Investments into fixed capital

0. PREREQUISITES

A. 0.1 Legal environment

0.1.1 Responsibility for collecting, processing, and disseminating statistics

State Committee of the Republic of Uzbekistan on Statistics

The State Statistics Committee (SSC) is operating independently under the Law on "State Statistics" of the Republic of Uzbekistan, dated December 12, 2002, amended in 2012, which regulates relations in the sphere of organization of state statistics work, defines powers of state statistics agencies and creates a normative basis for maintaining the uniform system of statistical information.

In September 2017, a new Statute on the State Statistics Committee of the Republic of Uzbekistan has been introduced to specifying the mandate, the functions and the structure of the SSC, which shall be the principal data collecting, processing, analyzing and dissemination agency responsible for co-coordinating, monitoring and supervising the National Statistical System. Its functions include the provision of a uniform statistical methodology corresponding to international standards.

The SSC, like other State statistics agencies performing statistical work, shall have the right, within the limits of their powers, to request and obtain state statistical reports, administrative accounting data, and other data necessary for the conduct of state statistical observations, as well as explanations appended to the reports from other offices.

According to the presidential decree Nr.5054, dated December 12, 2017, economic and financial data in the country should be compliant and coordinated under the IMF GDDS system.

0.1.2 Data sharing and coordination among data producing agencies

State Committee of the Republic of Uzbekistan on Statistics

According to the Article 9 of the Law on Statistics, State statistics agencies shall perform statistical work in interaction with other state bodies in fulfillment of the Program of State Statistical Works. State statistics agencies permit other state agencies and legal entities to perform separate actions concerning their powers in accordance with the procedure established by the legislation. Other state agencies and legal entities shall conduct statewide statistical observations according to the Program of State Statistical Work, as well as departmental statistical observations according to the forms coordinated with the authorized

state statistics agency. The data of departmental statistical observations shall be submitted to the authorized state statistics agency at its request. In addition, the Statistics Council, a collegial advisory body, ensures coordination on problems associated with the development, functioning and coordination of state statistics under the authorized state statistics agency. The Statistics Council may appoint expert commissions to examine separate matters of state statistics. Experts may be invited to meetings of the Statistical Council and the expert commissions, and representatives of ministries, state committees and departments may be heard on matters of state statistics. The composition of the Statistical Council shall be approved by the President of the Republic of Uzbekistan.

0.1.3 Confidentiality of individual reporters' data

State Committee of the Republic of Uzbekistan on Statistics

Under the Article 7 of the Law on State Statistics, State statistics agencies shall be obliged to ensure confidentiality of individual statistical data, preservation of state secrets and trade secrets of legal entities and anonymity of data regarding individuals. In addition, the Statute of the State Statistics Committee of the Republic of Uzbekistan (Sep.2017) stipulates that the SSC shall take security measures to prevent confidentiality issues (art. 13.c, §15), including on bank secrecy (13.c, §11). Lastly, according to the Article 5 of the Law on State Statistics, interference by state agencies and local public authorities in the state statistics activities shall not be permitted.

The employees of SSC must follow a Code of Ethics, including an oath of secrecy, not to disclose any information availed to them while carrying out their duties as assigned to them. They are informed of duties upon appointment. Each employee of the SSC is required to sign a contract which requires him not to disclose such data.

A. 0.2 Resources

0.2.1 Staff, facilities, computing resources, and financing (Encouraged)

[Staff, facilities, computing resources, and financing for statistical programs currently available as well as what would be required for programmed statistical outputs.]

Investments into fixed capital: 8 employees in the Central Office are engaged in the formation of investments in fixed capital and 2-3 - in the Divisions of Investment Statistics and the construction of territorial statistical departments.

The number of employees is sufficient for fulfilling the set tasks on forming statistical data for investment statistics into non-financial assets.

All employees have higher education in the economic and investment sphere and at least once every 2 years undergo training in the courses of the Centre for Staff Retraining and Statistical Researches under the State Committee on statistics.

