V. On average monthly nominal accrued wages methodological explanations and metadata.

Information on average monthly wages in Uzbekistan is formed by enterprises and organizations in electronic form, based on statistical reporting data submitted online excluding small enterprises, micro-firms and agricultural enterprises.

Data on average monthly wages for all enterprises and organizations of the republic, including small enterprises, micro-firms, and farms, are generated and published once a year.

For reference: *In accordance with the Decree of the President of the Republic of Uzbekistan No. UP-4609 dated April 7, 2014, it is established that small business entities and farms submit statistical reports to the statistical authorities once a year.*

Nominal accrued wages - consist of income accrued to an individual in monetary form by employers in the form of labor remuneration for an employee, including taxes and other payments, based on current legislation, in exchange for products (work performed or services rendered) produced by the employee during a specific period (hour, month, year).

Nominal accrued wages **for the reporting month** are calculated as follows:

$$W_n = \frac{F}{L}$$

here:

W_n - nominal accrued salary;

F - income in the form of labor remuneration accrued to individuals for the reporting month;

L - average number of employees for the reporting month;

The calculation of the nominal calculated average monthly wage is carried out in accordance with the "Methodological Provisions for Assessing the Amount of Wages in the Economy," approved by Resolution No. 8 of the National Statistics Committee dated May 30, 2025.

Information published by sections and sections of the Classifier of Types of Economic Activity (OCI-2) does not imply the availability of information for all types of economic activity included in a specific section or section.
