Their growth was influenced by the increase in the volume of services for the provision of food and beverages, the share of which in the total volume of accommodation and food services was **95.8%**.

For January-August 2025, the volume of transport services was equal to **113 507.6** billion soums, the growth rate, compared to the same period in 2024, was **112.0%**. Their share in the total volume of market services rendered reached **18.1%**.

Structure of the volume of transport services by types of transport

In the structure of transport services, automobile transport services prevailed – **50.7%**. The share of air transport services was **15.7%**, and the volume of auxiliary transport activities was recorded at **12.6%** of the total volume of transport services. The share of pipeline transport services was noted at **12.3%**. In turn, the share of services provided by rail transport in the total volume of transport services reached **8.7%**.

Compared with January-August 2024, the volume of trade services for January-August 2025 increased by **16 832.4** billion soums and reached **108 396.8** billion soums.

Structure of the volume of trade services

In the total volume of trade services, the share of retail trade services was predominant – **53.3%**. The share of wholesale trade services reached **31.6%**. Wholesale and retail trade services of cars and motorcycles, including their repair services, in the total volume of trade services amounted to **15.1%**.

During the period under review, the volume of communication and information services reached **48 224.1** billion soums. In their total volume, computer programming services account for

the largest share. In January-August 2025, the share of this type of service in the total volume of communication and information services was **40.5%**. Compared with January-August 2024, their growth rate was noted at **126.5%**.

Volume of communication and information services by type, *billion soums*

In January-August 2025, the volume of services in the field of education reached **22 794.5** billion soums. In the total volume of services in the field of education, services in the field of higher education prevailed - their share amounted to **44.7%**.

In the total volume of services related to real estate (**16 612.4** billion soums), the share of services for leasing (renting) and managing own or leased real estate is recorded at **95.8%**.

During the period under review in 2025, the volume of services in the healthcare sector reached **12 740.9** billion soums. Of the total volume of services in this area, other healthcare services accounted for **53.0%**, hospital services – **30.8%**, and services in the field of medical practice and dentistry – **16.2%**.

A significant share in the total volume of provided market rental and hire services belonged to services for the rental of passenger cars and light commercial vehicles – **49.6%**.

IV. Explanations of statistical indicators of the service sector

The press release presents data taking into account the results of statistical surveys conducted to assess the informal and shadow economy.

The monthly volume of services is formed on the basis of:

a) statistical reporting on commercial organizations (except for small businesses, micro-firms and agricultural producers), separate divisions of legal entities that are commercial organizations, and non-profit organizations (according to the list);

b) assessment of the volume of services rendered by small business entities based on quarterly surveys, as well as based on the results of unified annual reporting for small businesses and micro-firms;

c) assessment of the volume of services rendered by farms, non-profit organizations based on the relevant forms of statistical reporting;

d) assessment of the volume of services rendered by individual entrepreneurs and self-employed persons, which is carried out based on the results of a sample survey conducted quarterly.

The volume of provided market services represents the cost of market services on a certain date for services provided to consumers (legal entities and individuals, including non-residents), provided by all service providers (legal entities and individuals) as specializing in the provision of services and for whom the provision of services is not the main type of activity.

The volume of provided market services by type of economic activity includes accrued payments for services provided at the actual market prices of sales **without VAT** and **excise taxes**.

The output of services is considered marketable when services are the object of purchase and sale and are sold at economically significant prices (fully or largely covering the costs of the service provider). Payment for services by consumers can be made in cash, including payment by plastic cards and by transfer, including electronic payments and electronic money.

Services rendered to non-residents (if they are not paid for in sums) are determined at contract prices, recalculated at the sum exchange rate set by the Central Bank of the Republic of Uzbekistan on the date of payment for services.

The volume of rendered market services is formed for all types of economic activity classified according to the Statistical Classifier of Products (Goods, Works, Services) of the Republic of Uzbekistan (SCP) in the part concerning services from section G to S.