Each workplace is provided with a personal computer, the software is regularly updated.

The provided financial resources are sufficient for carrying out the works stipulated by the Programme of State Statistical Works on Investment and Construction Statistics.

INTEGRITY

1.1 Professionalism

1.1.1 Impartiality of statistics

State Committee of the Republic of Uzbekistan on Statistics

According to the Law on Statistics (Article 4), the basic principles of the State Statistics include accuracy, objectivity and impartiality. In addition, the Statute of the State Statistics Committee of the Republic of Uzbekistan (art. 13 c., §6) stipulates that the principles of the SSC should include impartiality.

1.1.2 Selection of sources, methodology, and modes of dissemination

State Committee of the Republic of Uzbekistan on Statistics

According to the Law on Statistics (Article 15), statistical data shall be used for state and scientific purposes, for informing the public, ensuring rights, freedoms and lawful interests of users. Primary statistics obtained by state statistics agencies from legal persons, their representations and branches, natural persons, including individual businessmen, shall be used for statistical purposes only for the preparation of summary statistical indicators and shall be published in summary and anonymous form. Statistics that contain the state and trade secrets shall be submitted in the manner prescribed under law.

1.1.3 Commenting on erroneous interpretation and misuse of statistics

State Committee of the Republic of Uzbekistan on Statistics

The SSC can, on ad-hoc basis, comment on erroneous interpretation and misuse of statistics

1.2 Transparency

1.2.1 Disclosure of terms and conditions for statistical collection, processing, and dissemination

State Committee of the Republic of Uzbekistan on Statistics

According to the Law on Statistics (Article 4), the basic principles of the state statistics include accessibility, transparency and openness. The terms and conditions for statistical collection, processing and dissemination are incorporated into Uzbekistan's laws and resolutions dealing with statistics. These legislative measures are on the websites and thus accessible to the public. Thus, the *Law on State Statistics Committee (2002)* and Resolution Number 368 are posted on the Committee's website (www.stat.uz). The *Law* is also reproduced in the Bulletin of Oliy Majalis (Parliament), and included in the data base on laws and regulations (www.norma.uz), as well as that of the Ministry of Justice accessible on the address www.Lex.uz.

1.2.2 Internal governmental access to statistics prior to release

State Committee of the Republic of Uzbekistan on Statistics

The government has no access to SSC data prior to their release. The State statistics Committee are independent in the dissemination of statistical data. Interference by state agencies shall not be permitted (cf. Article 5 of the Law on Statistics). Only the Chairman of the Committee has access to statistics prior to release.

1.2.3 Attribution of statistical products

State Committee of the Republic of Uzbekistan on Statistics

Data released to the public are clearly identified by the data producing agency (logo and footnotes).

1.2.4 Advance notice of major changes in methodology, source data, and statistical techniques.

State Committee of the Republic of Uzbekistan on Statistics

Before a move to a new methodology, the SSC provides to the public advance notice when major changes are introduced in methodology and statistical techniques. The SSC posts on its website a relevant methodological note explaining what changes users should expect.

2. METHODOLOGY

2.1 Concepts and definitions

2.1.1 Concepts and definitions (Required)

[Degree to which the overall structure of concepts and definitions follows internationally accepted standards, guidelines, or good practices.]

Calculations of investments into fixed capital according to a methodology adapted to the requirements of international standards have been carried out by the State Committee on statistics since 2004 in accordance with the recommendations of the mission of the International Monetary Fund.

Investments into non-financial assets:

1. The methodological basis for the formation of investments into fixed capital is the “Methodological provisions for the formation of the total volume of investments into non-financial assets”, approved by the Decree of the State Committee of the Republic of Uzbekistan on statistics № 10 dated April 30, 2018; Methodological provisions are brought to conformity with the System of

National Accounts 2008 // European Commission, International Monetary Fund, Organization for Economic Cooperation and Development, United Nations Organization, World Bank // New York, 2012; “Methodological provisions on assessment of actual expenditure of the population on the construction of individual accommodation units and outdoor household buildings”, approved by the Decree of the State Committee of the Republic of Uzbekistan on statistics dated 26. 01. 2018 № 2; Urban planning norms and rules (ShNK 4.01.16-09) “Rules for determining the cost of construction in contractual current prices”.

