall lifting, sanitary and technical works for the installation of building structures and other contract work (launching and adjustment, excavation, cultural and technical works, etc.).

Statistical accounting of construction work is maintained in the volume actually performed during the reporting period, regardless of the time of payment, at current prices of the reporting period, excluding VAT.

Formation of statistical information on the volume of construction work:

- a) statistical reports of legal entities engaged in construction activities (monthly, annual);
- b) results of quarterly sample surveys of the activities of small enterprises and micro-firms;
- d) statistical reports of the territorial departments of the Chamber of State Cadastres of the Republic of Uzbekistan engaged in monitoring the construction of individual housing and non-residential facilities by individuals;
- e) data from a sample statistical survey of individual housing commissioned;
- f) on the basis of a statistical assessment of the volume of repair of individual housing using the self-financing method.
