## EXPORT OF TEXTILE PRODUCTS

In recent years, the light industry has seen the development of high value-added production. Being an economically important sector for Uzbekistan, the light industry provides a high level of employment and also contributes to the industrial potential and international authority of our country.

The increase in textile exports can be seen as a result of reforms carried out to produce finished goods instead of raw cotton and create added value.

According to the results of January 2025, textile exports amounted to 198.5 million US dollars, which amounted to 15.2 % of the total volume and, compared to the same period in 2024, it decreased by 20.8 %.

In the structure of textile exports, the main share is also occupied by finished textile products: yarn (44.6 %) and finished textile products (35.7 %).

## EXPORT OF TEXTILE PRODUCTS for January 2025, share, %, million US dollars

As a result of the widespread use of new production technologies and modern equipment in the country, as well as the introduction of a quality management system, labor productivity is increasing, which, in turn, allows finished products to find their place in world markets.