Calculations of investments into fixed capital according to the methodology adapted to the requirements of international standards have been carried out by the State Committee on statistics since 2004 in accordance with the recommendations of the mission of the International Monetary Fund.

2.2 Scope

2.2.1 Scope (Required)

2.2.1.1 Scope of the data

[Scope of the data.]

The geographical coverage of the data includes the Republic of Karakalpakstan, 12 regions and Tashkent city.

The total volume of investments into fixed capital includes the investment activities:

- a) large enterprises;
- b) small enterprises and micro-firms;
- c) farm businesses;
- d) non-commercial organizations engaged in investment activities;
- e) assessments of household activities, in terms of construction and thorough repairs of individual housing.

2.2.1.2 Exceptions to coverage

[Exceptions to coverage.]

There are no exceptions.

2.2.1.3 Unrecorded activity

[Unrecorded activity.]

The shadow economy is not taken into account.

2.3 Classification/sectorization

2.3.1 Classification/sectorization (Required as relevant to data category)

[Broad consistency of classification/sectorization systems used with internationally accepted standards, guidelines, or good practices.]

The breakdown by types of activity is carried out in accordance with the Classifier of types of Economic Activities of the Republic of Uzbekistan (Common Classifier of Economic Activity ed. 2), the equivalent of the Classification of Economic Activities within the framework of European Union (NACE – ed.2).

The main accounting unit is an institutional unit.

2.4 Basis for recording

2.4.1 Valuation (Required as relevant to data category)

[Types of prices (market, historical, administrative, basic, purchasers', producer, etc.) used to value flows and stocks.]

Investments into non-financial assets: Statistical accounting of investments into fixed capital is carried out in the amount of actually utilized volume, regardless of the moment of its payment, in actual prices of the reporting period, including value added tax.

For conducting analysis of changes in the comparable dynamics of investments and reflecting the results of investment activities of enterprises and organizations, the relative indicator is used - **the index of physical volume** of investments into fixed capital, which characterizes the change in investment volumes in the compared periods taking into account inflationary processes.

The calculation of the index of the physical volume of investments into fixed capital is carried out by comparing the volumes of investments for the compared periods, brought into comparable prices.

The index of physical volume of the corresponding period of the previous year is calculated using a composite index - deflator - average weighted index of investment volumes into fixed capital of legal and physical entities.

The deflator index for investments into fixed capital of legal entities is calculated as an aggregate indicator from price indices for construction and installation works, machinery and equipment and other capital works and costs, weighted by the share of these elements in the total volume of investments into fixed capital.

The deflator index for investments into fixed capital of physical entities is calculated as an aggregate indicator from indices of rise in prices for construction materials and labour costs.

2.4.2 Recording basis (Required as relevant to data category)

[Degree to which recording meets requirements for accrual accounting.]

Transactions and flows are registered on accrual basis in accordance with the recommendations of the 2008 SNA.

2.4.3 Grossing/netting procedures (Encouraged)

[Broad consistency of grossing/netting procedures with internationally accepted standards, guidelines, or good practices.]

The volume of investments into non-financial assets includes investments disbursed by legal entities of all types of economic activity, as well as by physical entities in the construction of residential buildings and non-residential facilities, the expenditure on perennial plantings and cattle.

In order to conduct statistical analysis, the investments into fixed capital are formed in the following main sections: by types of investments for technological, reproduction structure, by types of economic activities, sources of financing.

3. ACCURACY AND RELIABILITY

3.1 Source data

3.1.1 Source data collection programs (Required)

[Comprehensiveness of source data from administrative and survey data collection programs, and appropriateness of the collection modality for country-specific conditions.]

