

FOREWORD

The Statistical Review of the Republic of Uzbekistan is a quarterly publication of the State Committee on Statistics reflecting the socio-economic development of Uzbekistan, the state of industries and territories. The report publishes the main statistical indicators of the Republic of Uzbekistan in January – December 2016.

Beginning from the first quarter of 2016 in this publication statistical indicators for the reporting period have been developed and presented under the Nationwide Standard Industrial Classification of Economic Activities of the Republic of Uzbekistan (NSICEA-2) based on the Classification of Economic Activities of the European Community (NACE Rev. 2).

The NSICEA-2 changes the boundaries of existing kinds of economic activities. In particular, the manufacturing processes include all the activities aimed at the transformation of used or processed products into their new types: mining and quarrying, manufacturing, electricity, gas, steam and air conditioning, water supply, sewerage, waste management and remediation, construction (sections B,C,D,E,F of the Classification). In order to avoid different interpretations of the boundary of agricultural production as the branch of economy the agriculture in the updated classification includes not only crop and animal production but production of forestry and fishery products (section “Agriculture, forestry and fishing”).

In accordance with international statistical practices in order to provide a more accurate analysis of economic trends the percentage of activities in the structure of GDP was calculated to gross value added (i.e., the impact of taxes and subsidies on products is excluded from GDP).

The publication consists of 13 thematic parts and includes key macroeconomic indicators, as well as statistical data on GDP production, economic activities of enterprises and organizations, including small businesses, investment activities, the dynamics of the development of agriculture, forestry and fishing, industry and construction, market services.
