Share of regions in total volume of construction works

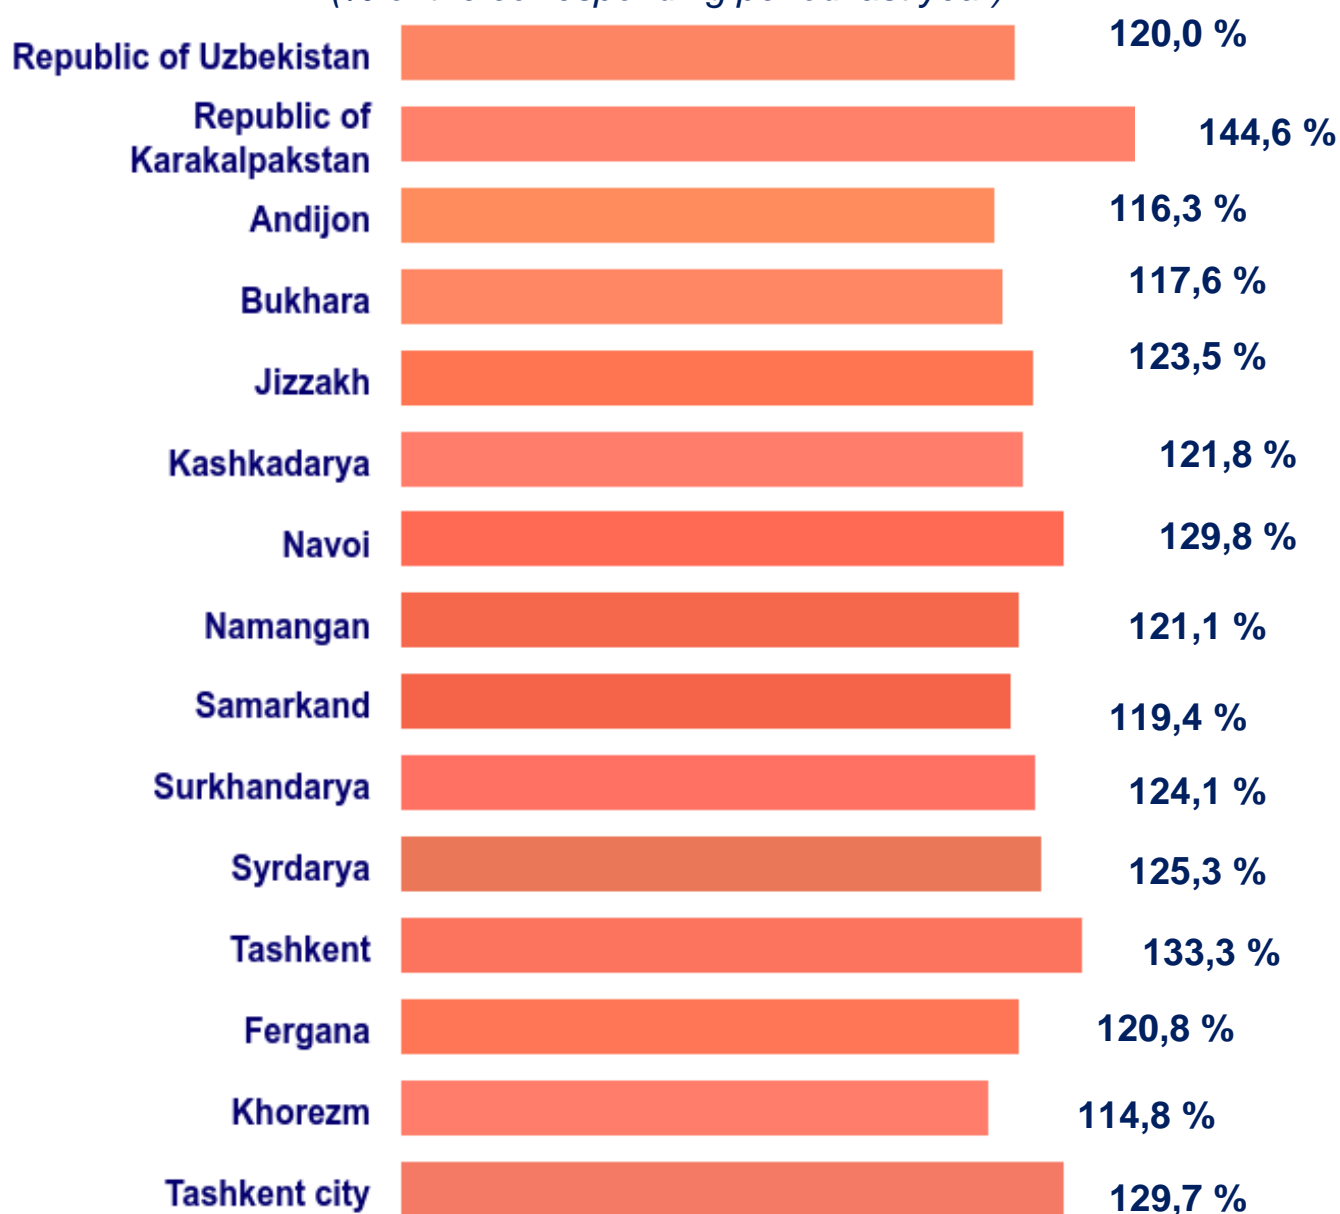

In the regional structure, construction organizations of Tashkent city performed **21.8 %** of the total volume of construction works in the country, the cost of which is **7 494.4** billion UZS. Such large-scale construction is explained by the fact that the largest construction companies of the country are located in the city of Tashkent, as well as many small construction organizations and microfirms.

At the same time, large-scale construction works are being carried out in this region, including the construction of metro lines, the international business center "Tashkent city", residential buildings within the framework of state programs, other buildings and structures for sale, which led to a significant increase in construction works.

Growth rates of construction works in the regions

(% of the corresponding period last year)

Construction works in the territorial context with the highest growth rates

Republic of Karakalpakstan (144.6 %):