A comprehensive and constantly updated register card of the companies serves as the basis for conducting statistical surveys of enterprises.

As a basis for conducting statistical activities, the comprehensive and constantly updated register card of the companies (Unified State Business Register), acting in accordance with the decree of the Cabinet of Ministers № 274 dated September 25, 2012 "On approval of the Provision on the Unified State Business Register" and decree of the Cabinet of Ministers № 66 dated February 9, 2017 "On measures for implementing the decree of the President of the Republic of Uzbekistan dated October 28, 2016 № 2646 " On improving the system of state registration and registration of business entities ".

The procedures for maintaining the business register correspond to the

requirements (including the addition of new units, the exclusion of units that have ceased to exist, and maintaining the accounting of mergers and changes in ownership). The initial data is constantly analyzed in order to ensure the comprehensive nature of the data collection programme. Reporting forms are periodically reviewed in order to take into account the changed circumstances.

The information base for the formations of investments into fixed capital is the primary statistical data of state statistical reporting:

- Once a year, the updated information is formed on the total volume of investments into non-financial assets based on the data of the following state statistical reporting and surveys:

a) 2-invest shakli (annual) "Report on investment activity, on the commissioning of buildings and structures" - represent legal entities, including economic construction management bodies carrying out all types of economic activities (except for small enterprises, micro-firms, farm businesses and non-profit organizations);

b) 1-KB shakli (annual) "Report of the micro-firm and the small enterprise" - represent micro-firms and small enterprises of all forms of ownership;

c) 1-FX shakli (annual) "Report on the activities of the farm business" - represent farm businesses;

d) 1-notijorat shakli (annual) "Report on the activities of a non-profit organization" - represent non-profit organizations (except for public associations, public funds, non-state institutions, self-government bodies of citizens and private homeowners associations);

e) 1-NNT shakli (annual) "Report on the activities of a non-governmental non-profit organization" - represent public associations, public funds, non-state institutions, self-government bodies of citizens;

f) 4-qurilish shakli (annual) "Report on the commissioning of individual residential buildings and non-residential buildings by physical entities" - represent the city, district bodies of the State Committee of the Republic of Uzbekistan on Land Resources, Geodesy, Cartography and State Cadastre;

g) 1-DX shakli (twice a year) "Report on the activities of dekhkan (personal subsidiary) farms" - represent gatherings of citizens of mahallas;

h) 1-TJ so'rovnomasi (non-recurrent) "Questionnaire for a sample survey of introduced individual residential buildings" - a survey conducted by statistical bodies;

i) 1-bozor narxlari blankasi (three times a month) "Price registration form in dekhkan markets" - a survey conducted by statistical bodies.

- On a quarterly basis, the volume of investments into non-financial assets is calculated in an expeditious manner on the basis of the reporting data of large organizations and estimates of the volume of investments of other legal entities

(carrying out investment activities of small enterprises and micro-firms, farm businesses, non-commercial organizations), as well as household activities (separately for each category)

The operational assessment of the quarterly volume of investments into fixed capital is made for each investment group and category of enterprises.

The cost of commissioned individual residential buildings is calculated monthly in accordance with the “Methodological provisions for assessing the actual expenditures of the population on the construction of individual residential buildings and outdoor household buildings”, approved by the Decree of the State Committee of the Republic of Uzbekistan on statistics dated 26. 01. 2018 № 2.

On a quarterly basis, the volume of investments of individual real estate developers in the construction of non-residential facilities (without involving contracting organizations) is formed according to the data of relevant quarterly state statistical reporting submitted by the city and district bodies of the State Committee of the Republic of Uzbekistan on Land Resources, Geodesy, Cartography and State Cadastre.

The cost of acquired fruit and berry plantations, vineyards and mulberry this year is determined by the cost of one seedling for each type of planting and the quantity of seedlings planted in each hectare.

