### **Pruning for forest care, forest fires and land of the forest land Fund**

#### 0. PREREQUISITES

##### 0.1 Legal environment

##### 0.1.1 Responsibility for collecting, processing, and disseminating statistics

The state forestry Committee of the Republic of Uzbekistan operates in accordance with The law "on forests" and the Decree of the Cabinet of Ministers of the Republic of Uzbekistan "on measures for further improvement of the forest management system" dated July 19, 2017 No. 530.

##### 0.1.2 Data sharing and coordination among data producing agencies

Statistical data prepared by the Committee of forestry of the Republic of Karakalpakstan and territorial administrations of forestry are submitted to the Ministry in electronic and printed form.

##### 0.1.4 Providing statistical reporting

Statistics are prepared in the first decade of the year (until March 15).

#### 0.2 Resources

##### 0.2.1 Staff, facilities, computing resources, and financing (Encouraged)

In the Central office of information generation about pruning to care for the forest is 4 employees in the Department of forest protection, forest fire – 2 employees in Department of fire safety and emergencies of forestry, on forest land Fund - 4 employees in the Management of the state forest cadastre and reclamation and in the regional offices – 1 engineer on forest protection and 1 specialist on forest inventory.

There is a sufficient number of employees to monitor forest protection activities. In territorial administrations, not all forest protection engineers have higher education.

The practical and theoretical skills of employees are improved once a year in accordance with the annual schedule.

The Department has a sufficient number of computers, each employee works on a personal computer connected to a local network, regularly updated software.

Felling for health, educational and rehabilitation purposes, as well as measures to prevent forest fires, is carried out in accordance with articles 24 and 29 Of the law “on forests” of April 16, 2018 No. 475 and Resolution of the Cabinet of Ministers of the Republic of Uzbekistan of November 22, 1999 No. 506, as well as on the basis of the Land Code.

#### INTEGRITY

##### 1.1 Professionalism

##### 1.1.1 Impartiality of statistics

Statistical information is generated based on the work performed in accordance with the annual plan, information about forest fires and changes in land categories.

##### 1.1.2 Selection of sources, methodology, and modes of dissemination

Statistical data generated by the forestry Committee of the Republic of Karakalpakstan and

12 regional forestry departments are the main source of the Committee.

### [1.1.3 Commenting on erroneous interpretation and misuse of statistics](#)

Not available

## [1.2 Transparency](#)

### [1.2.1 Disclosure of terms and conditions for statistical collection, processing, and dissemination](#)

Based on the data collected by all forestry enterprises, statistical data on the forest are generated.

### [1.2.2 Internal governmental access to statistics prior to release](#)

Statistical information is regularly provided to the Government.

### [1.2.3 Attribution of statistical products](#)

Statistics are based on tables developed by the Committee.

### [1.2.4 Advance notice of major changes in methodology, source data, and statistical techniques.](#)

If changes are made to the statistics, all forestry units are notified by notification.

## [1.3. Moral standards](#)

### [1.3.1 Guide to the behavior of the staff](#)

The Committee's employees conduct their activities in accordance with internal procedures.

## [2. METHODOLOGY](#)

### [2.1 Concepts and definitions](#)

#### [2.1.1 Concepts and definitions \(Required\)](#)

Information about pruning for forest care, forest fires and forest land Fund lands is provided by the territorial offices to the state Committee for Forest management at the end of each quarter, where the data is analyzed.

For the purpose of departmental control and data collection, reports on the results of each quarter are submitted by the territorial departments to the Committee.

Felling of trees is carried out after the biological age or infection with diseases in cubic meters, forest fires are calculated

the number of trees on land covered with forests, if the fire occurred in an open area, in relation to the hectare.

The Department of forest protection of the state forest Committee monitors the lands allocated in the Forest Fund of the Republic for logging, and forest fires.

Protection and protection of forests is carried out by territorial administrations and foresters of the state forestry.

The Committee is provided with full information about the felled trees on Forest lands and forest fires.

## 2.2 Scope

### 2.2.1 Scope (Required)

#### 2.2.1.1 Scope of the data

Geographical coverage includes the Committee of forestry of the Republic of Karakalpakstan, 9 territorial forestry departments, national natural parks, forest hunting farms and state forestry.

Felling is carried out for the purposes of: restoration; recovery; care

#### 2.2.1.2 Exceptions to coverage

Shadow economy

## 2.3 Classification/sectorization

### 2.3.1 Classification/sectorization (Required as relevant to data category)

No

## 2.4 Basis for recording

### 2.4.1 Valuation (Required as relevant to data category)

Information about logging and forest fires is summarized in the whole country for further analysis.

