VI. Methodological Notes and Metadata on Demographic Indicators

For the purpose of compiling **demographic indicators**, the National Statistics Committee of the Republic of Uzbekistan, the Ministry of Justice, and the Ministry of Internal Affairs of the Republic of Uzbekistan have integrated the primary databases of these organizations through electronic data exchange.

Since all necessary data for compiling demographic indicators are obtained electronically through integration, no separate statistical observation form has been approved.

For the purpose of generating data characterizing demographic indicators, the statistical authorities process primary data on vital events and population migration obtained from other government agencies (the Ministry of Justice and the Ministry of Internal Affairs of the Republic of Uzbekistan).

Demographic statistics are compiled based on the following data:

- birth certificate records;
- death certificate records;
- marriage certificate records;
- divorce certificate records;
- statistical registration slips for arrival forms;