On the basis of the data of form 1-DX, the indicators are determined for the number of cattle, sheep and female goats, horses, camels, pigs. Using a special coefficient, following on from life expectancy, the quantity of animals is established, calculated as the accumulation of fixed capital. The received data is multiplied by the price of one animal, which is determined on the basis of data from a survey of dekhkan markets (1-bozor) and, on this basis, the total amount of household expenses on the purchase of animals is formed.

Estimation of costs on the purchase of machinery, equipment, agricultural equipment, transport facilities by individual entrepreneurs without forming a legal entity for entrepreneurial activity is carried out on the basis of data on unloaded industrial products, import volume by major product groups (foreign trade statistics) and estimated data on the purchase of cars for final consumption.

3.1.2 Source data definitions, scope, sectorization, classifications, valuation, and time of recording (Encouraged)

[Degree to which source data approximate definitions, scope, sectorization, classifications, valuation, and time of recording required (as described in 2.1.1-2.4.3).]

The initial data corresponds to the time of reflection in accounting and base periods.

The dates of data release: quarterly - not later than 13 working days after the reporting period, annually - not more than 6 months after the reporting period.

3.1.3 Source data timeliness (Encouraged)

[Source data timeliness relative to what is required for producing statistical outputs whose timeliness meets applicable data standard (SDDS requirements or GDDS recommendations).]

The data collection programme is regulated by the Programme of state statistical works.

Information on Investments into fixed capital is formed by the State Committee of the Republic of Uzbekistan on statistics on the 13th day that corresponds to the current data standard. The annual one - not more than 6 months after the reporting period.

3.2 Assessment of source data

3.2.1 Source data assessment (Encouraged)

[Routine assessment of source data—including censuses, sample surveys, and administrative records (e.g., for coverage, sample error, response error, and nonsampling error); whether assessment results are monitored; how results are used to guide statistical processes.]

The data received from organizations is analyzed, undergo mandatory control and check not only at the level of district, regional Statistical Departments, but also necessarily at the State Committee on statistics. When the registration errors, the classification errors, the control errors are detected, the information must be specified again with the respondents.

The initial data is analyzed for comparability with other related data sources.

3.3 Statistical techniques

3.3.1 Source data statistical techniques (Required as relevant to data category)

[Statistical techniques in data compilation to deal with data sources (e.g., to align them with target concepts from 2.1.1).]

Estimative calculations for certain categories (physical entities and others) are conceptually consistent with the data of questionnaires and have common approaches.

Mandatory submission of data by respondents is established by the Law of the Republic of Uzbekistan “On state statistics”.

The calculation of the index of the physical total volume of investments into fixed capital, on the basis of statistical reporting for large enterprises, small enterprises and micro-firms, farm businesses, non-commercial organizations, as well as household activities (separately for each category).

The calculation of the analysis of changes in the comparable dynamics of investments and the reflection of the results of investment activities of enterprises and organizations is **the index of the physical volume** of investments into fixed capital, characterizing the change in investment volumes in the compared periods taking into

account inflationary processes.

The deflator index for investments into fixed capital of legal entities is calculated as an aggregate indicator from price indices on construction and installation works, machinery and equipment and other capital works and costs, weighted by the share of these elements in the total volume of investments into fixed capital.

The calculation of the index of the physical volume of investments into fixed capital is carried out by comparing the volumes of investments for the compared periods, brought into comparable prices by the formula:

where $I_{\phi.o}$ – index of physical volume, in %;

V_1, V_0 - volume of investments in actual prices, respectively, for the reporting period and the corresponding period of the previous year;

$I_{\text{дефл}}$ - deflator index, in %.

The index of physical volume towards the corresponding period of the previous year is calculated using a composite deflator index - average weighted index of investment volumes into fixed capital of legal and physical entities.

3.3.2 Other statistical procedures (Required as relevant to data category)

[Statistical techniques employed in other statistical procedures (e.g., data adjustments and transformations, and statistical analysis).]