### 2.4.2 Recording basis (Required as relevant to data category)

Information about tree felling and forest fires on Forest lands is provided every quarter by the Committee of forestry of the Republic of Karakalpakstan and territorial offices in the state Committee for Forestry. Based on the received data, information is generated for the Republic.

### 2.4.3 Procedures for calculating gross / net indicators (recommended category)

## 3. ACCURACY AND RELIABILITY

### 3.1 Source data

#### 3.1.1 Source data collection programs (Required)

Information about tree felling and forest fires on Forest lands is provided every quarter by the Committee of forestry of the Republic of Karakalpakstan and territorial administrations in the state Committee of Forestry, and is formed once a year.

#### 3.1.2 Source data definitions, scope, sectorization, classifications, valuation, and time of recording (Encouraged)

Information about tree felling and forest fires on Forest lands is provided every quarter by the Committee of forestry of the Republic of Karakalpakstan and territorial offices in the state Committee for Forestry.

#### 3.1.3 Source data timeliness (Encouraged)

The preparation of information is carried out strictly within a certain time frame.

Data is updated once a year, in a quarter no later than the 20th day of the reporting period.

## 3.2 Assessment of source data

### 3.2.1 Source data assessment (Encouraged)

The data received from the forestry Committee of the Republic of Karakalpakstan and territorial administrations are analyzed, and if errors are detected, it is necessary to check with the subjects.

## 3.3 Statistical techniques

### 3.3.1 Source data statistical techniques (Required as relevant to data category)

### 3.3.2 Other statistical procedures (Required as relevant to data category)

Data is adjusted and converted using reasonable methods. Adjustments are made based on preliminary data when final data is generated.

## 3.4 Data validation

### 3.4.1 Validation of intermediate results (Encouraged)

Data on deforestation and forest fires are compared with previous data from the previous quarter.

### 3.4.2 Assessment of intermediate data (the recommended category)

### 3.4.3 Assessment of discrepancies and other problems in statistical outputs using (featured category)

Discrepancies in output statistics are studied, data for the reporting period is compared with the results of the previous quarter and year, and the reasons for significant discrepancies are identified and analyzed.

## 3.5 Revision studies

### 3.5.1 Revision studies and analyses (Encouraged)

Quarterly and annual data are processed, analyzed and summarized, if necessary clarified with the subjects and provided on request in a certain order.

## 4. SERVICEABILITY

### 4.1 Periodicity and timeliness

#### 4.1.1 Periodicity (Required)

Data on deforestation, forest fires, and forest area are generated every quarter and once a year.

#### 4.1.2 Timeliness (Required)

Quarterly and annual data are processed, analyzed and summarized, if necessary clarified with the subjects and provided on request in a certain order.

### 4.2 Consistency

#### 4.2.1 Internal consistency (Required as relevant to data category)

Information is generated annually.

## 4.3 Revision

### 4.3.1 Revision and/or update schedule (Required)

Collection, processing, accumulation, storage, generalization and analysis of information on deforestation, forest fires and forest area are carried out in accordance with the work plan within the established time frame.

### 4.3.2 Identification of preliminary and/or revised/updated data (Required)

During data dissemination, users are informed that the data is preliminary.

### 4.3.3 Dissemination of revision studies and analyses (Encouraged)

The revised data is analyzed in comparison with the preliminary data, which makes it possible to assess the reliability of the preliminary data.

Data on deforestation, forest fires and forest area are provided on request in the form of tables in accordance with the established procedure.

## 5. ACCESSIBILITY

### 5.1 Data

#### 5.1.1 Statistical presentation (Required)

Data on deforestation, forest fires and forest area are provided on request in the form of tables in accordance with the established procedure.

#### 5.1.2 Dissemination media and format (Required)

##### 5.1.2.1 Hard copy - New release

Data is provided to users on request in the prescribed manner.

##### 5.1.2.2 Hard copy - Weekly bulletin

No

##### 5.1.2.3 Hard copy - Monthly Bulletin

No

##### 5.1.2.4 Hard copy - Quarterly bulletin

Available in the form of tables.

##### 5.1.2.5 Hard copy - Other

Table according to official users requests

#### 5.1.5 Dissemination of data by request (Encouraged)

Data on deforestation, forest fires and forest area are provided on request in the form of

tables in accordance with the established procedure.

## 9. PLANS

### 9.1 Recent

#### 9.1.1 Plans for improvement - Recent improvements

Funding is provided from the state budget and own funds.

#### 9.3.2 Plans for improvement - TA/financing needs - Medium-term

Funding is provided from the state budget and own funds.