Investments into non-financial assets:

The calculation of investment into fixed capital is carried out in accordance with the Decree of the State Committee of the Republic of Uzbekistan on statistics dated 26. 01. 2018 № 2, “Methodological provisions for the formation of the total investment volume into non-financial assets” approved by the Decree of the State Committee of the Republic of Uzbekistan on statistics dated 30. 04. 2018 № 10, with “Methodological provisions for assessing the actual costs of the population on the construction of individual residential buildings and outdoor household buildings”.

3.4 Data validation

3.4.1 Validation of intermediate results (Encouraged)

[Assessment and investigation of statistical discrepancies in intermediate data.]

The regular comparative check of estimated and reported data is carried out. The difference between operational and specified data is insignificant.

3.4.2 Assessment of intermediate data (Encouraged)

[Assessment and investigation of statistical discrepancies in intermediate data.]

The analysis of possible discrepancies in the main intermediate data is conducted, and the data is adjusted for eliminating discrepancies.

3.4.3 Assessment of discrepancies and other problems in statistical outputs (Encouraged)

[Investigation of statistical discrepancies and other potential indicators of problems in statistical outputs.]

In case of detecting discrepancies in previously published data, the changes are made to these data in subsequent publications. Coordination can be conducted with other agencies, enterprises and organizations.

3.5 Revision studies

3.5.1 Revision studies and analyses (Encouraged)

[Periodicity with which studies and analyses of revisions and/or updates are carried out; whether and how they are used internally to inform statistical processes (see also 4.3.3).]

Investments into fixed capital: the preliminary annual indicators for January-December are compared with annual reporting data in 6 months after the reporting period. In connection with the transition to the classification of NACE ed. 2 from 2016, the annual volumes were recalculated from 2010 to 2015.

4. SERVICEABILITY

4.1 Periodicity and timeliness

4.1.1 Periodicity (Required)

[Periodicity of statistical outputs relative to applicable dissemination standard (SDDS requirement or GDDS recommendation).]

Investments into non-financial assets: Calculations of the volume of investment into fixed capital are conducted on a quarterly basis, the updated indicators - according to the annual reporting.

4.1.2 Timeliness (Required)

[Timeliness of statistical outputs relative to applicable dissemination standard (SDDS requirement or GDDS recommendation).]

Investments into non-financial assets: Investments into fixed capital are published on the 13th working day, the annual data - not later than in 6 months after the reporting period (corresponds to data dissemination standards - GDDS). It is published in accordance with the schedule set in the GDDS Data Publication Calendar.

4.2 Consistency

4.2.1 Internal consistency (Required as relevant to data category)

[Consistency of statistics within the dataset.]

After confirmation and distribution, the statistical series are not revised.

4.2.2 Temporal consistency (Encouraged)

[Consistency or reconcilability of statistics over a reasonable period of time.]

Investments into non-financial assets: There are time series as a whole for investment into fixed capital since 1991, in the structure of Common Classifier of Economic Activity, the indicators have been recalculated since 2010. Calculations of investment into fixed capital according to a methodology adapted to the requirements of international standards have been carried out by the State Committee on statistics since 2004 in accordance with the recommendations of the mission of the International Monetary Fund.

4.2.3 Intersectoral and cross-domain consistency (Encouraged)

[Consistency or reconcilability of statistics with those obtained through other data sources and/or statistical frameworks.]

The statistical data is comparable to the data of SNA.

4.3 Revision

4.3.1 Revision and/or update schedule (Required)

[Transparency and regularity of revision/update schedule.]

Investments into non-financial assets: data on annual volume is clarified in the terms stipulated by the Programme of state statistical works.

4.3.2 Identification of preliminary and/or revised/updated data (Required)

[Identification of preliminary and/or revised/updated data.]

These investments into fixed capital are reviewed on the basis of clarified annual reports within the time frames established by the Programme of state statistical works.

4.3.3 Dissemination of revision studies and analyses (Encouraged)

[Dissemination of revision studies and analyses (see also 3.5.1).]

In statistical compilations it is indicated that for the previous year, the separate indicators are being revised. The revised (final) data is distributed through the publications of the State Committee on statistics.

5. ACCESSIBILITY

5.1 Data

5.1.1 Statistical presentation (Required)

[Statistics are presented in a way that facilitates proper interpretation and meaningful comparisons (layout and clarity of text, tables, and charts).]

Data on investment into fixed capital is provided online and electronically to users through the publications “Socio-economic position of the Republic of Uzbekistan”, “Statistical review of the Republic of Uzbekistan”, “National accounts of the Republic of Uzbekistan”, etc.

5.1.2 Dissemination media and format (Required)

5.1.2.1 Hard copy - New release

[Hard copy - New release.]

Data is distributed to users in a printed form through publications of the State Committee of the Republic of Uzbekistan on statistics: “Socio-economic position of the Republic of Uzbekistan”, “Statistical review of the Republic of Uzbekistan”, “National accounts of the Republic of Uzbekistan”, etc.

5.1.2.2 Hard copy - Weekly bulletin

[Hard copy - Weekly bulletin.]

There are no.

5.1.2.3 Hard copy - Monthly Bulletin

[Hard copy - Monthly Bulletin.]

There are no.

5.1.2.4 Hard copy - Quarterly bulletin

[Hard copy - Quarterly bulletin.]

“Socio-economic position of the Republic of Uzbekistan”, “Statistical review of the Republic of Uzbekistan”.

5.1.2.5 Hard copy - Other

[Hard copy - Other.]

Tables upon special requests of users.

5.1.2.6 Electronic - On-line bulletin or data

[Electronic - On-line bulletin or data.]

Quarterly bulletin “Investments into non-financial assets”.

“Statistical review of the Republic of Uzbekistan” is published on the site quarterly.

Electronic press release is published quarterly.

5.1.2.7 Electronic - Other

[Electronic - Other.]

Quarterly and annually, the data is presented in the form of electronic spreadsheets to governmental bodies and other users upon their request.

5.1.5 Dissemination on request (Encouraged)

[Dissemination on request of unpublished but non-confidential statistics.]

Specific details may be available upon request. According to the Law of the Republic of Uzbekistan “On state statistics”, Provision “On the State Committee of the Republic of Uzbekistan on Statistics”, Regulation of organizing works on preparing and distributing statistical information and other normative documents, the statistical data is presented to users upon their request according to established procedure. The distribution of statistical information is carried out by providing, upon written request of legal or physical entities in the form of printed or electronic spreadsheets, statistical compilations, bulletins, express information, as well as in accordance with the agreements of the parties on information interaction.

5.2 Metadata

5.2.1 Dissemination of documentation on concepts, scope, classifications, basis of recording, data sources, and statistical techniques (Required)

[Dissemination of documentation on concepts, scope, classifications, basis of recording, data sources, and statistical techniques, including annotation of differences from internationally accepted standards, guidelines.]

On the website of the State Committee on statistics (<https://lib.stat.uz/uz/uslub-mater-uz/investitsii-i-stroitelstvo>) the methodical provisions on forming and calculating statistical indicators for investment activity are placed.

9. PLANS

9.1 Recent

9.1.1 Plans for improvement - Recent improvements

[Plans for improvement - Recent improvements.]

Improvement of tools (forms and questionnaires) of state statistical observations.

9.2 General

9.2.1 Plans for improvement - Short-term

[Plans for improvement - Short-term.]

Performing calculations of indicators of investment into fixed capital for discrete quarters.

9.2.2 Plans for improvement - Medium-term

[Plans for improvement - Medium-term.]

9.3 Financial

9.3.1 Plans for improvement - TA/financing needs - Short-term

[Plans for improvement - TA/financing needs - Short-term.]

Financing is provided in the frameworks of the annual Programme of state statistical works.

9.3.2 Plans for improvement - TA/financing needs - Medium-term

[Plans for improvement - TA/financing needs - Medium-term.]

Financing is provided in the frameworks of the annual Programme of state statistical works.
